

CONTENTS

Preface	vii
D. C. Coleman. Through a ped darkly: an ecological assessment of root-soil-microbial-faunal interactions	1
R. Fogel. Roots as primary producers in below-ground ecosystems	23
R. I. Fairley & I. J. Alexander. Methods of calculating fine root production in forests	37
D. Atkinson. Spatial and temporal aspects of root distribution as indicated by the use of a root observation laboratory	43
A. Carpenter, J. M. Cherrett, J. B. Ford, M. Thomas & E. Evans. An inexpensive rhizotron for research on soil and litter-living organisms	67
D. J. Gibson, I. A. Colquhoun & P. Greig-Smith. A new method for measuring nutrient supply rates in soils using ion-exchange resins	73
R. I. Fairley. Grass root production in restored soil following open-cast mining.	81
A. H. Fitter. Functional significance of root morphology and root system architecture.	87
E. I. Newman. The rhizosphere: carbon sources and microbial populations	107
P. C. Brooks, D. S. Powlson & D. S. Jenkinson. The microbial biomass in soil	123
K. E. Giller & J. M. Day. Nitrogen fixation in the rhizosphere: significance in natural and agricultural systems	127
L. A. Kapustka, P. T. Arnold & P. T. Lattimore. Interactive responses of associative diazotrophs from a Nebraska Sand Hills grassland	149
K. Paustian. Influence of fungal growth pattern on decomposition and nitrogen mineralization in a model system	159
R. C. Ferrier & I. J. Alexander. The persistence under field conditions of excised fine roots and mycorrhizas of spruce	175
J. M. Lynch. Microbial saprophytic activity on straw and other residues: consequences for the plant	181
D. J. Read, R. Francis & R. D. Finlay. Mycorrhizal mycelia and nutrient cycling in plant communities	193
