

CONTENTS

INTRODUCTION	xvii
ABBREVIATIONS AND SYMBOLS	xix
 VI. BIOLOGICAL REGULATORS AND TOXINS	
72. Endocrine Organs and Hormones: Invertebrates	607
73. Comparative Anatomy of the Endocrine System: Vertebrates	612
74. Hormones: Vertebrates	630
75. Hypothalamic Releasing and Inhibiting Hormones: Vertebrates	658
76. Sex Hormones: Thallophytes	661
Part I. Algae	661
Part II. Fungi	665
77. Relative Activity of Growth Regulators: Plants	668
Part I. Cell Elongation of Oat Coleoptiles	668
Part II. Stem Curvature of Slit Pea and Leaf Expansion of Bean	670
78. Antimetabolites	671
79. Anticoagulants	676
Part I. Dosages: Mammals and Fowl	676
Part II. Interactions of Coumarin Drugs with Other Drugs	680
80. Chemicals Produced by Arthropods	680
Part I. Exocrine Defensive Substances	680
Part II. Nonexocrine Defensive Substances	693
Part III. Alarm Pheromones	694
Part IV. Attractant Pheromones	696
81. Animal Toxins	697
Part I. Reptiles	697
Part II. Toads	723
Part III. Marine Organisms	726
82. Higher-Plant Toxins	735
83. Mycotoxins	744
84. Neurotoxins: Man	747
85. Biocides	752
Part I. Antibiotics	752
Part II. Insecticides	756
Part III. Nematocides	760
Part IV. Fungicides	761
Part V. Herbicides	764
 VII. ENVIRONMENT AND SURVIVAL	
86. Temperature Tolerance: Man [<i>graphs</i>]	781
Part I. Heat and Cold Tolerance with and without Protective Clothing	781
Part II. Cold Tolerance with Adequate Body Insulation	782
Part III. Cold Tolerance in Water	782
87. Tolerance to Temperature Extremes: Animals	783
Part I. Mammals	783
Part II. Birds	791
Part III. Reptiles and Amphibians	794
Part IV. Fishes	799
Part V. Aquatic Invertebrates	803

88. Tolerance to Temperature Extremes: Plants	808
Part I. Minimum and Maximum: Freshwater Algae	808
Part II. Minimum and Maximum: Marine Algae	809
Part III. Minimum and Maximum: Lichens	810
Part IV. Minimum and Maximum: Mosses	811
Part V. Minimum and Maximum: Vascular Plants Other Than Fruit and Vegetable Crops	812
Part VI. Minimum: Fruit and Vegetable Crops	818
89. Lethal Temperatures: Invertebrates	822
Part I. Insects	822
Part II. Parasitic Helminths and Protozoa	828
90. Thermal Death: Rickettsia and Bacteria	833
91. Thermal Death: Nonpathogenic Bacteria	837
Part I. D Values	837
Part II. Minutes to Kill	842
Part III. Percent Destruction of Population	846
92. Thermal Death: Fungi	847
Part I. Animal Pathogens	847
Part II. Plant Pathogens	848
Part III. Suprophytes	850
93. Thermal Inactivation: Animal Viruses	853
94. Survival Time and Thermal Inactivation: Plant Viruses	857
95. Temperature Characteristics: Homoiothermic Animals	863
96. Responses to Changes in Ambient Temperature: Homoiothermic Animals	864
97. Temperature Regulation and Water Loss: Man	866
98. Metabolism and Temperature: Hibernating Mammals and Birds	870
99. Life Span and Temperature: Insects	873
100. Diapause: Mites and Insects	873
101. Dispersion of Small Organisms	875
Part I. Invertebrates	875
Part II. Viruses, Bacteria, and Fungi	882
Part III. Pollen and Seeds	885
102. Optimum Soil pH for Growth: Pinophytes and Magnoliophytes	889
103. Effect of Light on Development: Magnoliophytes	890
Part I. Wavelengths for Maximum Response	890
Part II. Light Exposure for Development	892
104. Photoperiod, with Temperature Interactions, for Flowering: Magnoliophytes	893
105. Vernalization Requirement for Flowering: Magnoliophytes	897
106. Factors Affecting Transpiration Rates: Magnoliophytes	902
Part I. Various Conditions	902
Part II. Variation in Soil Conditions for Corn	904
Part III. Diurnal Variation for Corn	905
Part IV. Annual Variation	906
Part V. Solutes	906
107. Factors Affecting Osmotic Potential: Plants	909
Part I. Root Solutions	909
Part II. Other Factors	916
108. Maximum Permissible Exposure to Ionizing Radiation: Man	920
Part I. Quality Factors	920
Part II. Dose Equivalent to Body Organs	921
Part III. Occupational Exposure Levels	922
Part IV. Concentrations of Radionuclides in Air, Water, and Bodies of Radiation Workers	922
109. Late Effects of Radiation: Mammals	934
110. Characteristics and Composition of the Atmosphere	941
Part I. Regional Temperatures	941
Part II. Ionospheric Characteristics	942
Part III. Chemical Composition of Dry Air	943
111. Chemistry of Air Pollutants	943
Part I. Classification	943
Part II. Products	944

112. Emission of Air Pollutants	945
Part I. Motor Vehicles and Gasoline Evaporation	945
Part II. Open Burning, Incineration, Combustion, and Selected Industrial Processes	946
113. Effects of Air Pollutant Inhalation on Mammals	948
Part I. Particulate Air Pollutants	949
Part II. Gas and Vapor Air Pollutants	967
Part III. Complex Air Pollutants	991
114. Effects of Low Concentrations of Sulfur Dioxide on Vascular Plants	996
Part I. Herbaceous Plants	996
Part II. Ligneous Plants	1008
115. Circadian Rhythms in Continuous Light and Darkness: Vertebrates	1015
116. Circadian Rhythms Under Constant Conditions and Effect of Alternating Light and Darkness: Invertebrates	1019
117. Period of Circadian Rhythms in Light and Darkness: Plants	1024
Part I. Fungi and Algae	1025
Part II. Magnoliophytes	1029
118. Circadian Rhythms of Physiological Variables as Reflected in Rat Bioassay	1039
Part I. Daily Variation	1039
Part II. Seasonal Variation	1045
119. Photoperiodic Control Mechanisms: Homoiothermic Animals	1047
Part I. Mammals	1047
Part II. Birds	1049

VIII. PARASITISM

120. External Parasites: Laboratory Animals	1053
121. Internal Parasites: Laboratory Animals	1055
122. Arthropod Parasites: Mammals and Birds	1059
123. Arthropod Pests: Plants and Plant Products	1064
124. Nematode Parasites: Plants	1069
125. Helminth and Protozoan Parasites: Mammals and Birds	1072
Part I. Man	1072
Part II. Homoiothermic Animals Other Than Man	1078
126. Viral Diseases: Animals	1082
127. Viral Diseases: Plants	1084
128. Rickettsial Parasites: Mammals and Birds	1092
129. Bacterial Parasites: Mammals and Birds	1093
130. Bacterial Parasites: Plants	1099
131. Fungal Parasites: Plants	1101
Part I. Field, Fruit, and Vegetable Crops	1101
Part II. Forest Trees	1113
132. Fungal Parasites: Man	1120
Part I. Superficial Mycoses	1120
Part II. Deep Mycoses	1122

IX. SENSORY AND NEURO- BIOLOGY

133. Brain: Man [<i>drawings</i>]	1127
134. Principal Nuclei of the Central Nervous System: Man	1128
135. Comparative Anatomy of the Central Nervous System: Major Invertebrate Phyla	1133
136. Systems of the Cerebellum: Mammals	1137
Part I. Afferent	1137
Part II. Efferent	1138
137. Reflex Actions of Spinal Motor Neurons: Mammals [<i>diagram</i>]	1139
138. Classification of Afferent Dorsal Root Fibers: Mammals	1141
Part I. Primary Receptor Units with Dorsal Root Fibers	1141
Part II. Cross-sectional Diameter, Conduction Velocity, and Correlated Functional Characteristics	1148
139. Autonomic Nervous System: Man [<i>drawing</i>]	1150

161. Age and Sex Differences in Scotopic Vision: Man	1267
162. Comparative Visual Pigment Absorption and Photobehavioral Action Spectra: Animals and Plants	1268
Part I. Visual Pigments: Vertebrates	1268
Part II. Visual Pigments: Arthropods and Mollusks	1269
Part III. Phototactic Spectral Response: Invertebrates and Plants	1270
163. Responses to Polarized Light: Animals	1272
Part I. Polarotaxis	1272
Part II. Electrophysiology	1281
Part III. Microspectrophotometry	1286
Part IV. Miscellaneous	1287
164. Responses to Polarized Light: Plants	1290
Part I. Movement of Cell Contents and Related Phenomena	1290
Part II. Phototropism, Polarotropism, and Induction of Polarity	1292
Part III. Miscellaneous	1295
165. Audible Sound Pressure Levels: Man	1296
Part I. Thresholds of Minimum Audibility: Otologically Normal Ears	1296
Part II. Thresholds of Minimum Audibility: Audiometric Systems	1301
Part III. Thresholds of Maximum Audibility	1302
166. Peripheral Nerve Conduction and Ultrasound: Vertebrates and Invertebrates [graph]	1303
167. Response of the Nervous System to Increased and Decreased Oxygen Level: Poikilothermic Vertebrates and Invertebrates	1304

APPENDIXES

Appendix I. Scientific Names and Corresponding Common Names	1309
Part I. Animals	1309
Part II. Plants	1323
Appendix II. Common Names and Corresponding Scientific Names	1328
Part I. Animals	1328
Part II. Plants	1341
