

Table of Contents

CONTRIBUTORS TO VOLUME XXI	ix
PREFACE	xiii
VOLUMES IN SERIES	xv

Section I. Techniques for Structural Analysis

1. Nucleic Acid Structure Analysis by Polarographic Techniques	EMIL PALEČEK	3
2. Luminescence Spectroscopy of Nucleic Acids	J. EISINGER AND A. A. LAMOLA	24

Section II. Resolution Based on Nucleic Acid Structure

3. Chromatography of Nucleic Acids on Hydroxyapatite Columns	GIORGIO BERNARDI	95
4. The Separation of T-Even Bacteriophage DNA from Host DNA by Hydroxyapatite Chromatography	M. OISHI	140
5. An Exonuclease Specific for Double-Stranded DNA: Deoxyribonuclease IV from Rabbit Tissues	TOMAS LINDAHL	148
6. Isolation of Extrachromosomal DNA from Bacteria	DAVID FREIFELDER	153

Section III. Techniques for the Resolution of Nucleic Acids

A. Polyacrylamide Gel Electrophoresis

7. Fractionation of RNA by Electrophoresis on Polyacrylamide Gel Slabs	R. DE WACHTER AND W. FIERIS	167
8. Electrophoretic Fractionation of Oligodeoxyribonucleotides	THOMAS M. JOVIN	179
9. <i>In Situ</i> Assays for RNA Polymerase and DNA Polymerase after Acrylamide Gel Electrophoresis	J. S. KRAKOW AND L. D. MURTHY	188

B. Immobilization of Nucleic Acids

- | | | |
|--|------------------------------------|-----|
| 10. The Covalent Binding of Nucleotides, Polynucleotides, and Nucleic Acids to Cellulose | P. T. GILHAM | 191 |
| 11. DNA-Cellulose Chromatography | BRUCE ALBERTS AND
GLENN HERRICK | 198 |

Section IV. Enzymes Involved in Repair, Restriction, and Integration of DNA

- | | | |
|--|---|-----|
| 12. Determination of Repair Replication <i>in Vivo</i> | PHILIP C. HANAWALT AND
PRISCILLA K. COOPER | 221 |
| 13. The Excision of Pyrimidine Dimers (The Detection of Dimers in Small Amounts) | W. L. CARRIER AND
R. B. SETLOW | 230 |
| 14. Sedimentation and Equilibrium Density Gradient Methods in the Study of Post-replication DNA Repair | W. DEAN RUPP AND
PAUL HOWARD-FLANDERS | 237 |
| 15. The UV-Endonuclease from <i>Micrococcus luteus</i> | SIDNEY R. KUSHNER AND
LAWRENCE GROSSMAN | 244 |
| 16. UV-Exonuclease | JOAN C. KAPLAN AND
LAWRENCE GROSSMAN | 249 |
| 17. Fluorometric Assay for Specific (Nickases) and Nonspecific Endodeoxyribonucleases | C. PAOLETTI AND
JEAN BERNARD LE PECQ | 255 |
| 18. DNA Restriction Enzyme from <i>Escherichia coli</i> | ROBERT YUAN AND
MATTHEW MESELSON | 269 |
| 19. The Purification of β Protein and Exonuclease Made by Phage λ | CHARLES M. RADDING | 273 |
| 20. Endonuclease(s) Induced by Bacteriophage Lambda | ARTHUR WEISSBACH | 280 |

Section V. Enzymes Involved in Recombination and Replication

- | | | |
|---|---------------------------------------|-----|
| 21. Conversion of Joint Molecules to Recombinant Molecules <i>in Vitro</i> | NAOYO ANRAKU AND
JUN-ICHI TOMIZAWA | 289 |
| 22. Demonstration of Newly Replicated Short DNA Chains | REIJI OKAZAKI | 296 |
| 23. Analysis of the Secondary Structure of Intermediates of DNA Replication | M. OISHI | 304 |

Polynucleotide Joining Activities

- | | | |
|---|----------------------|-----|
| 24. The DNA Joining Enzyme from <i>Escherichia coli</i> | BALDOMERO M. OLIVERA | 311 |
|---|----------------------|-----|

25. DNA Ligase from <i>Escherichia coli</i> Infected with Bacteriophage T4	BERNARD WEISS	319
26. Assay of DNA Ligase by Covalent Joining of λ DNA Molecules	MARTIN GELLERT	326
27. DNA Ligase from Rabbit Tissues	TOMAS LINDAHL	333

Section VI. Gene Localization Techniques

28. A Method for the Breakage of DNA and Resolution of the Fragments	A. SKALKA	341
29. Multistep DNA-RNA Hybridization Techniques	K. BØVRE AND W. SZYBALSKI	350
30. Analytical and Preparative Separation of the Complementary DNA Strands	W. SZYBALSKI, H. KUBINSKI, Z. HRADECNA, AND W. C. SUMMERS	383
31. Electron Microscope Heteroduplex Methods for Mapping Regions of Base Sequence Homology in Nucleic Acids	RONALD W. DAVIS, MARTHA SIMON, AND NORMAN DAVIDSON	413
32. Selective Reagents for the Electron Microscopic Study of Base Sequence in DNA	M. BEER	428
Gene Localization by Biological Techniques		
33. Genetic Mapping of <i>Bacillus subtilis</i>	DAVID DUBNAU	430
34. Genetic Mapping by Hfr Mating	DAVID FREIFELDER	438
35. P1 Transduction	LUCIEN CARO AND CLAIRE M. BERG	444
36. Genetic Crosses between Species: Location of Structural Genes and Production of Altered Enzymes	CHARLES M. RADDING	458
37. Use of Synchronous Cultures of Yeast to Study Gene Position	H. O. HALVORSON, B. L. A. CARTER, AND P. TAURO	462
38. Nucleic Acid Hybridization in Cytological Preparations	JOSEPH G. GALL AND MARY LOU PARDUE	470

Section VII. Factors Affecting Gene Expression

A. Isolation of Specific Repressors

39. <i>Lac</i> Repressor from <i>Escherichia coli</i>	B. MÜLLER-HILL, K. BEYREUTHER, AND W. GILBERT	483
---	---	-----

40. Isolation of the γ and 434 Phage Repressors	MARK PTASHNE, VINCENZO PIRROTTA, AND NANCY HOPKINS	487
41. Techniques to Assay Repressors	SUZANNE BOURGEOIS	491
B. Isolation of RNA Polymerase Initiators		
42. Purification of the RNA Polymerase Sigma Factor	RICHARD R. BURGESS AND ANDREW A. TRAVERS	500
43. Purification of Two Forms of <i>Escherichia coli</i> RNA Polymerase and of Sigma Component	D. BERG, K. BARRETT, AND M. CHAMBERLIN	506
44. Acrylamide Gel Electrophoresis as a Tool for the Study of RNA Polymerase and the Sigma Initiation Factor	J. S. KRAKOW	520
