

Contents in Brief

- List of Boxes xvii
Preface xix

UNIT I MICROBIOLOGY— THE FUNDAMENTALS

- 1 Scope and History of Microbiology, 1
- 2 Fundamentals of Chemistry, 27
- 3 Microscopy and Staining, 51
- 4 Characteristics of Prokaryotic and Eukaryotic Cells, 75

UNIT II MICROBIAL METABOLISM, GROWTH, AND GENETICS

- 5 Essential Concepts of Metabolism, 109
- 6 Growth and Culturing of Bacteria, 137
- 7 Genetics I: Gene Action, Gene Regulation, and Mutation, 163
- 8 Genetics II: Transfer of Genetic Material and Genetic Engineering, 195

UNIT III THE ROSTER OF MICROBES AND MULTICELLULAR PARASITES

- 9 Microbes in the Scheme of Life: An Introduction to Taxonomy, 223
- 10 The Bacteria, 243
- 11 Viruses, 265
- 12 Eukaryotic Microorganisms and Parasites, 293

UNIT IV CONTROL OF MICROORGANISMS

- 13 Sterilization and Disinfection, 323
- 14 Antimicrobial Therapy, 349

UNIT V HOST-MICROBE INTERACTIONS

- 15 Host-Microbe Relationships and Disease Processes, 385

- 16 Epidemiology and Nosocomial Infections, 409
- 17 Host Systems and Nonspecific Host Defenses, 443
- 18 Immunology I: Basic Principles of Specific Immunity and Immunization, 473
- 19 Immunology II: Immunologic Disorders and Tests, 509

UNIT VI INFECTIOUS DISEASES OF HUMAN ORGAN SYSTEMS

- 20 Diseases of the Skin and Eyes: Wounds and Bites, 549
- 21 Diseases of the Respiratory System, 575
- 22 Oral and Gastrointestinal Diseases, 603
- 23 Cardiovascular, Lymphatic, and Systemic Diseases, 635
- 24 Diseases of the Nervous System, 669
- 25 Urogenital and Sexually Transmitted Diseases, 691

UNIT VII ENVIRONMENTAL AND APPLIED MICROBIOLOGY

- 26 Environmental Microbiology, 719
- 27 Applied Microbiology, 749

APPENDICES

- A Metric System Measurements, A1
- B Classification of Bacteria and Viruses, A3
- C Word Roots Commonly Encountered in Microbiology, A14
- D Safety Precautions in the Handling of Clinical Specimens, A19
- E Answers to Selected Problems for Investigation, A21

Glossary, G1

Index, I1
