

Contents

Chapter 1	Introduction to the Fungi	1
	Organization of the Thallus, 1	
	Reproduction, 7	
	Classification, 16	
	References, 17	
Chapter 2	Chemistry of the Fungal Cell	18
	Proximal Composition, 18	
	Proteins, 19	
	Nucleic Acids, 20	
	Carbohydrates, 29	
	Lipids, 33	
	Summary, 38	
	References, 38	
Chapter 3	Molecular Architecture	40
	Methods of Organelle Isolation, 40	
	The Cell Wall, 42	
	Plasmalemma, 47	
	The Nucleus, 50	
	Mitochondria, 59	
	Vacuoles, Golgi, Vesicles, and Endoplasmic Reticulum, 63	
	Ribosomes, 66	
	Summary, 68	
	References, 68	
Chapter 4	Metabolism	73
	Enzymes, 74	
	Glycolysis, 79	

Respiration, 82
Amino Acid Biosynthesis, 85
Nitrogen and Sulfur Metabolism, 86
Synthesis of Macromolecules, 91
Secondary Metabolism, 95
Regulation of Metabolism, 97
Summary, 100
References, 100

Chapter 5 Growth 102

Growth Measurements, 102
Growth Rates of Individuals, 103
Growth Rates of the Colony, 106
Regulation of Growth, 111
Growth and Development of the Thallus, 117
Summary, 126
References, 127

Chapter 6 Chemical Requirements for Growth 131

Problems of Method, 131
Essential Elements, 137
Nitrogen and Sulfur, 139
Carbon Nutrition, 140
Vitamins and Growth Factors, 144
Sterols and Other Growth Factors, 148
Oxygen and Carbon Dioxide, 148
Water Relations, 152
Hydrogen Ion, 162
Summary, 163
References, 164

Chapter 7 Absorption of Nutrients 168

Mechanisms of Transport, 168
Energy Coupling in Active Transport, 170
Electrolytes in Fungi, 172
Transport of Cations, 173
Transport of Anions, 174
Transport of Sugars, 177
Transport of Amino Acids, 179
The Molecular Basis of Transport, 183
Digestion, 183
Summary, 190
References, 191

Chapter 8	The Physical Environment and Growth	195
	Temperature, 195	
	Visible Light, 199	
	Mutagenic Radiation, 206	
	Geotropism, 212	
	Summary, 215	
	References, 216	
Chapter 9	Spore Formation: Environmental Factors	219
	Nutritional Factors, 219	
	Sporulation Competence, 225	
	Temperature, 226	
	Light, 228	
	Diurnal Light Cycles, 232	
	Circadian Rhythms, 234	
	Carbon Dioxide and Humidity, 235	
	Summary, 237	
	References, 237	
Chapter 10	Biochemistry of Spore Formation	240
	Experimental Approaches, 240	
	<i>Dictyostelium discoideum</i> , 241	
	Precursor-Product Relationships, 242	
	A General Model of Metabolic Control, 243	
	A Kinetic Model of Metabolic Control, 245	
	Evidence for Genetic Control, 247	
	Regulation of Enzyme Activities at the Cytoplasmic Level, 254	
	Summary, 257	
	References, 257	
Chapter 11	Spore Dormancy and Germination	260
	General Characteristics of Spores, 260	
	Dormancy, 262	
	Maturation, 264	
	After-ripening, 265	
	Activation, 266	
	Constitutive Dormancy, 269	
	Exogenous Dormancy, 271	
	Germination, 273	
	Summary, 278	
	References, 279
