1. The Biological Theater—The Evolutionary Play
 - Living Control Systems 3
 - Feedback 4
 - Suggestions and Questions 8
 - Selected Readings 9

I

Populations and Communities As Regulatory Units

11

2. The Universe and Mr. Darwin 13
 - Galaxy Formation 14
 - Origin of the Solar System 14
 - Origin of Life 15
 - Reproduction and Nutrition 15
 - Geological Timetable 16
 - Fossils 17
 - Types of Fossils 17
 - Imperfections in the Fossil Record 20
 - Significance of the Fossil Record 21
 - The Darwinian Perspective 21
 - Summary 23
 - Questions 23
 - Selected Readings 24
3. Population Genetics and Evolution 25
 - Populations Without Evolution 26
 - Hardy-Weinberg Law 27
 - Effect of Population Size 29
 - Effect of Mutation 30
 - Effect of Selection 34
 - Types of Selection 36
 - Moths and the Industrial Revolution 37
 - Summary 38
 - Questions 39
 - Selected Readings 40
4. Species Formation 41
 - Phyletic Speciation 42
 - Multiplication of Species 42
 - Instantaneous Speciation 42
 - Gradual Speciation 43
 - Geographic Barriers 45
 - Reproductive Isolating Mechanisms 46
 - Adaptive Radiation and Convergent Evolution 47
 - Mimicry 50

Preadaptation	51
Purpose and Evolution	52
Biogeography	53
Plate Tectonics	53
Breakup of Pangaea	54
Significance of Continental Drift to Biogeography	55
Patterns of Distribution	56
Paths of Interchange Between Biotic Provinces	57
Human Evolution	58
Key Steps in Primate Evolution	58
Natural Selection in Man	61
Skin Color	61
Sickle-Cell Anemia and Malaria	62
Natural Selection in Man Today	63
Summary	64
Questions	65
Selected Readings	66

5. Systematics and the Diversity of Life

67

The Science of Systematics	68
Nomenclature	68
Classification	69
Numerical Taxonomy	70
Examples of Evolutionary Analysis	71
Classification Schemes	74
Two Kingdoms and Criticism	74
Five-Kingdom System	75
Characteristics Used in Classification	76
Noncellularity Vs. Cellularity	77
Prokaryotic Vs. Eucaryotic Organisms	77
Unicellular Vs. Multicellular Organisms	77
Simplicity Vs. Complexity of Organ Systems	77
Photosynthetic Pigments	78
Food Storage	78
Flagella and Cilia	78
Sexual Vs. Asexual Reproduction	79
Summary	80
Questions	82
Selected Readings	82

6. Viruses and Single-celled Organisms

84

Viruses	85
Kingdom Monera	88
Bacteria	88
Characteristics	88
Classification	90

Blue-Green Algae	91
Kingdom Protista	92
Unicellular Animals: Protozoa	92
Characteristics	92
Classification	93
Unicellular Plants: Algae	98
Summary	101
Questions	101
Selected Readings	102

7. Kingdom Plantae

103

Characteristics Used in Plant	
Classification	103
Life Cycles and Alternation of Generations	103
Spores	105
Gametangia and Embryos	105
Seeds	105
Vascular Tissue	105
Multicellular Algae	106
Division Rhodophyta	106
Division Phaeophyta	107
Division Chlorophyta	108
Multicellular Plants—Metaphyta	112
Adaptations to Land	112
Division Bryophyta	113
Characteristics	114
Mosses	114
Division Tracheophyta	116
Characteristics	116
Body Plan of Seed Plants	123
Roots	125
Stems	126
Leaves	132
Gymnosperms	134
Life Cycle of a Conifer	137
Angiosperms	138
Flower Structure	139
Pollination, Fruits, and Seeds	140
Summary	143
Questions	144
Selected Readings	145

8. Kingdom Fungi

146

Slime Molds	146
Division Myxomycophyta	146
Division Acrasiomycota	148
True Fungi	148

Division <i>Phycomycota</i>	150
Division <i>Ascomycota</i>	152
Division <i>Basidiomycota</i>	153
Summary	155
Questions	156
Selected Readings	156
9. Kingdom Animalia I	158
Characteristics Used in Animal	
Classification	158
Symmetry	158
Egg Cleavage	161
Germ Layers	161
Origin of the Embryonic Mouth	161
Body Cavities	163
Segmentation	164
Larvae and Embryos	165
Subkingdom Agnotozoa—Phylum	
Mesozoa	165
Subkingdom Parazoa—Phylum Porifera	167
Characteristics	167
Subphylum Eumetazoa: Branch Radiata—	
Phylum Cnidaria	170
Characteristics	170
Classification	173
Phylum Ctenophora	176
Subphylum Eumetazoa: Branch Bilateria—	
Grade Acoelomata—	
Phylum Platyhelminthes	178
Characteristics	178
Classification	181
Phylum Nemertinea (Rhynchocoela)	182
Phylum Gnathostomulida	183
Subkingdom Eumetazoa: Branch Bilateria—	
Grade Pseudocoelomata	183
Phylum Nematoda	184
Characteristics	184
Life-Styles of Some Nematodes	185
Phylum Nematomorpha (Gordicea)	187
Phylum Rotifera	187
Phylum Gastrotricha	187
Phylum Kinorhyncha	188
Phylum Priapulida	188
Phylum Acanthocephala	188
Phylum Entoprocta	188
Summary	189
Questions	189
Selected Readings	190
10. Kingdom Animalia II	
(Grade Coelomata)	
Subgrade Schizocoela—Phylum	
Phoronida	191
Phylum Ectoprocta	193
Phylum Brachiopoda	193
Phylum Mollusca	195
Characteristics	195
Classification	195
Phylum Sipunculida	198
Phylum Echiuroidea	198
Phylum Annelida	198
Characteristics	200
Phylum Arthropoda	201
Characteristics	201
Classification	202
Subgrade Enterocoela—Phylum	
Pogonophora	210
Phylum Chaetognatha	210
Phylum Echinodermata	211
Characteristics	211
Water-Vascular System and Tube Feet	213
Classification	213
Phylum Hemichordata	217
Phylum Chordata	217
Characteristics	218
Classification	218
Summary	228
Questions	231
Selected Readings	231
11. Ecology—Community Organization	233
Ecosystems and Ecologists	233
Structure and Function of Ecosystems	234
Limiting Factors and the Law of Tolerance	235
Adaptations	236
Relationships Among Organisms	236
Chemical Interactions	238
Niche Concept	238
Species Diversity	239
Patterns in Space	239
Vertical Distribution	239
Horizontal Distribution	240
Patterns in Time	241
Succession and Climax	241
Biological Clocks	246
Summary	247
Questions	248
Selected Readings	249

12. Animal Behavior	250	Questions	303
Origin and Development of Behavior	251	Selected Readings	304
Reflexes	251		
Instinct	252		
Innate Releasing Mechanism	255		
Experience and Behavior	257		
Imprinting	258		
Habituation	259		
Conditioning	259		
Trial-and-Error Learning	262		
Reasoning	262		
Phylogeny of Stereotyped and Learned Responses	263		
Orientation	263		
Kinesis	263		
Taxes and Other Directed Reactions	263		
Chemical Orientation	264		
Acoustic Orientation	265		
Visual Orientation	266		
Nonvisual Cues in Navigation	269		
Communication and Social Behavior	269		
Functions of Aggregations	269		
Reproductive Behavior	271		
Food	275		
Protection	275		
Summary	277		
Questions	278		
Selected Readings	278		
13. Populations	280		
Measurement of Population Size	280		
Population Growth	282		
Limiting Factors	283		
Carrying Capacity	284		
Mortality	285		
Survivorship Curves	285		
Age Structure	286		
Measuring Age	287		
Population Fluctuations and Cycles	287		
Population Regulation	288		
Regulation by Physical Factors	289		
Food As a Control Agent	289		
Regulation by Disease	290		
Regulation by "Predators"	291		
Regulation by Interspecific Competition	295		
Intraspecific Competition	298		
Human Populations	301		
Summary	302		
14. Energy in the Ecosystem	305		
Laws of Thermodynamics	305		
Nutrition and Energy	306		
Energy Transfer in the Ecosystem	307		
Productivity and Biomass	308		
Productivity	310		
Measurement of Primary Productivity	312		
Ecological Efficiencies and Pyramids	314		
Summary	317		
Questions	318		
Selected Readings	319		
15. Matter—Biogeochemical Cycles	320		
Matter—First Principles	320		
Measurement of Biogeochemical Cycles	321		
Carbon Cycle	322		
Oxygen Cycle	326		
Nitrogen Cycle	326		
Nitrogen Fixation	326		
Nitrogen in Organisms	328		
Sedimentary Cycles	329		
Forest Watershed	332		
Summary	334		
Questions	334		
Selected Readings	335		
II			
The Organism As a Regulatory Unit	337		
16. Nervous System	339		
Vertebrate Nervous System: A Perspective	339		
Nerve Cells and Their Connections	340		
Neural Reflex Arc	342		
Nerve Impulse	346		
Resting Potential of Cells	346		
Nerve Action Potential	350		
Saltatory Conduction	353		
Potentials from Nerves	353		
Synapse	355		
Electrical Events at the Synapse	357		
Chemical Events at the Synapse	358		
Evolution of the Nervous System	362		

Organisms Without Nervous Systems	362	
Nervous Systems in Radial Animals	364	
Nervous Systems in Bilateral Animals	365	
Vertebrate Brain	367	
Summary	371	
Questions	372	
Selected Readings	372	
17. Sensory System		373
Methods of Study	373	
Principles in Sense Organ Function	376	
Classification of Sense Organs	376	
Stimulus Quality	377	
Electrical Patterns and Stimulus Intensity	377	
Adaptation	378	
Chemoreception	379	
Cellular Mechanism of Chemoreception	382	
Mechanoreception	383	
Touch and Stretch Receptors	383	
Statocysts	384	
Moth Ears and Bat Cries	385	
Vertebrate Ear	387	
Hearing	388	
Photoreception	390	
Photoreception Without Eyes	392	
"Eye" of Euglena	392	
Simple Eyes—Ocelli	392	
Compound Eyes	392	
Camera-Type Eye	394	
Summary	400	
Questions	401	
Selected Readings	402	
18. Muscle and Other Effectors		404
Glands	404	
Bioluminescent Organs	405	
Chromatophores	406	
Contractile Systems	408	
Cilia and Flagella	408	
Myonemes and Epitheliomuscular Cells	408	
Muscle and Supportive Systems	408	
Skeletal Systems	408	
General Organization of Muscles and Skeletons	410	
Elements of Muscle Contraction	412	
Molecular Basis for Contraction	416	
Control of Muscle	423	
Electric Organs	430	
Summary	432	
Questions	433	
Selected Readings	434	
19. Hormones and Chemical Communication		435
Vertebrate Hormones	436	
Pituitary Gland	437	
Principles of Hormone Action	441	
Specificity of Hormone Action	441	
Time for Hormone Action	441	
Dose-Response Effects	441	
Control of Hormone Concentration	442	
Neuroendocrine Reflex Arcs	443	
Feedback	445	
Hormone Action at the Cellular Level	445	
Molting in Arthropods	448	
Molting in Crustaceans	448	
Molting and Metamorphosis in Insects	449	
Growth and Differentiation in Plants	451	
Auxin—The First Plant Hormone	451	
Gibberellins	454	
Other Plant Hormones	455	
Reproductive System in Men	455	
Male Sex Act	456	
Male Hormones	457	
Vasectomy	458	
Reproductive System in Women	458	
Events at the Ovary	460	
Events at the Uterus	460	
Hormone Interactions in Menstrual Cycle	460	
Birth Control Pills	465	
Pregnancy	465	
Birth	467	
Lactation	467	
Summary	467	
Questions	469	
Selected Readings	469	
20. Circulation and Transport Systems		471
Circulatory Systems in Animals	473	
Types of Systems	473	
Blood	476	
Blood-Clot Formation	477	
Vascular Pumps	478	
Principles of Blood Flow	482	
Circuit Diagrams of Circulatory Systems	484	
Exchange Across Capillary Walls	486	
Control of Blood Flow	489	
Transport Systems in Plants	490	

Xylem	491		
Phloem	492		
Control of Fluid Transport in Plants	493		
Summary	493		
Questions	495		
Selected Readings	496		
21. Gas Exchange		497	
Physical Principles of Gas Exchange	497		
Partial Pressure	497		
Solubility	498		
Diffusion	498		
Water and Air As Respiratory Media	500		
Survey of Gas-Exchange Mechanisms	500		
External Gas-Exchange Sites	500		
Internal Gas-Exchange Sites	502		
Vertebrate Lung Systems	505		
Mechanics of Ventilation	506		
Control of Ventilation	508		
Respiratory Pigments	510		
Pigment Chemistry	511		
Oxygen Transport	512		
Carbon Dioxide Transport	515		
Why Have Red Blood Cells?	516		
Summary	517		
Questions	518		
Selected Readings	518		
22. Nutrition and Metabolism		520	
Principles of Nutrition	520		
Energy	520		
Matter	521		
Plant Nutrition	523		
Heterotrophic Nutrition: An Overview	523		
Survey of Digestive Systems	524		
Integumentary Feeding	525		
Incomplete Digestive Tracts	528		
Complete Digestive Tracts	528		
Digestion in Man	531		
Organs of the Digestive Tract	533		
Regulation of Blood Sugar in Man	540		
Appetite and Regulation of Blood Sugar	540		
Glucose Input into the Blood	540		
Glucose Output from the Blood	541		
Metabolism and Temperature Regulation	542		
Summary	545		
Questions	546		
Selected Readings	547		
23. Excretion and Osmotic Balance		548	
General Principles	548		
Water	548		
Cell Membranes and Permeability Barriers	549		
Review of Osmosis: Four Osmotic Problems	549		
Osmoconformers and Osmoregulators	550		
Nitrogen Excretion	551		
Osmotic Regulation in Different Environments	553		
Isosmotic Organisms	553		
Hyperosmotic Organisms	553		
Hypoosmotic Organisms	554		
Regulation on Land	555		
Survey of Excretory Systems in Animals	558		
Contractile Vacuoles	558		
Protonephridia	560		
Malpighian Tubules	561		
Ultrafiltration Systems	563		
Vertebrate Kidney	564		
Summary	572		
Questions	574		
Selected Readings	574		
24. Immunity and Disease		576	
Disease Transmission	576		
Immunological Surveillance	577		
White Cells and Their Relatives	577		
Inflammation and the White Cells in Action	579		
Lymphocytes and Antibodies	580		
B cells and T cells	580		
Humoral Antibodies	582		
Antibody Formation	584		
Antibodies and Disease Resistance	585		
Blood Transfusions	587		
Tissue Grafting	589		
Interferon	589		
Resistance to Disease in Invertebrates	590		
Resistance to Disease in Plants	591		
Summary	591		
Questions	592		
Selected Readings	592		
III			
The Cell As a Regulatory Unit			595
25. Cellular Organization			597

- Cell Theory 598
 The Light Microscope and Classical Cell Models 599
 The Electron Microscope 602
 Other Microtechniques Used in Cellular Studies 604
 Cell Structures and Their Functions 605
 Modern Generalized Cell 605
 Plasma Membrane 607
 Intercellular Contacts 608
 Phagocytosis, Pinocytosis, and Micropinocytosis 610
 Cellular Interactions and Extracellular Material 611
 Nuclear Envelope, Nucleus, and Nucleolus 612
 Endoplasmic Reticulum 614
 Golgi Complex, Lysosomes, and Intracellular Digestion 616
 Mitochondria 619
 Plastids 620
 Microfilaments, Microtubules, Centrioles, and Cilia 620
 Vacuoles and Inclusions 623
 Dynamics of Cellular Ultrastructure 623
 Summary 624
 Questions 625
 Selected Readings 625
- 26. Biological Molecules and Information** 626
 Water and Chemical Bonds 628
 Ions and Acids 633
 Organic Constituents of Living Systems 633
 The Carbon Atom 633
 Carbohydrates: Structures and Functions 634
 Lipids: Structures and Functions 639
 Nucleosides and Nucleotides 643
 Proteins: Informational Macromolecules 646
 Amino Acids and Primary Protein Structure 646
 Protein Secondary Structure 652
 Protein Tertiary Structure 655
 Protein Quaternary Structure 657
 Proteins As Enzymes 657
 Mechanism of Enzyme Action 660
 Factors Affecting Enzyme Activity 661
 Types of Enzymes 664
 Summary 665
 Questions 666
 Selected Readings 666
- 27. Cellular Division and Genetics**
 Cellular Life Cycle 668
 Interphase 669
 Karyokinesis 671
 Prophase 671
 Metaphase 672
 Anaphase 672
 Telophase 672
 Summary of Karyokinesis 672
 Mitotic Apparatus 673
 Cytokinesis 675
 Animal Cells 675
 Plant Cells 675
 Meiosis 676
 Meiotic Process 677
 Meiosis I-Prophase I 677
 Meiosis I—Metaphase I 679
 Meiosis I-Anaphase I 679
 Meiosis I-Telophase I 679
 Meiosis II 679
 Meiosis in Animals 681
 Meiosis in Plants 681
 Mendelian Genetics 683
 Mendel's Experiments 683
 Linkage and Recombination 688
 Genes on Chromosomes 688
 Linkage and Crossover 690
 Chromosomal Variations 692
 Chromosomal Mutations 692
 Changes in Chromosome Number 694
 Conclusions 695
 Summary 695
 Questions 697
 Selected Readings 697
- 28. DNA and RNA: Carriers of Genetic Information** 698
 DNA: The Primary Genetic Material 699
 Why DNA? 699
 DNA Structure and the Watson-Crick Model 702
 DNA Replication 706
 Transcription and Translation (Protein Synthesis) 711
 Nature of RNAs 711
 Steps in Protein Synthesis 711
 Ribosomes 712
 Transfer RNA 712
 The Genetic Code 715

Genes and Chromosomes	718
Classical Gene	718
Nature of DNA in Different Cells	718
Bacterial DNA	719
Viral DNA and RNA	719
Reverse Transcription	720
Mutation and Repair of the Genetic Material	720
Types of Gene Mutations	721
DNA Repair Mechanisms	723
Summary	725
Questions	725
Selected Readings	726

29. Energy at the Cellular Level 727

First Law of Thermodynamics	727
Second Law of Thermodynamics	727
Cellular Metabolism in Animals	729
High-Energy Phosphates	729
Glucose Metabolism	730
Glycolysis	731
Fates of NADH ₂ and Pyruvate: Fermentation Reactions	735
Tricarboxylic Acid Cycle	737
Oxidative Phosphorylation and the Cytochrome System	740
The Energetics of Respiration	742
Oxidation of Fats	744
Protein Catabolism	746
Pentose Phosphate Pathway (Hexosmonophosphate Shunt)	747
Photosynthesis	749
Chloroplasts	749
Photosynthetic Pigments	750
Light Absorption	751
Electron Transport System	755
Dark Reactions of Photosynthesis: CO ₂ Fixation	758
Functional Organization of the Chloroplast	759
The Hatch-Slack Pathway	761
Photosynthetic Bacteria	761
Chemosynthesis	762
Summary	763
Questions	764
Selected Readings	764

30. Regulation of Cellular Metabolism 766

Law of Mass Action	767
--------------------	-----

Regulation of Enzyme Activity	769
Competition for Shared Substrate	769
Concept of the Rate-Limiting Step	769
Isozymes (Isoenzymes)	771
Enzyme Inhibition and Activation	772
Enzyme Interconversions	775
Control of Glucose Oxidation	778
Control of Photosynthesis and Starch Formation	781
Control of Enzyme Concentration	782
Enzyme Induction	782
Enzyme Repression	785
Regulation of Protein Synthesis in Eucaryotes	785
Summary	787
Questions	788
Selected Readings	789

31. Development and Cellular Differentiation 790

Onset of Development	790
Fertilization	790
Cleavage	793
Gastrulation	796
Differentiation	798
Metamorphosis	799
Regeneration	802
Nuclear Transplant Experiments	804
Cloning Experiments	804
Molecular Events During Differentiation	804
Chromosomal Proteins and Gene Regulation	809
Inborn Errors of Metabolism	812
Morphogenesis	814
Cell Reaggregation	814
Embryonic Inductions	816
Cancer	818
Viruses As Agents of Cancer	819
Cellular Aging, Senescence, and Death	821
Theoretical Models of Cell Senescence	822
Summary	823
Questions	824
Selected Readings	824

32. The Origin of Life 826

Two Scientific Hypotheses for the Origin of Life	827
Primitive Earth	827
Miller's Experiments	828
From Molecules to a Living System	828
Exobiology	830

Origin of Eucaryotic Cells 830

First Cells 830

Evolution of Procaryotes 831

Evolution of Eucaryotes 832

Summary 836

Questions 837

Selected Readings 837

Glossary 839

Index 859
