

Contents

PART ONE INTRODUCTION

1 The Origins of Developmental Biology, 3

- 1-1 Germ Cells: Bridging the Generation Gap, 4
- 1-2 The Roux-Weismann Theory, 6
- 1-3 The Mendelian Era, 9

ESSAY: MEIOSIS, 12

- 1-4 Embryology: Losing the Faith, 18
- 1-5 Genetics: Keeping the Faith, 20
- 1-6 Physiological Genetics, 22
- 1-7 The Modern Era, 25
- 1-8 Overview of Animal Development, 28

PART TWO THE CELL IN DEVELOPMENT

2 Gene Function in Cell Determination and Differentiation, 41

- 2-1 Genome Equivalence, 42

ESSAY: PLANT PROTOPLASTS, 60

- 2-2 Differential Gene Expression, 63

3 The Nature of Genetic Information and Its Utilization During Cell Differentiation, 73

Section One

The Nature of Genetic Information, 73

- 3-1 The Structure of Chromatin, 74
- 3-2 Organization of DNA in Chromatin, 81

ESSAY: TECHNIQUES IN MOLECULAR BIOLOGY, 88*Section Two**The Utilization of Genetic Information During Cell Differentiation, 113*

- 3-3 RNA Synthesis, 113
- 3-4 Processing of RNA, 119
- 3-5 Protein Synthesis, 125

4 Control of Gene Expression During Development, 134

- 4-1 Evidence for Differential Gene Transcription, 135

ESSAY: EXCEPTIONS TO THE GENE CONSTANCY RULE, 136

- 4-2 Transcriptional Control Mechanisms, 147
- 4-3 Posttranscriptional Controls, 162

5 The Cellular Basis of Morphogenesis, 172

- 5-1 The Cytoskeleton, 173

ESSAY: VISUALIZATION OF THE CYTOSKELETON BY IMMUNOFLUORESCENCE MICROSCOPY, 179

- 5-2 The Cell Surface, 184
- 5-3 The Cell Surface and Cytoskeleton in Morphogenesis of Animal Embryos, 186

ESSAY: INTERCELLULAR ADHESION IN SLIME MOLDS, 198

- 5-4 Morphogenesis of Plant Cells: Role of Microtubules, 205

PART THREE**GAMETOGENESIS****6 Spermatogenesis, 217**

- 6-1 Hormonal Regulation of Spermatogenesis, 220
- 6-2 Sperm Structure, 220
- 6-3 Spermiogenesis, 230
- 6-4 Gene Function in Spermatogenesis, 238
- 6-5 Mammalian Sperm Maturation, 243

7 Oogenesis, 248

- 7-1 Hormonal Control of Oogenesis, 249
- 7-2 Oocyte-Accessory Cell Interactions During Oogenesis, 253
- 7-3 Organization of the Egg, 261
- 7-4 Differentiation of Oocyte Constituents, 267
- 7-5 Gene Expression During Oogenesis: Amphibians, 280

- 7-6 Gene Expression During Oogenesis: Nonamphibian Species, 301
- 7-7 Utilization of Genomic Information in Oogenesis: Conclusions, 303
- 7-8 Conversion of the Oocyte to the Egg—Maturation and Ovulation, 303
- 7-9 Egg Envelopes, 314
- 7-10 The Fertilizable Egg—Just the Beginning, 315

8 Plant Gametogenesis, 324

- 8-1 Gametogenesis in Primitive Plants, 326
- 8-2 Gametogenesis in Angiosperms, 337

PART FOUR FROM EGG TO EMBRYO

9 Fertilization, 369

- 9-1 Sperm-Egg Association, 370

**ESSAY: ADVANCES IN HUMAN FERTILITY REGULATION:
IMMUNOCONTRACEPTION AND *IN VITRO* FERTILIZATION, 383**

- 9-2 The Fertilization Response: Egg Activation, 387
- 9-3 Formation of the Diploid Zygote Nucleus, 404
- 9-4 Parthenogenesis, 409
- 9-5 Fertilization in Plants, 409

10 Becoming Multicellular, 430

- 10-1 Cleavage of the Animal Zygote, 430
- 10-2 Plant Embryogenesis, 467

11 The Developmental Consequences of Cleavage, 481

- 11-1 Cytoplasmic Localization as a Mechanism Regulating Differentiation, 482
- 11-2 Extrinsic Determination of Blastomere Fate, 517

12 Gene Expression During the Initiation of Development, 527

- 12-1 Maternal Regulation over Early Development, 531
- 12-2 Expression of the Embryonic Genome, 550
- 12-3 Gene Expression During Initial Development of Mammals, 559
- 12-4 Macromolecular Synthesis During Seed Development and Germination, 569

PART FIVE

THE ORGANIZED GENERATION OF CELL DIVERSITY**13 Forming the Organizational Framework of the Multicellular Embryo, 583***Section One**Establishment of the Animal Body Plan, 584*

13-1 *Amphioxus*: Gastrulation and Formation of the Body Plan, 586

13-2 The Sea Urchin: Gastrulation and Formation of the Body Plan, 589

13-3 Vertebrate Gastrulation, 600

13-4 Construction of the Vertebrate Body Axis, 616

13-5 Formation of Organ Rudiments, 637

*Section Two**Establishment of the Angiosperm Body Plan, 642*

13-6 The Root Apex, 643

13-7 The Shoot Apex, 646

14 Organogenesis: Determination, Morphogenesis, and Differentiation, 657

14-1 Epithelio-Mesenchymal Interactions, 658

14-2 An Analysis of Development: The Vertebrate Lens, 675

14-3 An Analysis of Development: Vertebrate Blood Cells, 689

14-4 An Analysis of Development and Regeneration: The Vertebrate Limb, 703

Index/Glossary, 730
