Contributors	xi
Foreword	
C. Liana Bolis, Ernst J.M. Helmreich, and Hermann Passow	xvii
Acknowledgments	xix
 I. BACTERIORHODOPSIN	
Introductory Remarks: Bacteriorhodopsin	
Walther Stoeckenius	3
Photochemical Reactions of Halorhodopsin and Slow-Rhodopsin	
Roberto A. Bogomolni	5
The C-Terminal Tail of Bacteriorhodopsin—Its Conformation and Role in Proton Pumping	
Rajni Govindjee, Koki Ohno, Chung-Ho Chang, and Thomas G. Ebrey	13
Infrared Studies of the Photocycle of Bacteriorhodopsin	
K. Bagley, G. Dollinger, L. Eisenstein, M. Hong, J. Vittitow, and L. Zimányi	27
Bacteriorhodopsin: Photocycle and Stoichiometry	
Richard H. Lozier and Luis A. Parodi	39
Intramolecular Charge Shifts During the Photoreaction Cycle of Bacteriorhodopsin	
Lajos Keszthelyi	51
Reconstitution of Halorhodopsin in Black Lipid Membranes	
E. Bamberg, P. Hegemann, and D. Oesterhelt	73
Synoptic Views on the Photochemical Reaction Cycle in Bacteriorhodopsin	
Benno Hess, Dietrich Kuschmitz, and Martin Engelhard	81
 II. THEORY OF PROTON CONDUCTION AND PUMPING	
Chairman's Introduction: Band 3 Protein-Mediated Nonelectrogenic Proton Equilibration Across the Membranes of the Red Blood Cells of Mammals, Amphibians, and Fish	
H. Passow, A. Berghout, and L. Romano	95
Elements of Proton Pump Models	
John F. Nagle and Stephanie Tristram-Nagle	103
An Isomerization Model for the Pump Cycle of Bacteriorhodopsin	
Klaus Schulten, Zan Schulten, and Paul Tavan	113
Mechanistic Properties of Ion Channels and Pumps	
Peter Läuger	133
Localized Protons in Photosynthesis of Green Plants?	
Wolfgang Junge, Yu-Qun Hong, Steven Theg, Verena Förster, and Andrea Polle	139

Electrostatic Interactions in Membrane Proteins	149
Barry Honig	
On the Role of Hydrogen Bonds and Hydrogen-Bonded Systems With Large Proton Polarizability for Mechanisms of Proton Activation and Conduction in Bacteriorhodopsin	153
G. Zundel and H. Merz	
III. THE PROTON-ATPase	
Some Basic Problems of Proton-ATPase: Chairman's Introduction	167
Erich Heinz	
On the Structure and Genetics of the Proton-Conducting F_0 of the ATP Synthase	175
Walter Sebald, Hans Ulrich Schairer, Peter Friedl, and Jürgen Hoppe	
Flow and Interactions of Protons in the H^+-ATPase of Mitochondria	187
S. Papa, F. Guerrieri, F. Zanotti, and R. Scarfò	
Membrane-Bound Inorganic Pyrophosphatase	199
Margareta Baltscheffsky and Pål Nyrén	
IV. LOCOMOTION, PHOTOTAXIS, AND CHEMOTAXIS IN PROKARYOTES	
Aneural Organisms as a Model System for the Study of Information Transduction in Biological Membranes	211
Norbert A. Dencher	
Bacterial Flagellar Rotation and Its Chemotactic Control	215
Howard C. Berg	
Genetic Demonstration of a Sensory Rhodopsin in Bacteria	221
John L. Spudich	
Photosensory Function of Retinal-Protein Pigments in <i>Halobacterium halobium</i>	231
Norbert A. Dencher	
Transduction of Chemical Signals in Dictyostelium Cells	237
G. Gerisch, A. Tsiomenko, J. Stadler, M. Claviez, D. Hülser, and C. Rossier	
V. ACETYLCHOLINE RECEPTORS	
Acetylcholine Receptors: Introductory Remarks	251
C. L. Bolis	
The Postsynaptic Domain in <i>Torpedo marmorata</i> Electric Organ: Molecular Architecture and Stabilization Mechanisms	255
Jean Cartaud, Catherine Kordeli, Hoang-Oanh Nghiê, and Jean-Pierre Changeux	
Dynamic Properties of the Acetylcholine Receptor	265
George P. Hess	
On the Mechanism of Cholinergic Excitation	279
Heino Prinz and Alfred Maelicke	
Cooperativity Between Acetylcholine-Receptor Channels	291
H. Schindler	

VI. RHODOPSIN—VISUAL TRANSDUCTION**Visual Transduction: Chairman's Introduction**

Wolfgang Junge 297

Early Steps in the Light-Triggered Activation of the Cyclic GMP**Enzymatic Pathway in Rod Photoreceptors**

Hermann Kühn 303

On the Transduction Mechanism in the Photoreceptor Cell of an Invertebrate, Studied by Single Photon Responses

Hennig Stieve 313

The Role of Calcium in Visual Transduction

U. Benjamin Kaupp 325

VII. MEMBRANES AND CYTOSKELETON**Signal Transmission via Receptors and Transducins: Remarks**

Ernst J.M. Helmreich 343

The Excitable Membrane of Phagocytic LeukocytesManfred L. Karnovsky, John A. Badwey, John T. Curnutte,
John M. Robinson, Charles B. Berde, and Morris J. Karnovsky 347**F-Actin Capping Proteins**

Hiroshi Maruta and Gerhard Isenberg 355

Modulation of Lymphocyte Deformability by Concanavalin AE.L. Elson, C. Pasternak, J.-I. Young, B. Daily, N.O. Petersen,
Y.I. Henis, and W.B. McConnaughey 365**Nuclear Envelope Permeability: A Sensitive Indicator of Pore Complex Integrity**

Iphigenie Lang and Reiner Peters 377

VIII. DISCUSSION OF SPECIALIZED TRANSPORT FUNCTIONS IN EPITHELIA**Discussion of Special Transport Functions in Epithelia:****Chairman's Introduction**

Gerhard Giebisch 389

Relationship Between Potassium Conductance and Transport in Renal Tubular Epithelium

Brian Cohen and Gerhard Giebisch 391

Regulatory Role of Calcium in Sodium Transport

G. Frindt and E.E. Windhager 403

Ca⁺⁺-Transporting ATPase of Rat Kidney Basal-Lateral Plasma Membranes

Piotr Gmaj, Mauro Zurini, Heini Murer, and Ernesto Carafoli 407

Mechanisms Involved in the Reabsorption of Salicylate in the Proximal Tubule of Rabbits

Laurent Schild and Francoise Roch-Ramel 417

The Isolated, Collapsed Cortical Collecting Tubule Viewed as a Basolateral Membrane Preparation

Larry C. Stoner and Ernest Natke, Jr. 423

Index 431
