

Contents

1 The Nature of Psychology

Conceptual Approaches to Psychology	4
Scope of Contemporary Psychology	11
Research Methods	16
Measurement in Psychology	20
Overview of the Book	23

2 Biological Basis of Behavior

Basic Units of the Nervous System	30
Organization of the Nervous System	34
Hierarchical Structure of the Brain	36
Cerebral Cortex	42
A Divided Brain	45
Autonomic Nervous System	51
Endocrine System	53
Genetic Influences on Behavior	54

3 Psychological Development

Factors Governing Development	64
Early Years	67
Cognitive Development	70
Personality and Social Development	76
Identification	84
Adolescence	88
Search for Identity	91
Development as a Lifelong Process	94

2 PART ONE Psychology as a Scientific and Humanistic Endeavor

28 PART TWO Biological and Developmental Processes

62

PART THREE

Perception and Consciousness

4 Sensory Processes

102

Some General Properties of the Senses	103
The Visual Sense	108
The Auditory Sense	118
The Other Senses	123

5 Perception

128

Object Perception and Perceptual Constancies	130
Organization and Perception	133
Perceptual Hypotheses	136
Movement Perception	137
Depth Perception	139
Visual Coding and Pattern Recognition	141
Role of Learning in Perception	144
Attention and Perception	147
Extrasensory Perception	150

6 Consciousness and Control

156

Consciousness: What It Is and What It Does	157
Divided Consciousness	162
Sleep and Dreams	165
Meditation	171
Effects of Psychoactive Drugs on Consciousness	172
Hypnotically Produced Changes in Consciousness	177
Psychology and the Miraculous	182

7 Conditioning and Learning

190

Classical Conditioning	192
Operant Conditioning	197
Principle of Reinforcement	204
Cognitive Learning	208
Individualizing Learning	213

8 Remembering and Forgetting

220

by Edward E. Smith, Stanford University

Basic Distinctions About Memory	221
Short-Term Memory	222

PART FOUR

Learning, Remembering, and Thinking

Long-Term Memory	227
Improving Memory	238
The Relation Between Short- and Long-Term Memory	241
Constructive Memory	245

9 Language and Thought **250**

by Edward E. Smith, Stanford University

Concepts	251
Communicating Thoughts	257
Development of Language	262
Visual Thinking	271
Problem Solving and Computer Simulation	274

10 Basic Drives and Motives **280**

Development of Motivational Concepts	281
Hunger	286
Obesity	292
Thirst	297
Sex	300
Other Basic Motives	308
Current Status of Motivational Concepts	311

11 Human Motivation and Emotion **314**

Theories of Motivation	316
Motivational Factors in Aggression	319
Emotion	329
Emotional Expression	339
Emotions as Adaptive and Disruptive	341

12 Mental Abilities and Their Measurement **346**

Testing Aptitudes and Achievements	347
Tests of General Intelligence	349
Nature of Human Abilities	356
Age Changes in Intelligence	361
Genetic and Environmental Determinants of Intelligence	363
Extremes of Intelligence	368
Present Status of Ability Tests	371

PART FIVE Motivation and Emotion

PART SIX Personality and Individuality
