

CONTENTS

1 Introducing Psychology 2

Introducing Psychology 4

The goal of this book is for you to learn the major facts and ideas of psychology and to learn how to apply these to your own life

Psychology as a Science 12

How is an experiment in psychology set up and carried out?

2 We Are What We Learn 26

Conditioning 29

Pavlov's dogs, Little Albert, learning emotional reactions

Learning Through Reinforcement 38

Reinforcement and other basic processes of learning

Learning from Other People 54

Social learning

Self-analysis 66

Understanding yourself in terms of what you have learned through reinforcement or social learning

3 Learning to Be Male or Female 74

Sex-Typed Behavior and Stereotypes 77

Males and females learn to act differently because of differences in how they are raised and what is expected of them

How We Learn to Be Male or Female 84

Learning to act a sex role because of reinforcements, social learning, and what you are thinking about yourself

Self-fulfilling Prophecies 95

What self-fulfilling prophecies does society make about your sex, and what self-fulfilling prophecies do you make about yourself?

4 Understanding and Changing Yourself 106

The Basic Steps of Self-Management 108

Pick a goal, observe yourself carefully, work out steps for changing

Observing Yourself 111

Making careful records of your acts and thoughts teaches you how to begin changing yourself

Changing Your Behavior 119

Doing more what you want to do and less what you don't want to do

Changing Consequences and Antecedents 130

Getting rid of the things that support unwanted acts and adding things that encourage wanted acts

5 The Marvelous Workings of the Brain 144

The Nervous System 148

Introducing the biological basis of behavior

The Human Brain 159

Possibly the most complicated thing in the universe—what happens when surgeons cut it in two?

States of Consciousness 170

Biofeedback; how to meditate; how to analyze your dreams

6 Heredity with Environment 182

Instinct 184

What is instinct? Do humans have instincts?

Mental Retardation 442

Treatment 445

What happens in mental hospitals? What is psychotherapy? What is behavior therapy? Do they work?

14 The Social Being 458

Influencing Attitudes and Beliefs 460

How do people try to change what you think? How can you resist being changed against your will?

Understanding People 469

How important are first impressions? What affects how you think about people?

Prejudice: Not Understanding Others 476

What causes prejudice? What effects does it have? What can you do to combat it?

Violence and War 486

What causes violence and war? What effect does TV have, for example? What has to happen to make it possible for people to kill each other?

People in a Cooperative Mood 500

What encourages people to be helpful to each other?

Index 511
