PREFACE	xv

PART I. HISTORY OF RESEARCH ON HEARING

Chapter 1. Some Historical Notes on Research in Hearing

Edward C. Carterette

I. Introduction: From the Monochord to Electroacoustics	3
II. Frequency and Intensity Limits of the Ear	8
III. Timbre, Fusion, Noise, and Masking	10
IV. Auditory Localization	11
V. Frequency Analysis and Periodicity Detection	14
VI. Attributes, Scales, and Psychophysics	15
VII. The New Physiology of Hearing	16
VIII. Auditory Theory	20
IX. Hearing, Perceiving, Analyzing, and Synthesizing Speech	27
References	34

Chapter 2. History of Research on Hearing

Earl D. Schubert

I. Introduction	41
II. Pinna	44
III. Middle Ear	45
IV. The Cochlea	50
V. The Question of Nonlinearity	54
VI. Threshold and Detection	57
VII. Loudness	59
VIII. Masking	63
IX. Timing Information	65

X. Binaural Phenomena	70
XI. Auditory Theory	73
References	75

PART II. MEASUREMENT, BIOPHYSICS OF THE COCHLEA, AND NEURAL CODING

Chapter 3. Measurement of the Auditory Stimulus

Barry Leshowitz

I. Introduction	84
II. Harmonic Motion	84
III. Propagation of Sound	87
IV. Measurement of Sound Intensity	89
V. System Performance	93
VI. Introduction to Linear Filters	97
VII. The Linear-Time-Invariant System	100
VIII. Mathematical Representation of Signals	104
IX. Response of an LTI System to a Unit Impulse Function	116
X. Random Signals	118
XI. Nonlinear Systems	122
References	123

Chapter 4. Biophysics of the Cochlea

Peter Dallos

I. Anatomy	125
II. Cochlear Mechanics	131
III. Transducer Processes	146
IV. Addendum	160
References	160

Chapter 5. The Neural Code

I. C. Whitfield

I. Introduction	163
II. The Auditory Nerve	164
III. The Coding of Intensity	168
IV. The Coding of Pitch	170
V. The Squaring Process	170
VI. Complex Tones	172
VII. Critical Bands	172
VIII. Two-Tone Inhibition	174

IX. Centrifugal Influence	175
X. The Pitch of Complex Tones	176
XI. Temporal Factors in Coding	177
XII. Temporal Coding and Localization	181
References	182

PART III. ANALYZING MECHANISMS OF FREQUENCY, INTENSITY, TIME, AND PERIOD

Chapter 6. Loudness

Bertram Scharf

I. Introduction	187
II. Intensity	188
III. Spectrum	195
IV. Time	204
V. Background	212
VI. Listener	215
VII. Physiological Correlates of Loudness	222
VIII. Models of Loudness	224
IX. Meaning of Loudness	227
References	234

Chapter 7. Frequency and Periodicity Analysis

Jan O. Nordmark

I. Nature of the Auditory Stimulus	243
II. The Selectivity of the Ear	249
III. Interaction Phenomena	257
IV. Periodicity Pitch	262
V. Perception of a Complex Sound as a Whole	271
References	278

Chapter 8. Masking: Experimental and Theoretical Aspects of Simultaneous, Forward, Backward, and Central Masking

J. J. Zwislöcki

I. Introduction	283
II. Experimental Results	285
III. Some Theoretical Considerations	324
References	333

Chapter 9. Auditory Masking

Roy D. Patterson and David M. Green

I. Introduction	337
II. Noise Masking	339
III. Auditory Filtering	341
IV. Predicting Tone-in-Noise Data	348
V. Sinusoidal Masking	353
VI. Summary	358
References	359

PART IV. BINAURAL AND SPATIAL HEARING

Chapter 10. Binaural Phenomena

Nathaniel I. Durlach and H. Steven Colburn

I. Introduction	365
II. Interaural Differences	368
III. Perceptual Attributes of the Binaural Image Space	373
IV. Sensitivity	413
References	455

Chapter 11. Models of Binaural Interaction

H. Steven Colburn and Nathaniel I. Durlach

I. Introduction	467
II. Count-Comparison Models	468
III. Interaural-Difference-Detector Models	474
IV. Noise-Suppression Models	481
V. Cross-Correlation Models	488
VI. Auditory-Nerve-Based Model	498
VII. Overview	503
References	515

PART V. PSYCHOLOGY OF MUSIC**Chapter 12. Musical Acoustics***Jean-Claude Risset*

I. Introduction	521
II. Music, Hearing, and Perception	522
III. Musical Instruments	539
IV. Musical Reproduction	546
V. Synthetic and Electronic Music	548
References	554

PART VI. STRESS, TRAUMA, AND PATHOLOGY**Chapter 13. Effects of Hearing Impairment on the Auditory System***Donald D. Dirks*

I. Historical Perspective	567
II. Basic Considerations	569
III. Differential Diagnosis of Auditory Disorders	572
IV. Handicapping Influence of Hearing Loss	598
V. Concluding Remarks	603
References	603
Suggested Readings in Hearing Aid Amplification	608

Chapter 14. Effects of Noise on People*J. D. Miller*

I. Introduction	609
II. Auditory Effects	611
References	639

Chapter 15. General Psychological and Sociological Effects of Noise

J. D. Miller

I. Introduction	641
II. Interference with Sleep	642
III. Loudness, Perceived Noisiness, and the Quality of Auditory Experience	652
IV. Annoyance and Community Response	658
V. Other Possible Psychological and Sociological Effects	669
References	672

Chapter 16. General Physiological Effects of Noise

J. D. Miller

I. Introduction	677
II. Transient and Possible Persistent Physiological Responses to Noise	677
III. Stress Theory, Health, and Noise	681
IV. Conclusions	683
References	684

AUTHOR INDEX	687
SUBJECT INDEX	703
