

Contents

List of Contributors	ix
Foreword	xi
Preface	xiii
 <i>Chapter 1</i> Direct Observation of Transient ES Complexes: Implications to Enzyme Mechanisms	
D. S. AULD	
Introduction	1
Visualization of Carboxypeptidase A · Dansyl Substrate Complexes	2
Quantitative Analysis of ES Complex Formation and Breakdown	4
Inhibition Kinetics	7
Enzymatic Consequences of Chemical Modification	10
Syncatalytic Measurement of Distances	12
Detection of Multiple Intermediates	14
References	17
 <i>Chapter 2</i> Models of Hydrolytic Enzymes	
MYRON L. BENDER AND MAKOTO KOMIYAMA	
Introduction	19
Reactions in Apolar Media	20
Complex Formation	23
Cycloamyloses	25
Polymers	35
Conclusions	52
References	53

Chapter 3 Aldol-Type Reactions and 2-Keto-4-hydroxyglutarate Aldolase

EUGENE E. DEKKER

Introduction	59
Bovine Liver KHG-Aldolase	64
<i>Escherichia coli</i> KHG-Aldolase	70
Summary	73
References	75

Chapter 4 The Hydroxylation of Alkanes

N. C. DENO, ELIZABETH J. JEDZINIAK, LAUREN A. MESSER, AND EDWARD S. TOMEZSKO

Introduction	79
Terminal Hydroxylation	82
Hydroxylase Activity	83
Inertness of Functional Groups	83
Epoxidation	84
Remote Hydroxylation	84
Stereospecificity	85
Steric Selectivities	87
Central Attack	88
Role of Fe	88
Summary	89
References	89

Chapter 5 Intramolecular Nucleophilic Attack on Esters and Amides

THOMAS H. FIFE

Introduction	93
Carbamate Esters	94
Aliphatic Carboxylic Esters and Amides	100
Conclusions	114
References	115

Chapter 6 Chemical Aspects of Lipxygenase Reactions

MORTON J. GIBIAN AND RONALD A. GALAWAY

Introduction	117
Chemical Analogs of the Reaction	120
Iron Content and State	123
Direct Steady-State Kinetics	125
Coupled Reactions and Product Decomposition	127
Proposed Mechanisms	129
References	133

Chapter 7 The Multiplicity of the Catalytic Groups in the Active Sites of Some Hydrolytic Enzymes

E. T. KAISER AND Y. NAKAGAWA

Introduction	137
Results and Discussion	139
Conclusions	149
References	150

Chapter 8 Multifunctionality and Microenvironments in the Catalytic Hydrolysis of Phenyl Esters

TOYOKI KUNITAKE

Introduction	153
Complementary Bifunctional Catalysis	154
Mechanisms of Acylation and Deacylation	160
Microenvironmental Effects on the Reactivity of Anionic Nucleophiles: The Concept of Hydrophobic Ion Pair	165
Catalytic Efficiency	168
Conclusion	171
References	171

Chapter 9 The Interplay of Theory and Experiment in Bioorganic Chemistry: Three Case Histories

G. M. MAGGIORA AND R. L. SCHOWEN

Introduction	173
Charge-Relay Catalysis	175
Enzyme Catalysis and Transition-State Structure	188
Microenvironmental Polarizability Effects in Vision	211
The Reinforcement of Theory and Experiment in Bioorganic Chemistry	225
References	227

Chapter 10 Enzymatic Olefin Alkylation Reactions

ROBERT M. McGRATH

Introduction	231
Formation of Prenyl Pyrophosphates	233
The Prenyltransferases	238
The Polyprenyltransferases	240
Polyprenyl-Aryltransferases	243
Monoprenyl-Aryltransferases	246
Concluding Remarks	254
References	254

Chapter 11 Enzymatic Catalysis of Decarboxylation

MARION H. O'LEARY

Introduction	259
Kinetic Isotope Effects and Rate-Determining Steps	260

Enzymatic Decarboxylations	261
Other Aspects of Decarboxylases	269
Catalysis of Decarboxylation	270
Conclusion	274
References	274
Chapter 12 The Catalytic Mechanism of Thymidylate Synthetase	
ALFONSO L. POGOLOTTI, JR., AND DANIEL V. SANTI	
Introduction	277
Model Studies	279
Enzyme Studies	294
Perspectives	307
References	309
Chapter 13 Studies of Amine Catalysis via Iminium Ion Formation	
THOMAS A. SPENCER	
Introduction	313
Finding an Appropriate α Deprotonation Reaction	315
Studies of Catalysis via Iminium Ion Formation	320
References	335
Chapter 14 Fatty Acid Synthetase Complexes	
JAMES K. STOOPS, MICHAEL J. ARSLANIAN, JOHN H. CHALMERS, JR., V. C. JOSHI, AND SALIH J. WAKIL	
Introduction	339
The Multienzyme Complexes of Fatty Acid Synthesis	341
Structure and Functional Organization of Type I FAS Complexes	347
Regulation of Fatty Acid Synthetase in Animals	359
Regulation of Fatty Acid Synthetase in <i>Mycobacterium smegmatis</i>	365
Summary	366
References	367
Chapter 15 Sulfane-Transfer Catalysis by Enzymes	
JOHN WESTLEY	
Introduction	371
Rhodanese (Thiosulfate Sulfurtransferase)	372
3-Mercaptopyruvate Sulfurtransferase	383
Thiosulfate Reductase	385
Cystathionase (Cystathionine γ -Lyase)	386
Physiological Functions of Sulfane Sulfur	387
References	388
Index	391
