

Contents

Preface	xi
1 The cell and its environment	1
Cellular structure	1
The cell membrane	1
The nucleus	1
The cytoplasm	3
Chemical composition of the cell	4
Body fluid compartments	4
Composition of body fluids	5
Forces acting across membranes	5
Diffusion	5
Osmosis	6
The Donnan effect	7
Hydrostatic pressure	8
Active transport	8
Fluid balance between plasma and interstitial fluid	8
Fluid balance between cells and interstitial fluid	10
Regulation of acid-base balance	11
Maintenance of the internal environment	13
Negative feedback	15
2 Sense organs	17
Teleceptors	18
The eye	18
The ear	19
The sense of smell	22
Exteroceptors	22
The sense of taste	22
Cutaneous sense organs	23
Interoceptors	23
Chemoreceptors	23
Baroreceptors	24
Proprioceptors	24

3	The nervous system	25
	The reflex arc	25
	The brain	26
	The somatic nervous system	27
	The autonomic nervous system	27
	The nerve impulse	29
4	The endocrine system	33
	The pituitary gland	33
	Anterior lobe hormones	34
	Intermediate lobe hormones	36
	Posterior lobe hormones	36
	The thyroid gland	38
	The parathyroid gland and calcium metabolism	40
	Parathyroid hormone	41
	Vitamin D	42
	Calcitonin	42
	The adrenal gland	42
	Medullary hormones	43
	Glucocorticoids	44
	Mineralocorticoids	45
	Adrenal androgens	46
	The pancreas and blood glucose regulation	47
	Insulin	47
	Glucagon	49
	Interplay of factors influencing blood glucose	49
	Local hormones	50
5	The muscular system	53
	Skeletal muscle	53
	Muscular contraction	54
	Contraction of the whole muscle	56
	Smooth muscle	57
6	The cardiovascular system	60
	The heart	60
	The cardiac cycle	64
	Nourishment of the heart	65
	Regulation of heart function	65
	The peripheral circulation	66
	Principles of circulation	67

Regulation of blood circulation	68
7 The blood	71
Cellular components	71
Erythrocytes	73
Leucocytes	74
Thrombocytes	75
Blood plasma	75
Blood clotting	76
Lymph	77
Blood groups	77
8 The respiratory system	79
Mechanism of breathing	79
Respiratory volume and frequency	82
Control of respiration	83
Exchange of oxygen and carbon dioxide between air and blood	84
Transport of carbon dioxide	87
9 The urinary system	89
Anatomy of the kidney	89
Renal function	90
Filtration	90
Tubular function	91
Glomerular filtration rate	92
Clearance	93
Mechanisms of tubular reabsorption and secretion	93
Micturition	96
10 Food of domestic animals	97
Energy	97
Carbohydrates	98
Proteins and amino acids	100
Lipids	102
Minerals	103
Sodium	104
Chloride	105
Potassium	105
Calcium	105

Phosphorus	106
The calcium:phosphorus ratio	106
Magnesium	107
Iron	108
Copper	109
Cobalt	109
Iodine	110
Vitamins	110
Vitamin A	110
Vitamin D	111
Vitamin E	113
Vitamin K	113
Vitamin B ₁	113
Vitamin B ₂	113
Niacin	114
Vitamin B ₆	114
Pantothenic acid	114
Vitamin B ₁₂	115
Vitamin C	115
11 Digestion in simple-stomached animals	116
Mouth and pharynx	116
Stomach	118
Gastric emptying	120
Digestion	121
Digestive processes in the stomach	121
Digestion in the small intestine	122
Digestion in the large intestine	125
Defaecation	126
12 Digestion in ruminants	127
Prehension and mastication	128
Gastric movements in the ruminant	129
Rumination	130
Eructation	132
Separation of coarse from fine particles	132
The reticular groove	133
Movements of the omasum	133
The abomasum	134
The intestines	135

Microbial digestion in the rumen	135
Rumen bacteria	136
Cellulose- and hemicellulose-digesting bacteria	136
Starch-digesting bacteria	136
Soluble sugar-digesting bacteria	137
Protein-digesting bacteria	137
Rumen protozoa	137
Carbohydrate fermentation	137
Conversion of nitrogenous materials	138
Proteins and amino acids	139
Ammonia	140
Urea	140
Lipids	142
Results of rumen digestion	142
 13 Absorption and metabolism	 143
Absorption from the gastro-intestinal tract	143
Absorption of sodium	144
Absorption of potassium	145
Absorption of chloride	145
Absorption of sugars	146
Absorption of amino acids	146
Absorption of volatile fatty acids	146
Absorption of lipids	147
Absorption of water	147
Metabolism	148
Metabolism of protein and amino acids	148
Metabolism of lipids	149
Metabolism of carbohydrates	150
 14 Heat production and temperature regulation	 153
Energy metabolism	153
Direct calorimetry	153
Indirect calorimetry	153
Basal metabolism	155
Temperature regulation	156
Heat balance	157
Control mechanisms	157
Importance of environmental temperature in animal production	158

15 The reproductive system	160
Role of hormones in the reproductive process	160
Pituitary gonadotrophins	161
Testicular hormones	161
Regulation of testicular function	161
Ovarian hormones	162
Regulation of ovarian function	163
Spermatogenesis	164
Spermatozoa	164
Semen	165
Ejaculation of semen	167
Oogenesis	167
Oestrous cycle	169
Pro-oestrus	170
Oestrus	170
Metoestrus	170
Dioestrus	170
Fertilization	170
Pregnancy	172
Nourishment of the fetus	174
Proteins and amino acids	175
Carbohydrates, lipids and volatile fatty acids	175
Inorganic substances	175
Vitamins	175
Water	176
Oxygen and carbon dioxide	176
Endocrine mechanisms during pregnancy	177
Parturition	178
Pregnancy diagnosis	179
 16 Lactation	 181
Milk secretion	181
Initiation of lactation	181
Regulation of milk secretion	182
Milk ejection	184
Composition and synthesis of milk	185
Colostrum	185
Normal milk	185
Factors influencing milk production	187
Index	189
