

Contents

List of Contributors	vii
Preface	ix
1 The structure of nucleosomes and chromatin A. KLUG AND P. J. G. BUTLER	1
2 Activation and function of chromatin P. N. BRYAN AND O. H. J. DESTREE	43
3 Structure and function of ribosomal RNA H. F. NOLLER AND P. H. VAN KNIPPENBERG	91
4 Structure and role of eubacterial ribosomal proteins R. A. GARRETT	101
5 Regulatory steps in the initiation of protein synthesis H. O. VOORMA	139
6 Transport of proteins from the sites of genetic expression to their sites of functional expression: protein conformation and thermodynamic aspects C. KEMPF, R. D. KLAUSNER, R. BLUMENTHAL AND J. VAN RENSWOUDE	155
7 Approaches to the study of hormonal regulation of gene expression A. J. WYNshaw-BORIS AND R. W. HANSON	171
8 Strategies for optimizing foreign gene expression in <i>Escherichia coli</i> H. A. DE BOER AND H. M. SHEPARD	205
9 Interplay between different genetic systems in eukaryotic cells: nucleocytoplasmic-mitochondrial interrelations H. DE VRIES AND P. VAN 'T SANT	249
10 Mosaic genes and RNA processing in mitochondria L. A. GRIVELL, L. BONEN AND P. BORST	279
11 Assembly of mitochondrial proteins B. HENNIG AND W. NEUPERT	307
12 The non-universality of the genetic code A. M. KROON AND S. SACCONE	347
Index	357
