Preface vii

Contributors ix

Pioneers in the growth hormone field xi

Introduction 1

Fred J. Nyberg

I. Biosynthesis of GH and IGF-I and Regulation of Their Secretion 5

1. Regulation and Mechanism of Growth Hormone and Insulin-like Growth Factor-I Biosynthesis and Secretion 7

C. B. Chan, Margaret C. L. Tse, and Christopher H. K. Cheng

2. Ghrelin, an Endogenous Ligand for the Growth Hormone Secretagogue Receptor 25

Masayasu Kojima and Kenji Kangawa

II. GH and IGF-I and their Function at Receptor Level 37

3. Mechanisms of Signal Transduction Utilized by Growth Hormone 39

Farhad Shafiei, Adrian C. Herington, and Peter E. Lobie

4. Insulin-like Growth Factor-I and its Binding Proteins: Regulation of Secretion and Mechanism of Action at Receptor Level 51

Mark G. Slomiany and Steven A. Rosenzweig

III. Growth Hormone and Insulin-like Growth Factors and Their Receptors in the Central Nervous System 67

5. Growth Hormone and Insulin-like Growth Factor-I in Human Cerebrospinal Fluid 69

Fred Nyberg

6. Growth Hormone, Insulin, and IGF-I: Do They Interact at the Blood-Brain Barrier? 75

Weihong Pan, Yongmei Yu, Fred Nyberg, and Abba J. Kastin

7. Growth Hormone and Insulin-like Growth Factors in the CNS: Localisation in Mammalian Species 81

Vincenzo C. Russo and George A. Werther

8. Purification of Growth Hormone Receptors from Human Brain Tissues 91

Zhennan Lai and Fred Nyberg

9. Growth Hormone Receptor Message in the Rat and Human CNS: Structure and Function 99

Madeleine Le Greves

IV. CNS Action of Growth Hormone: Basic Studies Using Animal Models 109

10. Interaction of Growth Hormone and Prolactin in Brain Circuits 111

David R. Grattan and Tanja A. E. Mödersheim

11. Growth Hormone and Insulin-like Growth Factor-I and Cellular Regeneration in the Adult Brain 125

N. David Åberg, Maria A. I. Åberg, and Peter S. Eriksson

12. Growth Hormone and Insulin-like Growth Factor-I and Their Effects on Astroglial Gap Junctions 147

N. David Åberg

13. Rodent Models for the Study of the Role of GH-IGF-I or the Insulin Axis in Aging and Longevity: Special Reference to a Transgenic Dwarf Rat Strain and Calorie Restriction 173

Isao Shimokawa

14. Growth Hormone and Insulin-like Growth Factor-I (IGF-I) and Their Interactions with Brain Circuits Involved in Cognitive Function 185
Melinda Ramsey and William E. Sonntag
15. IGF-I and Neuroprotection 209
E. Carro, J. L. Trejo, S. Fernandez, A. M. Fernandez, and I. Torres-Aleman
- V. Immediate and Long-Term Benefits on the CNS and GH Replacement Therapy 217**
16. Quality of Life in Adult GH Deficiency 219
Robert D. Murray and Stephen M. Shalet
17. The Somatotrophic Axis in Psychologic Functioning: Effects on Sleep and Psychopathology 231
Harald Jörn Schneider and Günter Karl Stalla
18. Growth Hormone Replacement Therapy in Adults: Responsiveness Related to Life Quality 237
Åse Krogh Rasmussen and Ulla Feldt-Rasmussen
19. Psychological Importance to the Child of Growth Hormone Replacement 249
John Eric Chaplin, Jovanna Dahlgren, Berit Kriström, and Kerstin Albertsson Wikland
20. Acromegaly and Brain Function: Effects on the Human Brain during Conditions with Increased Growth Hormone Concentrations 267
Sigbritt Werner
21. Human Aging and the Growth Hormone/Insulin-like Growth factor-I axis: The Impact of Growth Factors on Dementia 271
E. Arvat, R. Giordano, Micaela Pellegrino, Fabio Lanfranco, Matteo Baldi, Andreea Picu, Lorenza Bonelli, and E. Ghigo
22. Cognitive Status of Adult GHD Patients and GH-Induced Neuropsychological Changes 287
Jan Berend Deijen and Lucia. I. Arwert
23. Growth Hormone and Insulin-like Growth Factor-I in Alzheimer's Disease 301
José Manuel Gómez
- VI. GH Replacement and Related Therapies in CNS Disorders: A Future Perspective 311**
24. Growth Hormone Antagonists – A Pharmacological Tool in Present and Future Therapies 313
John J. Kopchick, Lingua Qiu, Elahu Gosney, Chad Keller, Amanda Palmer, and Sudha Sankaran
25. Growth Hormone Replacement Therapy and Life Quality: Future Perspectives 327
Peter Sönksen
- Index 335**
