

Brief Contents

ONE Introduction 1

- 1 An Introduction to Cell Biology 2
- 2 Biological Molecules 19
- 3 Enzymes and Biological Reactions 39

TWO Membranes and the Cell Surface 53

- 4 The Structure of Cellular Membranes 54
- 5 The Function of Cell Membranes in Transport and Nerve Conduction 80
- 6 The Cell Surface 103

THREE Cellular Energetics 133

- 7 Cellular Oxidation and the Mitochondrion 134
- 8 Photosynthesis and the Chloroplast 169

FOUR Cell Motility 197

- 9 Cellular Movements Based on Microtubules 198
- 10 Microfilament-Based Cell Motility 220

FIVE Cellular Synthesis and Growth 243

- 11 Structure and Function of the Interphase Nucleus 244
- 12 Nuclear Structure and Function in RNA Transcription 270
- 13 Protein Synthesis 311

SIX Cell Division 355

- 14 The Cell Cycle and DNA Replication 356
- 15 Mitosis and Cytokinesis 398
- 16 Meiosis 432

SEVEN The Evolution of Cells 479

- 17 The Origins of Cellular Life 480

Appendix 498
