

Contents

1 Some slants, perspectives, and basic considerations 1

- 1 Science is a human enterprise 3
- 2 A historical dimension to self-understanding 7
- 3 Sanford: "Will psychologists study human problems?" 11
- 4 Farson: Behavioral science as a science of man 14
- 5 Handy: What is scientific method? 14
- 6 Non-science: Ignoring cases that don't fit 17
- 7 Gresham: "Fortune tellers never starve" 18
- Chapter summary 25

2 The nervous system and psychology 26

- 1 Sperry's brain interference experiments 27
- 2 How stable is the organism? 31
- 3 A postscript by a professor of chemistry and molecular biology 32
- 4 The locus of learning in planaria 33
- 5 "Pleasure centers" in the brain: James Olds' work with rats 44
- 6 Heath: "Electrical self-stimulation of the brain in man" 46
- 7 Smith and Burkland: Results of the surgical removal of the left ("dominant") hemisphere 49
- 8 Nielsen and Sedgwick: Observations on a brainless monster 50
- 9 Thompson, Huff, and Wass: "Migration of bullet in gunshot wound of the brain" 52
- 10 An excerpt from the report of a stroke victim 53
- 11 The brain as a tape recorder 54
- 12 An alternative interpretation of Penfield's results 58
- 13 Some salient comments about the brain by Riese 61
- 14 Some epigrammatic statements by Riese 65
- Chapter summary 65

3 Race and psychology 66

- 1 Coon's defense of race 67
- 2 What is a "race"? 68
- 3 Fried: "A four-letter word that hurts" 71
- 4 De Vos and Wagatsuma: Japan's Invisible Race 76
- 5 Brotz: The Black Jews of Harlem 83
- 6 A final point about race 84
- 7 A test case 86
- Chapter summary 86

4 Heredity and psychology 88

- 1 Critique of the heredity doctrine 89
- 2 Jennings: Heredity and environment 91
- 3 Analysis of the doctrine of "psychoheredity" 95
- 4 Adams: The Juke myth 98
- 5 Jastrow: The inheritance of psychopathologies 101
- 6 A contrary view on inheritance of psychopathologies 103
- 7 A preview of things to come 104
- Chapter summary 105

5 Instincts (?), tropisms, and imprinting 106

- 1 Kellogg's classic view of instinct 107
- 2 Pheromones 110
- 3 Krebs: The so-called "suicidal instinct" of the lemmings 112
- 4 Mayhew: The swallows of Capistrano 114
- 5 Caras: The alleged ferocity of animals 115
- 6 Adamson: The two faces of Elsa, a lioness 117
- 7 Recent work of the young ethologists 121
- 8 Goodall's life among the chimpanzees 125
- 9 Goodall: Fishing for termites 129
- 10 Goodall and van Lawick: Use of tools by the Egyptian vulture 132
- 11 Eisner and Davis: "Mongoose throwing and smashing millipedes" 133
- 12 Millikan and Bowman: "Observations of Galapagos tool-using finches in captivity" 135
- 13 Chemosensory perception in the migration of fish 144
- 14 Hasler: The migration of salmon 145
- 15 Imprinting 149
- 16 Lorenz's pioneering work in imprinting 149
- 17 Laboratory studies of imprinting 151
- 18 Melvin, Cloar, and Massingall: Imprinting a quail to a hawk 155
- 19 Scott's lamb and critical periods in imprinting 156
- 20 Moltz and Rosenblum on the "irreversibility" of imprinting 157
- Chapter summary 159

6 Beginnings, origins, nascencies, and sequences 161

- 1 Gesell: The Embryology of Behavior 163
- 2 Gottlieb and Zing-Yang Kuo: A window in a duck egg 167
- 3 Grier, Counter, and Shearer: "Prenatal auditory imprinting in chickens" 170
- 4 Lipsitt: The post- "developmental age" era 173

- 4 Lovaas, Schaeffer, and Simmons: *Building social behavior in autistic children by use of electric shock* 287
- 5 Stewart: *How to perpetuate psychosis* 292
- 6 Dyer: *Problems in personality assessment* 294
- 7 Radin: *Personality and drug addiction* 301
- Chapter Summary 306

10 Intelligence 307

- 1 Cautela: *Some common misconceptions of intelligence* 310
- 2 Piaget on intelligence 312
- 3 Bowles and Pronko: *"A new scheme for the inheritance of intelligence"* 316
- 4 Sontag, Baker, and Nelson: *Recent research on intelligence* 318
- 5 Sontag, Baker, and Nelson: *Intelligence and personality* 321
- 6 Terman's developmental study of 1000 geniuses 324
- 7 Skeels: *"Adult status of children with contrasting early life experiences"* 326
- 8 Rosenthal and Jacobson: *Teachers' expectancies as determinants of pupil's IQ gains* 331
- 9 Groso: *Mental retardation* 332
- 10 Bucklew: *The current status of theory in mental retardation* 339
- Chapter summary 346

11 Cognitive processes: Perceiving and thinking 347

- 1 The nature of perception 350
- 2 The nature of "thinking" or implicit action 352
- 3 Snyder and Pronko: *Vision with Spatial Inversion* 352
- 4 Lundin: *Absolute pitch* 358
- 5 Pumroy and Pumroy: *"A case study in discrimination learning"* 362
- 6 Held and Bauer: *"Visually guided reaching in infant monkeys after restricted rearing"* 364
- 7 A new kind of "vision" for the blind 367
- 8 "A classroom demonstration of 'extrasensory perception'" 370
- 9 Psi phenomena 372
- 10 Schuster: *"A new ambiguous figure: A three-stick clevis"* 375
- 11 Grumpton, Wine, and Drenick: *The effect of starvation on cognitive processes* 376
- 12 Hardyck, Petrino, and Ellsworth: *Rapid extinction of speech muscle activity during silent reading* 377
- 13 Phantom limb and phantom sensations 380
- Chapter summary 387

12 *Feelings and emotions* 388

- 1 "The response side of affective, or feeling, interactions" 390
- 2 *Biotelemetry in psychological inquiry* 395
- 3 Hess, Seltzer, and Shlien: "Pupil response of hetero- and homosexual males to pictures of men and women: A pilot study" 399
- 4 *Affective effects of interpersonal action* 403
- 5 Edwards and Acker: "A demonstration of the long-term retention of a conditioned galvanic skin response" 407
- 6 Ewing: *The stress reaction in the cockroach* 411
- 7 *Emotions defined* 412
- 8 Milgram: "Behavioral study of obedience" 417
- 9 Shirer: *Dr. Rascher's experiments* 427
- Chapter summary 431

13 *Learning: Theory and application* 433

- 1 Dixon: *Pattern discrimination and learning-to-learn in a pony* 436
- 2 Norris: *Domestication of the porpoise* 440
- 3 Asher: *On ways of looking at response* 443
- 4 *The conditioned response treatment of enuresis* 447
- 5 Gericke: *Operant conditioning in the treatment of behavior pathology* 449
- 6 Breland and Breland: *A new psychological technology is born* 458
- 7 Verhave: "The pigeon as a quality-control inspector" 462

14 *Retrospect and prospect* 468
