Contributors	v
Foreword	
James R. Rosowski and Bruce C. Parker	viii
In Appreciation	ix
Acknowledgment of Reprinted Papers	x
I. THEMATIC SECTIONS	
A. Taxonomy, Morphology and Life Histories	
1. Taxonomy, Morphology and Life Histories of Algae: Introduction to Selected Papers	
Michael D. Guiry and George J. Schumacher	1
a. Parasitic, amoeboid dinoflagellates	
L. A. Pfister and J. Popovský	3
b. Influence of nitrogen source on morphology of Rivulariaceae (Cyanophyta)	
C. Sinclair and B. A. Whitton	5
c. Biosystematic studies of the red algal genus <u>Eucheuma</u> . I. Electrophoretic variation among Florida populations	
D. P. Cheney and G. R. Babbel	10
d. Culture and hybridization studies on <u>Gigartina papillata</u> (Rhodophyta)	
A. R. Polanshek and J. A. West	24
e. Physiological and biochemical contributions to the taxonomy of the genus <u>Chlorella</u>	
E. Kessler	33
f. The position of cyanobacteria in the world of phototrophs	
R. Y. Stanier	37
g. Pigment composition, photosynthesis and fine structure of a non-blue-green prokaryotic algal symbiont (<u>Prochloron</u> sp.) in a didemnid ascidian from Hawaiian waters	
N. Withers, W. Vidaver and R. A. Lewin	47
h. Cyanobacteria (blue-green algae) under the bacteriological code? An ecological objection	
S. Golubic	49
i. Naming the blue-greens	
R. A. Lewin	51
j. Proposal to place the nomenclature of the cyanobacteria (blue-green algae) under the rules of the international code of nomenclature of bacteria	
R. Y. Stanier, W. R. Sistrom, T. A. Hansen, B. A. Whitton, R. W. Castenholz, N. Pfennig, V. N. Gorlenko, E. N. Kondratieva, K. E. Einhjellen, R. Whittenbury, R. L. Gherna and H. G. Trüper	51
k. Formal taxonomic treatment of cyanophytes	
R. A. Lewin	52
l. The life history of <u>Palmaria palmata</u> in culture. A new type for the Rhodophyta	
J. P. van der Meer and E. R. Todd	53
m. Culture studies on complanate and cylindrical <u>Scytosiphon</u> (Fucophyceae, Scytosiphonales) from Greenland	
P. M. Pedersen	57
n. The taxonomy and classification of the diatom genus <u>Melosira</u> C. Ag. I. The type species <u>M. nummuloides</u> C. Ag.	
R. M. Crawford	61

2. Taxonomy, Morphology and Life Histories of Freshwater Algae: Introduction and Bibliography	
F. R. Trainor and Lois A. Pfister	69
3. Taxonomy, Morphology and Life Histories of Marine Algae: Introduction and Bibliography	
Steven N. Murray and Geoffrey L. Leister	75
B. Ultrastructure	
1. Ultrastructure of Algae: Introduction to Selected Papers	
Gary L. Floyd and Lynda J. Goff	81
a. Light and electron microscopic observations on cell division in two large pennate diatoms, <u>Hantzschia</u> and <u>Nitzschia</u> . II. Ultrastructure	
J. D. Pickett-Heaps, D. H. Tippit and R. Leslie	83
b. Ultrastructural aspects of basal body associated fibrous structures in green algae: a critical review	
M. Melkonian	98
c. Development and germination of akinetes of <u>Aphanizomenon flos-aquae</u>	
R. B. Wildman, J. H. Loescher and C. L. Winger	117
d. Observations on the symbiosis of <u>Peridinium balticum</u> and its intracellular alga. I. Ultrastructure	
R. N. Tomas and E. R. Cox	125
e. Probing phycobilisome structure by immuno-electron microscopy	
E. Gantt and C. A. Lipschultz	145
f. Microtubule biogenesis and cell shape in <u>Ochromonas</u> . I. The distribution of cytoplasmic and mitotic microtubules	
G. B. Bouck and D. L. Brown	153
g. Visualization of particle complexes in the plasma membrane of <u>Micrasterias denticulata</u> associated with the formation of cellulose fibrils in primary and secondary cell walls	
T. H. Giddings, Jr., D. L. Brower and L. A. Staehelin	162
h. Fine structure and development of sieve tubes in <u>Laminaria groenlandica</u> Rosenv.	
K. Schmitz and L. M. Srivastava	169
i. The ultrastructure of fertilization in <u>Chlamydomonas moewusii</u>	
R. E. Triemer and R. M. Brown, Jr.	179
2. Ultrastructure of Microalgae: Introduction and Bibliography	
Karl R. Mattox and Barry S. C. Leadbeater	185
3. Ultrastructure of Macroalgae: Introduction and Bibliography	
Joseph Scott and Michael Neushul	191
C. Physiology and Biochemistry	
1. Physiology and Biochemistry of Algae: Introduction to Selected Papers	
Joseph C. O'Kelley, Johan A. Hellebust and Arthur Linkins	202
a. Influence of environmental factors and population composition on the timing of cell division in <u>Thalassiosira fluviatilis</u> (Bacillariophyceae) grown on light/dark cycles	
S. W. Chisholm and J. C. Costello	204
b. Cell wall glycoproteins from <u>Chlamydomonas reinhardtii</u> , and their self-assembly	
J. W. Catt, G. J. Hills and K. Roberts	212
c. Light-induced changes in allophycocyanin	
I. Ohad, H-j. A. W. Schneider, S. Gendel and L. Bogorad	220

d. Photosynthetic characteristics and organization of chlorophyll in marine dinoflagellates B. B. Prézélin and R. S. Alberte	227
e. Nitrogenous nutrition of marine phytoplankton in nutrient-depleted waters J. J. McCarthy and J. C. Goldman	231
f. L-Glutamic acid as a mediator of sexual morphogenesis in <u>Volvox capensis</u> R. C. Starr, R. M. O'Neil and C. E. Miller III	234
g. Gas vesicles A. E. Walsby	238
h. Photosynthetic components and activities of nitrogen-fixing isolated heterocysts of <u>Anabaena cylindrica</u> E. Tel-Or and W. D. P. Stewart	244
i. Turgor pressure regulation: modulation of active potassium transport by hydrostatic pressure gradients D. F. Hastings and J. Gutknecht	257
j. Lipid biosynthesis in the marine flatworm <u>Convoluta roscoffensis</u> and its algal symbiont <u>Platymonas convoluta</u> H. Meyer, L. Provasoli and F. Meyer	260
k. A photoperiodic response mediated by blue light in the brown alga <u>Scytosiphon lomentaria</u> M. J. Dring and K. Lüning	268
l. Morphological control and physiology of <u>Scenedesmus</u> strain 170 P. A. Siver and F. R. Trainor	272
2. Physiology and Biochemistry of Algae: Introduction and Bibliography Ian Morris and W. Marshall Darley	278
xiv D. Cytology and Genetics	
1. Cytology and Genetics of Algae: Introduction to Selected Papers Karen VanWinkle-Swift and Joan G. Stewart	288
a. Transformation in <u>Agmenellum quadruplicatum</u> S. E. Stevens, Jr. and R. D. Porter	291
b. Transcription program of the chloroplast genome of <u>Euglena gracilis</u> during chloroplast development B. K. Chelm, R. B. Hallick and P. W. Gray	296
c. Organization of the chloroplast ribosomal RNA genes of <u>Euglena gracilis</u> <u>bacillaris</u> R. B. Helling, M. R. El-Gewely, M. I. Lomax, J. E. Baumgartner, S. D. Schwartzbach and W. E. Barnett	301
d. Physical evidence for recombination of chloroplast DNA in hybrid progeny of <u>Chlamydomonas eugametos</u> and <u>C. moewusii</u> C. Lemieux, M. Turmel and R. W. Lee	311
e. Transmission of chloroplast alleles in somatic fusion products obtained from vegetative cells and/or "gametes" of <u>Chlamydomonas reinhardi</u> R. F. Matagne	318
f. Parasexually produced hybrids between female and male plants of <u>Griffithsia tenuis</u> C. Agardh, a red alga S. D. Waaland	324
g. Population genetics of <u>Skeletonema costatum</u> (Bacillariophyceae) in Narragansett Bay J. C. Gallagher	327
h. Hybridization of <u>Macrocystis</u> (Phaeophyta) with other float-bearing kelps Y. Sanbonsuga and M. Neushul	338

i. Genetic analysis in the dinoflagellate <u>Cryptothecodinium</u> (<u>Gyrodinium</u>) <u>cohnii</u> : evidence for unusual meiosis M. Himes and C. A. Beam	349	
j. Karyological studies on the genus <u>Oedogonium</u> Link (Oedogoniales, Chlorophyceae) S. Srivastava and Y. S. R. K. Sarma	353	
k. The biology of <u>Harveyella mirabilis</u> (Cryptonemiales, Rhodophyceae). I. Cytological investigations of <u>Harveyella mirabilis</u> and its host, <u>Odonthalia</u> <u>floccosa</u> L. J. Goff and K. Cole	357	
l. Genetic control of morphogenesis in two varieties of <u>Antithamnion plumula</u> (Rhodophyceae, Ceramiales) J. Rueness and M. Rueness	362	
m. A preliminary genetic investigation of <u>Volvox carteri</u> R. J. Huskey, B. E. Griffin, P. O. Cecil and A. M. Callahan	364	
n. Haploid meiosis as a regular phenomenon in the life cycle of <u>Ulva mutabilis</u> R. C. Hoxmark and Ø. Nordby	372	
o. Genetics of <u>Gracilaria tikvahiae</u> (Rhodophyceae). VI. Complementation and linkage analysis of pigmentation mutants J. P. van der Meer	377	
p. Visualization of chloroplast DNA with two fluorochromes A. W. Coleman	380	
2. Cytology and Genetics of Algae: Introduction and Bibliography Kathleen M. Cole and C. Shields Gowans	383	
E. Ecology		
i. Ecology of Algae: Introduction to Selected Papers Mark M. Littler and Frank E. Round	392	XV
a. Blue-green algae: their excretion of iron-selective chelators enables them to dominate other algae T. P. Murphy, D. R. S. Lean and C. Nalewajko	394	
b. Sulphide-dependent anoxygenic photosynthesis in the cyanobacterium <u>Oscillatoria limnetica</u> Y. Cohen, B. B. Jørgensen, E. Padan and M. Shilo	396	
c. Enhancement of algal growth and productivity by grazing zooplankton K. G. Porter	398	
d. Enrichment of surface freshwater microlayers with algae B. C. Parker and R. F. Hatcher	401	
e. Ecological competition between algae: experimental confirmation of resource- based competition theory D. Titman	405	
f. Evolution of phosphorus limitation in lakes D. W. Schindler	408	
g. Life-forms of phytoplankton as survival alternatives in an unstable environment R. Margalef	411	
h. Seaweeds: their productivity and strategy for growth K. H. Mann	428	
i. Preferential feeding: an optimization strategy in sea urchins R. L. Vadas	434
