

CONTENTS

Preface	v
The life and times of James Bonner	ix
Chapter 1 Histone conformation: predictions and experimental studies by G.D. Fasman, P.Y. Chou and A.J. Adler	1
Introduction	1
H1	3
Prediction of secondary structure	3
Other predictive schemes	8
Physico-chemical studies: correlation with predicted structure: optical rotatory dispersion (ORD), circular dichroism (CD) and nuclear magnetic resonance (NMR) studies	11
H2A	15
Prediction of the secondary structure	15
Other predictive schemes	15
Physico-chemical studies: correlation with predicted structure: ORD, CD, NMR	20
H2B	22
Prediction of secondary structure	22
Other predictive schemes	25
Physico-chemical studies: correlation with predicted structure: ORD, CD, NMR	26
H3	27
Prediction of secondary structure	27
Other predictive schemes	29
Physico-chemical studies: correlation with predicted structure: ORD, CD, NMR	29
H4	32
Prediction of the secondary structure	32
Other predictive schemes	34
Physico-chemical studies: correlation with predicted structure: ORD, CD, NMR	35
Conformational studies on histones in chromatin and whole histone mixtures	38
Chromatin	39
Histone-histone interactions	40
Speculation on histone-histone interactions	40
Summary	42
Acknowledgements	42
Appendix	42
Critique of predictive methods	42
Critique of interpretation of optical rotatory dispersion and circular dichroism data	43
Critique of NMR spectral data	44
Conformational parameters for helical and β -sheet residues based on 29 proteins	45
References	45

Chapter 2 Histones and chromatin structure

by E.M. Bradbury, R.P. Hjelm, B.G. Carpenter, J.P. Baldwin
G.G. Kneale and R. Hancock

53

Histones	53
Structural studies of chromatin	55
Neutron studies of deuterated chromatin	58
Neutron scatter from chromatin subunits	61
Histone H1	66
Concluding remarks	67
Acknowledgements	68
Note added in proof	68
References	69

Chapter 3 The dual structure of concentrated nucleohistone gels from different sources: a quantitative analysis of X-ray diffraction patterns
by J.A. Subirana, F. Azorin, J. Roca, J. Lloveras, R. Llopis
and J. Cortadas

71

Summary	71
Introduction	72
Experimental procedures	72
Calf thymus nucleohistone	74
Sea urchin nucleohistone	77
Nucleohistone depleted of H1: diffraction in the meridional direction	78
An analysis of the diffraction given by other samples	82
The dry state of nucleohistone	83
Nucleohistone depleted of H1: diffraction in the equatorial direction	84
The molecular structure of the globular component	87
Discussion	89
Acknowledgements	91
References	91

Chapter 4 Special features of the structure of H1 histones

by R.D. Cole

93

Acknowledgements	103
References	103

Chapter 5 Histone H5 in developing chick erythroid cells

by P.C. Huang, L.P. Branes, C. Mura, V. Quagliarello and
P. Kropkowski-Bohdan

105

Occurrence	105
Physico-chemical properties	107

Biological properties	111
Synthesis and turnover	114
Cellular studies	114
Specificity of the anti-H5 antibody	115
Quantification of the immunofluorescent assay	118
Histone H5 and chromatin structure	120
Histone H5 and DNA synthesis	120
Summary	122
Acknowledgement	122
Note added in proof	122
References	122

Chapter 6 The in situ distribution of *Drosophila* non-histone chromosomal proteins

by S.C.R. Elgin, L.M. Silver and C.E.C. Wu **127**

Abstract	127
Acknowledgements	140
References	140

Chapter 7 Evidence for the presence of contractile-like non-histone proteins in the nuclei and chromatin of eukaryotes

by A.S. Douvas, A. Bakke and J. Bonner **143**

Introduction	143
Methods for non-histone isolation	143
Rat liver	143
Slime mold	144
Results and discussion	145
Properties of contractile-like non-histones	145
Interspecies and intertissue homologies of non-histones	151
Possible contamination of chromatin proteins by extra-chromosomal contractile proteins	154
Quantitation of contractile-like proteins in chromatin	157
Summary	160
References	161

Chapter 8 Structural aspects of low molecular weight RNA and the implications of the 5' Cap for messenger RNA and protein synthesis

by H. Busch, D. Henning, F.W. Hirsch, M.S. Rao, T.S. Ro-Choi, W.H. Spohn and B.C. Wu **165**

Relationship of proteins to mRNA	167
The relationship of rRNA to mRNA	168
Methylated nucleotides	168
Isolation of low molecular weight nuclear RNA(s)	170

Unusual features of 'U-rich' RNA species	170
Two 3'-termini in U-rich RNA	171
U2 RNA sequence	171
The U1 RNA 5' terminus	172
The 5' terminus of U2 RNA	173
m ₃ ^{2,2} Guanylic acid	174
mRNA	174
Viral mRNA	175
Eukaryotic mRNA	175
Mechanism of synthesis of the 5'-Cap of mRNA	176
The role of the 5' terminal structure in translation	177
Rigid structural requirements for translational activity of mRNA	178
RNP particles	179
Comparison of nuclear and cytoplasmic mRNA	180
Profiles of mRNA readouts of cancer cells and other cells	183
Discussion	186
Acknowledgements	188
References	188
 Chapter 9 Structure of chromatin	
by R.D. Kornberg	195
References	197
 Chapter 10 Oligomers of the histones: an octamer of the four main types	
by J.O. Thomas	199
The histone octamer in chromatin	200
The proximity of histone octamers in chromatin	201
The arrangement of histones within the octamer	202
The histone octamer free in solution	203
The properties and stability of the octamer in solution. Is the free octamer an artifact of cross-linking?	203
Is the histone octamer unique and ubiquitous?	205
The possible fate/role of the histone core in replication	207
References	207
 Chapter 11 On new models for chromatin structure	
by A.L. Olins, J.P. Breillatt, R.D. Carlson, M.B. Senior, E.B. Wright and D.E. Olins	211
Introduction	211
Visualization of the chromatin subunits	212
Isolation and properties of chromatin v bodies	218

Internal structure of ν bodies	227
Higher order packing of ν bodies	230
Historical perspective	233
Acknowledgements	233
References	234
Chapter 12 The structural subunit of chromatin	
by K.E. van Holde, B.R. Shaw, K. Tatchell, J. Pardon, D. Worcester, J. Wooley and B. Richards	239
Some recent history: evidence leading to a subunit model for chromatin	239
Arrangement of DNA within the subunits	240
Overall structure and composition of the core particles	246
Internal structure of the core particles: localization of the DNA and protein	249
Summary	252
Node added in proof	252
References	253
Chapter 13 Organization of chromatin proteins	
by G. Felsenfeld, B. Sollner-Webb and R.D. Camerini-Otero	255
References	262
Chapter 14 On the use of psoralen cross-linkage in the study of chromatin structure	
by J.E. Hearst, C.-K.J. Shen and C.V. Hanson	265
Results	267
Acknowledgement	271
References	271
Chapter 15 The structure of condensed DNA: similarities between higher cells and bacteria	
by J.D. Griffith	273
Notes and acknowledgements	279
References	279
