

CONTENTS

ORGANIZERS, SESSION CHAIRMEN AND SPONSORS	v
IN MEMORIAM—MICHAEL GALTON	vii
FRONTISPIECE—SPEAKERS AT CONFERENCE	viii
LIST OF PARTICIPANTS	ix
PREFACE	xi

Species, Speciation, and Chromosomes

E. MAYR

The species concepts	1
Reproductive isolation and chromosomal mutation	4
The bottleneck of heterozygosity	5

Mechanisms of Chromosomal Changes in Mammalian Speciation

T. C. HSU and R. A. MEAD

General introduction	8
Numerical changes	10
The Robertsonian process	10
Non-Robertsonian changes	15

The Mammalian Genome in Evolution and Conservation of the Original X-Linkage Group

S. OHNO

Importance of karyotypic differences	18
Conservation of X-linkage	21
Homology between non-homologues	25
Summary	26

Geographic Variation of Chromosome Forms in Spalax, a Subterranean Mammal of Restricted Mobility

J. WAHRMAN, R. GOITEIN and E. NEVO

Distribution of Spalax, mole rats	30
Identification of different karyotypes	32

Contents

xv

Mechanisms of chromosomal changes in <i>Spalax</i>	38
Consideration of reproductive isolation	42
Summary	46

Induced Chromosomal Aberrations with Special Reference to Man

K. HIRSCHHORN and M. H. COHEN

General considerations of mutagenesis	49
Cytological changes	51
LSD effects	52
Human "centric fusion" changes	55
Other types of translocation in humans	59

Lethal Chromosome Errors

D. H. CARR

General considerations of lethal genetic errors	68
Abortion studies in man	69
Polyploidy	70
Recognized abortions in man, trisomies	72
Effects of triploidy, hydatidiform moles	77
Semilethal errors	82
XO anomaly	83
Conclusions	84

Meiosis in Mammals

C. E. FORD

Introduction	91
Studies at pachytene	92
Chiasmata	93
Structural changes	98
Inversion	99
Duplication and deficiency	100
Reciprocal translocation	100
Robertsonian translocation	104
Insertion	104
Summary	105

Hybrid Sterility

P. K. BASRUR

Introduction	107
Cattle $\times$ Bison hybrids (Cattalos)	108

Chicken $\times$ Pheasant hybrids	118
Electronmicroscopic studies	119
Teratological results	125
Summary	127

Experimental Hybridization

M. C. CHANG, S. PICKWORTH and R. W. McGAUGHEY

Fertilization and prenatal development	132
Peromyscus	132
Goat-sheep	133
Ferret-mink	134
Rabbit-hare	135
Chromosome studies	135
Hybrids reaching adult life	135
Hybrids which die during pregnancy	136
Ferret $\times$ mink	137
Rabbit $\times$ snowshoe hare	139
Discussion	142
Summary	143

Genetic Aspects of Infertility

F. B. HUTT

General considerations	146
Anatomical malformations causing infertility	147
Abnormalities in gametes	149
Embryonic mortality and lethal genes	149
Maternal effects	150
Genetic indicators of infertility	150
Other genetic variations in fertility; summary	152

Gene Action in Human Diploid Cell Strains

R. S. KROOTH

Introduction	154
Gene action	156
Cellular differentiation	156
Relationship of method of obtaining variant cells to the cell type employed	157
Genetic markers in human diploid cell cultures	157
The single active X-theory	160
Some examples of gene action in human diploid cell strains	161
The Lesch-Nyhan syndrome	161

Hurler's syndrome	163
Orotic aciduria	164
The theory of intercellular complementation	167
Summary	175

Chromosome Mosaics as Markers in Embryology

H. G. SCHWARZACHER

Introduction	180
Distribution of cells in XY/XXY mosaic embryo	180
Possible origin of mosaic	181
Embryologic consequences	182
Consequences for Lyon hypothesis	183
Summary	184

Multipolar Mitosis and Somatic Segregation in Cell Cultures of *Microtus Agrestis*

H. G. SCHWARZACHER and F. PERA

Tissue culture system	186
Findings and conclusions	188
Summary	189

Cytogenetics of Marsupials

D. L. HAYMAN and P. G. MARTIN

Introduction	191
Chromosome number in the marsupialia	192
General	192
Marsupials with $2n = 14$	198
Marsupials with $2n$ other than 14	201
Conclusions	204
Autosomal chromosomal polymorphism	205
Sex chromosomes in the marsupials	207
Sex determination in the marsupials	207
Multiple sex chromosome systems	207
The XX/XY sex chromosome systems in marsupials	208
Sex chromosome mosaicism	212
Marsupials as animals for genetic research	214

Insectivore Cytogenetics

D. S. BORGAONKAR

General considerations	218
Macroscelidae	219

Talpidae, Erinaceidae	226
Soricidae	227
Tenrecidae	230
Solenodontidae	240
Tupaiidae	241
Comments and Summary	243

Cytologic Mechanisms of Karyotype Evolution in Insectivores

A. GROPP

General introduction	247
Talpidae	250
Erinaceidae	252
Robertsonian polymorphism in genus <i>Mus</i>	260
Concluding remarks	262
Summary	264

Patterns of Autosomal Heterochromatin

A. GROPP and P. CITOLER

General remarks	267
Methodology—Erinaceidae	268
Nuclear chromatin findings	269
Tritiated thymidine labeling	269
Metaphase spread correlations	272
Autosomal heterochromatin in meiosis	273
General conclusions	275

Chromosomal Evolution in Rodents

C. F. NADLER

Introduction	277
Chromosomal rearrangements	278
Chromosome polymorphism	284
Speciation and chromosomal diversity	289
Hybridization	292
Sex chromosomes	295
Cytotaxonomy	299
Summary	305

Cytogenetic and Phylogenetic Studies in Carnivora

D. H. WURSTER

Phylogenetic considerations of carnivores	310
Marker chromosomes	311

Canidae	311
Mustelidae	312
Felidae	318
Viverridae	320
Karyotype evolution	324

Cytogenetic Studies of Some Armadillos

K. BENIRSCHKE, R. J. LOW and V. H. FERM

Introduction	330
Dasytus	331
Euphractus	335
Chaetophractus	337
Cabassous	339
Discussion	341
Summary	343
Addendum (Priodontes)	344

Artiodactyl Mammals: Their Chromosome Cytology
in Relation to Patterns of Evolution

K. M. TAYLOR, D. A. HUNGERFORD and R. L. SNYDER

Introduction	346
Suiformes	347
Tylopoda	347
Ruminantia	348
General discussion	351
Sex chromosomes	352
Perspectives	354

Primates

J. EGOZCUE

General discussion	357
Methodology	358
Prosimii	358
Platyrrhini	364
Catarrhini	372
Chromosomal evolution	380
Summary	384

Considerations of Sex Chromosome Abnormalities in Man

G. E. SARTO, J. M. OPITZ and S. L. INHORN

Introduction	390
Review of normal development	390

Theories and experiments relating to mammalian sex differentiation	391
Cases 1-4	392
Discussion	402
Position of male determinators on Y	402
Extragenital function of Y	408
Testicular tissue in XX individuals	409
Function of second X in females	409
Summary	410

Anomalies of Sex Chromosomes in Tortoiseshell Male Cats

T. C. JONES

Introduction and nomenclature	414
Report of two cases	416
Summary of reported cases	424
Theories of pathogenesis	425
Meiotic non-disjunction	425
Polyandry; suppression of polar body; fusion	426
Failure of second meiotic division	426
Abnormal syngamy; initial triploidy	428
Fusion of zygotes	428
Exchange of cells between twins	429
Summary	431

Aneuploidy, Polyploidy and Structural Rearrangement of Chromosomes in Mammals Other Than Man

R. A. McFEELY

General introduction	434
Terminology	435
Timing of errors in development	435
Polyploidy	436
Findings in domestic animals	437
Chimerism	438
Possible causative factors of aneuploidy	439

Voucher Specimens in Comparative Cytogenetic Studies

R. G. VAN GELDER

Classical taxonomic considerations	445
Handling of animal identification by cytogeneticist	446
Deposition of specimens with museum collections	447
Obligations of investigators, curators and editors	448

Concluding Remarks: Where Do We Go From Here?

S. OHNO

Summary of Conference	451
---------------------------------	-----

TECHNICAL ADDENDUM

Bone Marrow Preparations for Chromosome Studies

T. C. HSU and J. L. PATTON

Collection in field	454
Direct bone marrow preparations	454
Short-term bone marrow cultures	455
Fixation	456
Air-dried preparations	456
Squash preparations	456

Meiotic Preparations from Mammalian Testes

C. E. FORD and E. P. EVANS

Schedule	461
Comments	462

A Combined Toluidine Blue Stain and Mounting Medium

G. BRECKON and E. P. EVANS

General Technique	465
INDEX	467
