

Contents

Part One Man Studies Himself

1 *What Psychology Is and Does* 2

- The Roots of Psychology 3
 - Early Attempts at Explanation • Renaissance Science • The Mind-Body Problem • Experimental Physiology • Psychophysics • The Early Days of Psychology • Psychology Defined • Psychology and Other Sciences
- The Three Faces of Psychology 10
 - The Teaching of Psychology • The Application of Psychology • Research in Psychology
- Observation and Description in Psychology 20
 - Kinds of Observation • Observation and the Uncertainty Principle • Operational Definitions • Logical Constructs
- Methods of Study 24
 - Field-Study Method • Life-History Methods • Survey Method • Experimental Method • Statistical Control and Analysis • How Methods Supplement Each Other
- Chapter Summary 35

2 *The Biological Bases of Behavior* 38

- Behavior As Adjustment 39
 - Man Functions As a Whole in Adjusting • The Organs of Adjustment • Stimulus, Organization, Response, and Feedback
- The Bases of Neural Functioning 41
 - The Sensory-Motor Arc • The Neuron
- Reflex Action 49
 - The Disturbing System of the Spinal Cord • The Adaptive Nature of Reflexes • Inhibition and Reciprocal Innervation
- The Brain—"The Great Ravelled Knot" 53
 - How Scientists Study the Brain • Main Parts of the Brain • Localization of Function in the Cerebrum
- The Endocrine System 62
 - The Pituitary • The Thyroids • The Adrenal Glands • The Gonads
- Chapter Summary 64

Part Two How and Why People Differ

3 *The Development of Behavior* 68

- Determiners of Development 69
 - Heredity and Maturation • Environment and Learning • The Question of Instinct
- The Mechanisms of Heredity 74
 - The "Threads of Life" • Similarities and Differences in Families • Dominance and Recessiveness • Sex Determination • Studying Twins
- Inherited Structures 77
 - The Nervous System • The Muscles • The Endocrine Glands
- The Course of Maturation 82
 - The Physiological Gradient • Motor Primacy • Individuation
- Prenatal Development 83
 - Stages of Prenatal Development • Techniques for Studying Fetal Behavior • Characteristics of Fetal Behavior • Effects of Unfavorable Prenatal Conditions
- Development During Infancy 88
 - Physical Structure • Sensory Capability • Responsive Capability • Early Social Development • Speech Responses
- The Influence of Environment 93
 - The Effects of an Impoverished Environment • The Effects of an Enriched Environment • Developmental Tasks
- The Growth and Decline of Human Abilities 104
 - The Prime of Life • Methods of Studying Growth and Decline
- Chapter Summary 108

4 *Clinical Approaches to Personality* 110

- The Meanings of Personality 111
 - Personality As Social Stimulus Value • Personality As Selfhood • Personality As a Complex of Interacting Traits

The Role of Theory in Understanding Personality	112
Types of Explanation • Approaches to the Explanation of Personality	
Body-Type Theories of Personality	114
Phrenology • Physiognomy • Somatotypes	
Expressive Behavior As a Clue to Personality	117
Graphology • Other Forms of Expressive Behavior	
Personality Theory Today	119
Psychoanalytic Theories • The Analytic Theory of Jung • Adler's Individual Psychology • Organismic and Self-Actualization Theories • Stimulus-Response Theories of Personality	
Clinical Methods of Studying Personality	128
The Interview • Clues from Projective Devices	
Chapter Summary	134

5 *Psychometric Approaches to Personality* 136

What Makes a Good Measuring Instrument?	137
Validity • Reliability • Objectivity • Standardization • Types of Measuring Devices	
Interpreting Scores	139
The Normal Distribution • Measures of Central Value • Measures of Variability • Percentiles • Correlation	
Approaches to Personality Measurement	145
The Philosophical Approach • The Factor-Analytic Approach	
Quantitative Devices for Personality Assessment	149
Rating Scales • Behavior Sampling • Self-Inventories	
Traditional Means of Testing Intelligence	153
Binet's Early Scale • The Stanford Revisions • Performance Tests • The WAIS and the WISC • The Meaning of IQ in Terms of Behavior • Does the IQ Remain Constant?	
Primary Mental Abilities	161
Factor Analysis • Guilford's Structure of Intellect	
The Determinants of Intelligence	165
The Relative Contributions of Heredity and Environment • The Influence of Culture • Life Conditions Influencing Intelligence	
Other Abilities	170
Psychomotor Abilities • Athletic Ability • Musical Ability • Artistic Ability	
Understanding the Whole Person	174
Profiles • The Meeting of the Ways	
Chapter Summary	176

Part Three How People Change Through Learning

6 *Defining and Measuring Learning and Retention* 180

Kinds of Learning	181
Conditioning • Discrimination Learning • Imprinting • Verbal Learning • Motor Skill Learning • Mixed Learning Tasks • Attitude Learning	
Neural Bases of Learning	200
Chemical Coding: Breakthrough or Interesting Speculation? • Where Does Learning Take Place in the Brain? • Mechanisms of Memory Storage	
Measuring Learning	203
Criteria of Learning • Learning Curves	
Measuring Retention and Forgetting	209
The Method of Recall • The Method of Recognition • The Method of Relearning • The Course of Forgetting • Do We Ever Forget Completely?	
Major Theories of Learning	214
Hull's Formal Theory of Learning • Skinner's Approach to Learning • Watson and Behaviorism • Guthrie and Contiguity Theory • Thorndike's Reinforcement Theory • Cognitive Theories of Learning • Current Trends in Theories of Learning	
Chapter Summary	218

7 *The Management of Learning and Retention* 220

Influence of Motivation on Learning	221
Strength of Motivation • Intent to Learn • Reward vs. Punishment • Extrinsic and Intrinsic Motivation • Stress	
Characteristics of the Material to Be Learned	225
Amount • Meaningfulness	
Influence of Prior Learning	227
Positive Transfer • Negative Transfer	
Conditions of Efficient Practice	229
Knowledge of Results • Distribution of Practice • Conceptualization and Verbalization in Motor Learning • Reading vs. Recalling • Whole vs. Part Learning • Guidance As an Aid to Learning	
Learning Under Special Conditions	239
Hypnosis • Subliminal Stimulation • Sleep • Radiation	

- Ability to Learn and Remember 243
Is There an "All-round" Ability to Learn and Remember? • Do Slow Learners Remember Better? • Can Ability Be Increased Through Learning? • How Does Learning Ability Change with Age?

- What Makes Us Forget? 248
Inadequacy of Original Learning • The Importance of Review • Interference from Later Activity • Meaningfulness and Forgetting • Emotional and Motivational Factors • Social Factors

- Chapter Summary 253

Part Four Knowing The World

8 Stimulation and Sensation 256

- General Characteristics of Sensation 257
Stimulus Intensity and the Limen • Sensory Adaptation • Retention of Sensory Experience

- Vision—The Sense of Sight 259
How Our Eyes Work • Visual Acuity • Color Vision • Color Blindness

- Hearing—The Sense of Sound 277
Physical and Psychological Bases of Sound • The Hearing Mechanism • Deafness

- The Somatic Senses 283
Pressure • Pain • Cold and Warmth • The Kinesthetic Sense • The Labyrinthine Sense • Somesthesia and the Brain

- The Chemical Senses 289
The Olfactory Sense • The Gustatory Sense

- Chapter Summary 292

9 Observation and Action 294

- Attention 295
Aspects of Attention • Role of the Central Nervous System • The Direction of Attention • The Shifting of Attention • The Problem of Distraction

- Perception 300
Factors in the Stimulus Field • Characteristics of the Perceiver • Social Factors • Accuracy of Perception • Interaction of the Senses

- The Perception of Space 314
Visual Perception of Stationary Objects • Experiments with Visual Distortion • Visual Perception of Motion • Locating Stationary Sounds in Space

- The Perception of Time 321
Estimating Intervals of Time • Factors Affecting Perception of Time

- Reaction Time 324
Measuring Reaction Time • Factors Influencing Our Speed of Reaction • Perception and Vigilance

- Perception Under Unusual Conditions 328
Perceptual Changes After Prolonged Sensory Deprivation • Extrasensory Perception

- Chapter Summary 332

10 Thinking and Deciding 334

- Kinds of Thinking 335
Autistic Thinking • Realistic Thinking • Simple Forms of Thinking

- The Mechanics of Thinking 338
The Role of the Brain • Muscular Activity in Thinking • The Importance of Sensory Feedback • Cybernetics

- Tools in Thinking 342
Imagery in Thinking • Language in Thinking • Concepts in Thinking

- Solving Problems 352
Trial and Error • Insight • Steps in Problem Solving • Problem Solving as "Gap Filling" • Structures • Decision Making • Individual Factors in Problem Solving

- Creativity 367
Characteristics of Creative People • Can Creativity Be Improved by Training?

- Information Theory 369
Parts of a Communication System • Signals and Noise • Feedback in Communication

- Chapter Summary 371

Part Five Adjustment and Maladjustment

11 Motivation and Drive 374

- Goal-Directed Behavior 375
Explanation of Motivation • Effects of Motivation on Behavior • Patterns of Motivation

- Biological Drives 378
Measurement of Biological Drives • The Hunger Drive • The Thirst Drive • Air Hunger • Fatigue and the Need for Sleep • Warmth and Cold As Drives •

The Sexual Drive • Pain As a Drive • Bowel and Bladder Tensions • The Need for Contact Comfort • Biological Drives As Homeostatic Mechanisms

Psychological Motivation 395

Curiosity—The Need to Investigate • The Need to Achieve • The Power of Symbolic Rewards • The Importance of Models • Motivation and Work

Chapter Summary 412

12 Emotion

414

Aspects of Emotion 415

Emotion As Conscious Experience • Emotion As Energizer

The Expression of Emotion 417

Expression and Interpretation • Patterns of Overt Behavior in Emotion

Physiological Changes During Emotion 423

Glandular Responses • The Galvanic Skin Response • Pupillometrics • Do the Physiological Changes Constitute the Emotion?

The Role of the Nervous System in Emotion 428

The Autonomic or Visceral Nervous System • Centers of Emotion in the Brain

Emotions and Health 435

Psychosomatic Reactions • The General-Adaptation-Syndrome • Pleasant Emotions and Health

How Emotions Develop 442

Early Experimental Findings • Maturation and Learning in Emotional Development • Emotional Development in Childhood • Emotional Behavior During Adolescence • Adulthood and Emotional Maturity • Emotional Problems of Old Age

Adjustment in Marriage 453

Choosing a Marriage Partner • Factors in Marital Happiness

Chapter Summary 458

13 Reactions to Frustration

460

Kinds of Frustration 461

Environmental Frustrations • Personal Frustration • Conflict Frustration

The Dynamics of Frustration 463

The Motivational Nature of Frustration • Ego-Involvement

Defensive Reactions to Frustration 463

Aggressive Reactions • Withdrawal Reactions • Compromise Reactions

Neurotic Reactions 475

Anxiety Reactions • Phobic Reactions • Obsessive-Compulsive Reactions • Dissociative Reactions • Conversion Reaction • Asthenic Reaction • Depressive Reaction

Psychotic Reactions 485

Characteristics of the Functional Psychoses • Origins of Psychotic Behavior • Experimental Study of Psychotic Behavior

Alcohol, Drugs, and Gambling 494

Alcoholism • Drug Addiction • Compulsive Gambling

Chapter Summary 498

14 Mental Health and Therapy 500

The Mental Health Movement 501

Changing Attitudes Toward Mental Illness • Prophylaxis • Recognition of Psychotherapy

Major Approaches to Psychotherapy 508

Directive Counseling • Client-centered Therapy • Psychoanalytic Therapy • Existential Psychotherapy • Action (Behavior) Therapy • Integrity Therapy • Briefer Forms of Psychotherapy • Special Techniques in Therapy • Common Characteristics of Different Methods • Evaluating Psychotherapy

Physical Methods of Therapy 527

Shock Therapy • Narcosis • Chemotherapy • Nutrition in Therapy • Psychosurgery

The Eclectic Approach 535

Institutional Care • Socioterapy • Trends and Prospects

Chapter Summary 539

Part Six Psychological Factors in Social Living

15 The Individual and the Group

542

Competition and Cooperation 543

Is There an "Instinct" of Competition? • Effects of Competition and Cooperation • Planning for Effective Competition

Individual vs. Group Action 551

Social Facilitation • Social Interaction • The "Risky Shift"

Factors in Small-Group Functioning 552

Composition of the Group • Patterns of Communication and Organization • The Effects of Status • Group Participation in Decision Making • Group Pressures on the Individual

Effective Leadership 562

Responsibilities of a Leader • Styles of Leadership • Group Reactions to Styles of Leadership • What Makes a Good Leader? • Training for Leadership

Illegal Behavior 571

Factors in Delinquency • Recent Improvements in Treatment • Approaches to Crime Prevention

Chapter Summary 582

16 *Communication and Persuasion* 584

Public Opinion Surveys 585

Conceiving the Problem • Designing the Instrument • Sampling the Population • Conducting the Interviews • Interpreting the Results • Accuracy of Public Opinion Polls • The Use of Panels

Psychological Factors in Advertising 591

Objectives of Effective Advertising • Techniques of Advertising Research • "Institutional" Advertising

Techniques of Propaganda 593

Common Persuasive Devices • Factors in Effective Persuasion • Long-Term Effects of Propaganda • Resistance to Propaganda • Brainwashing

Chapter Summary 613

Reference Manual

A *Basic Concepts in Statistics* 616

Psychological Measurement 616

The Nominal Scale • The Ordinal Scale • The Interval Scale • The Ratio Scale

The Use of Descriptive Statistics 618

Measures of Central Value • Measures of Variability • Measures of Correlation

The Use of Statistical Inference 626

Sampling • Statistics and Parameters • The Normal Distribution • Sampling Distributions • Null Hypothesis Testing • Confidence Intervals • Analysis of Variance • Analysis of Covariance • Two-Way Analysis of Variance

B *Frontiers in Psychology* 645

The Psychology of the Psychologist 645

Robert Rosenthal

Physiological and Cultural Determinants of Behavior 652

Neal E. Miller

The Concept of Ego Development 660

Jane Loevinger

Experimental Modification of Memory Storage 666

James L. McGaugh

Human Performance 671

John W. Senders

International Cooperation and Attitude Change 677

Herbert C. Kelman
