II. DIVISIONAL SECTIONS

A. Cyanophyta

Bibliography on Cyanophyta	Norma J. Lang 754 J. Robert Waaland
Phycology in the field and in the laboratory	18
The biotic relationships within water blooms	26
A composite rating of algae tolerating organic pollution	33
Life at high temperatures	38 xix
Isolation and culture of terrestrial and fresh-water algae of Antarctica	46
Airborne algae: their abundance and heterogeneity	55
Meteorological conditions affecting the dispersal of airborne algae and protozoa	58
Facultative heterotrophy in certain soil algae from the ecological viewpoint	80
Contributions of current research to algal systematics	87
Some aspects of the taxonomy of soil algae	124
Frequent heterocyst germination in the blue-green alga <u>Gloeotrichia Ghosei</u> , Singh.	164
Evidence of a role of heterocysts in the sporulation of a blue- green alga	171
Granules associated with the chloroplast lamellae of <u>Porphyridium cruentum</u>	371
Gas vacuole development in a blue-green alga	383
Structures in a blue-green alga resembling prolamellar bodies	388
Sexuality in a blue-green alga: genetic recombination in <u>Anacystis nidulans</u>	489
Evidence for genetic transformation in blue-green alga <u>Anacystis</u> <u>nidulans</u>	491
Genetic control of sporulation in the blue-green alga <u>Anabaena</u> <u>doliolum</u> Bharadwaja	495
The gross classification of algae	571
Acetylene reduction by nitrogen-fixing blue-green algae	616
