

Genetics of Translation: New Approaches

CONTENTS

Chapter 1: Integration of the Ribosome Cycle in Bacterial Cell Physiology.....	1
David Schlessinger	

RIBOSOMAL RNA

Chapter 2: Probing Ribosome Function Through Mutagenesis of Ribosomal RNA.....	17
Elizabeth A. De Stasio, H. Ulrich Goringe, William E. Tapprich and Albert E. Dahlberg	
Chapter 3: Antibiotic Resistance Mutations in <u>Escherichia</u> <u>coli</u> Ribosomal RNA Genes and Their Uses.....	43
Edward A. Morgan, Steven T. Gregory, Curt, D. Sigmund and Angela Borden	
Chapter 4: Feedback Regulation of rRNA Synthesis in <u>Escherichia coli</u>	55
J.R. Cole, M. Yamagishi and M. Nomura	
Chapter 5: Control of RNA Synthesis in Bacteria.....	63
H. Bremer, E. Baracchini, R. Little and J. Ryals	
Chapter 6: Mechanism, Activation and Control of rRNA Transcription in <u>E. coli</u>	75
R.L. Gourse, R.R. Dickson and J.T. Newlands	
Chapter 7: Specificity in RNA Processing Reactions in <u>Escherichia coli</u>	91
David Apirion, Geza Dallmann, Michael Gurevitz, Andras Miczak, Jozsef Szeberenyi, Tihamer Tomesanyi, Makam N. Subbarao and Ned Watson	

RIBOSOMAL PROTEINS

Chapter 8: Molecular Mechanisms of the Antigenic Control of the S10 Ribosomal Protein Operon of <u>Escherichia coli</u>	105
Lasse Lindahl and Janice M. Zengel	
Chapter 9: Coordinate Control of Ribosomal Protein Gene Expression in Yeast.....	117
Rudi J. Planta and Willem H. Mager	
Chapter 10: Genetic Analysis of Yeast Ribosome Biogenesis and Function.....	131
John Woolford, Mitch Rotenberg, John Larkin, Michelle Moritz, Yi-Fang Tsay and J. Ryan Thompson	

Chapter 11: Thoughts on the Phosphorylation of a Ribosomal Protein.....	145
Stewart P. Johnson, Calvin S. McLaughlin and Jonathan R. Warner	
Chapter 12: A Genetic Approach to Molecular Interactions in the Yeast Mitochondrial Ribosome.....	159
Bertrand Daignan-Fornier, Isabelle Su, Veronique Contamine and Monique Bolotin-Fukuhara	
Chapter 13: <u>MIM3</u> and <u>nam3</u> Omnipotent Suppressor Genes of the Yeast <u>S. cerevisiae</u> Affect the Polypeptide Composition of the 37S Mitochondrial Subunit.....	171
Wlodzimierz Zagorski, Maria Mieszcza, Magdalena Boguta, Anna Kruszezka, Maurice Claisse, Athanase Spyridakis and Piotr P. Slonimski	
Chapter 14: Probing the Evolution of the Translational Apparatus with Archaeobacterial Ribosomes.....	181
Paola Londei, Sergio Altamura, Orsola Tiboni and Piero Cammarano	

TRANSFER RNA

Chapter 15: <u>trpA</u> and Its Protein: Something Old, Something New.....	195
Emanuel J. Murgola	
Chapter 16: Genetic and Regulation of tRNA Methyltransferases in <u>Escherichia coli</u>	211
P. Mikael Wikstrom, Tord G. Hagervall, Anders S. Bystrom, Par H.R. Lindstrom and Glenn R. Bjork	
Chapter 17: Identification and Characterization of Mitochondrial and Nuclear Gene Products and Genes Necessary for Mitochondrial tRNA Biosynthesis in <u>Saccharomyces cerevisiae</u>	223
Jeou-Yuan Chen, Margaret J. Hollingsworth, Michael J. Morales, Carol A. Wise, Hsiao Hsueh Shu, Barbara J. Clark, Deborah L. Caudle, H. Peter Zassenhaus and Nancy C. Martin	
Chapter 18: Suppressors, Introns and Stage Specific Expression of tRNA ^{Tyr} Genes in <u>Drosophila melanogaster</u>	235
Erick Kubli, Beat Suter, Ruth Doerig and Yves Choffat	

TRANSLATION FACTORS

Chapter 19: The Structure and Expression of DNAs Encoding Initiation Factors from Bacterial and Mammalian Cells.....	249
John W.B. Hershey, Helen S. Cummings, John F. Sands, Vinay Pathak and Heidemarie Ernst	
Chapter 20: The Polypeptide Chain Elongation Factor Tu: Characterisation of Mutants and Protein Engineering.....	259
A. Parmeggiani, P.H. Anborgh, R.H. Cool, E. Jacquet, M. Jensen, F. Gumusel, G. Parlato and G.W.M. Swart	
Chapter 21: The Analysis of Temperature-Sensitive Mutants of <i>Saccharomyces cerevisiae</i> Altered in Components Required for Protein Synthesis.....	271
Kivie Moldave and Calvin S. McLaughlin	
Chapter 22: The Mitochondrial Release Factor and the Divergent Codes.....	283
Cheng Chi Lee and Warren P. Tate	

MECHANISM OF TRANSLATION

Chapter 23: How Does the <i>E. coli</i> Ribosome Know Where Translation Should Begin?.....	295
Marc Dreyfus	
Chapter 24: Translation Initiation in the <i>Escherichia coli</i> <i>galE</i> Gene.....	307
Alistair Bingham, Fiona Fulford, Philippa Murray, Marc Dreyfus and Stephen Busby	
Chapter 25: Selection of mRNA by Ribosomes During Prokaryotic Translational Initiation.....	317
Claudio O. Gualerzi, Raffaele A. Calogero, Maria A. Canonaco, Martin Brombach and Cynthia L. Pon	
Chapter 26: Single Point Mutations at the 5' End of a Eukaryotic Gene Can Affect Synthesis of Gene Product in <i>E. coli</i>	331
E.M. Wright and G.T. Yarranton	
Chapter 27: A Novel Approach for Mutational Analysis of the 16S rRNA Molecule Using the Specialised Ribosome System in <i>Escherichia coli</i>	343
Herman A. de Boer, Dennis H. Eaton and Anna S. Hui	

Chapter 28: Structural Features of mRNA That Affect Translation in Yeast.....	353
Thomas Laz, John Clements and Fred Sherman	
Chapter 29: Translation Initiation in Yeast: A Genetic and Mutational Analysis.....	361
Thomas F. Donahue, Mark Cigan, Beatriz A. de Castilho and Heejong Yoon	
Chapter 30: Multiple Nuclear Gene Products are Specifically Required to Activate Translation of a Single Yeast Mitochondrial mRNA.....	373
Maria C. Costanzo, Elaine C. Seaver, Donna L. Mary Kwas and Thomas D. Fox	

ACCURACY OF TRANSLATION

Chapter 31: Effects on Suppressor tRNAs by Mutated Ribosomes -Lack of Correlation With Their Effects on Translational Misreading.....	383
Leif A. Isaksson, Leif A. Kirsebom and Margareta Faxen	
Chapter 32: Genetic Control of tRNA Suppression in <i>Saccharomyces cerevisiae</i> : Allosuppressors....	393
M.F. Tuite, F. Izgu, C.M. Grant and M. Crouzet	
Chapter 33: Omnipotent Suppressors, Allosuppressors and Antisuppressors of Yeast.....	403
Susan W. Liebman, Jae Mahn Song, Jamie All-Robyn, Edward Griffin and Dorothy Kelley-Geraghty	
Chapter 34: Translational Frameshifting and Codon Recognition.....	415
P.G. Wilson and M.R. Culbertson	
Chapter 35: Genetics of Ribosomes and Translational Accuracy in <i>Podospira anserina</i>	431
Evelyne Coppin-Raynal, Michelle Dequard-Chablat and Marguerite Picard	

TRANSLATIONAL CONTROL

Chapter 36: Initiation Complex Formation: A Simple Assay for Translational Regulation.....	443
Larry Gold	
Chapter 37: Expression of <i>atp</i> Genes in <i>Escherichia coli</i>	451
John E.G. McCarthy	

Chapter 38: Translational Control in <u>E. coli</u> : The Case of Threonyl-tRNA Synthetase.....	463
Mathias Springer, Monique Graffe, Jacques Dondon and Marianne Grunberg-Manago	
Chapter 39: Translationally Controlled Expression of the Overlapping Lysis Gene in RNA Phage MS2.....	479
J. van Duin, B.F. Schmidt, B. Berkhout, A. van strien, J. van Westrenen and G.P. Overbeek	
Chapter 40: Translational Control of Transcriptional Activation in the Regulation of Amino Acid Biosynthesis in Yeast.....	499
Alan G. Hinnebusch, Peter P. Mueller and Satoshi Harashima	
Appendix: Secondary structure of <u>E. coli</u> rRNAs.....	513
Participants and Contributors.....	515
Index.....	521
