Preface	ix
Preface to the Fourth Edition	xi
Acknowledgments	xiii
Abbreviations	xv
1 Daily Bread	1
1.1 Making Buffers	1
1.2 Protein Determination	1
1.2.1 BCA Assay	2
1.2.2 Bradford Assay	3
1.2.3 Lowry Assay	3
1.2.4 Starcher Assay	3
1.2.5 Protein Concentration	4
1.3 Gels	4
1.3.1 SDS Gels	5
1.3.2 For the Impatient: SDS Electrophoresis Without Stacker	7
1.3.3 Native Gels	8
1.4 Staining Gels	9
1.4.1 Fixing	9
1.4.2 Staining	9
1.4.3 Drying	12
1.5 Precipitation and Concentration	13
1.5.1 Denaturing Precipitation	13
1.5.2 Native Precipitation	14
1.5.3 Concentration	14
1.6 Blotting	15
1.6.1 Protein Staining on Blots	17
1.6.2 Blocking	18
1.6.3 Immunostaining	19
1.6.4 Ca^{2+} Binding	20
1.6.5 Ligand Staining	21
1.7 Autoradiography of Gels and Blots	22
2 Ligand Binding	25
2.1 Radioactive Ligand Marking	26
2.1.1 Iodination of Peptides and Proteins	26
2.1.2 The Day After	28
2.1.3 Iodination of Molecules with Low MW	29
2.1.4 Isolation of Iodized Species	29
2.1.5 Advantages and Disadvantages of Iodination	30
2.1.6 Tritiation	32
2.2 Binding	32
2.2.1 Isolation of Membranes	32
2.2.2 Binding Assay	34
2.2.3 Binding Assays with Membranes	37
2.2.4 Development of Membrane Binding Assays	38
2.2.5 Binding Assays with Soluble Proteins	39
2.2.6 No Binding	55
2.3 Analysis of Binding Data	57
2.3.1 The Binding Reaction in Equilibrium	57
2.3.2 Kinetics	69

2.4	Cross-linking of Ligands	71
2.4.1	Three-component Cross-linking (3C Cross-linking)	72
2.4.2	Photoaffinity Cross-linking	77
2.4.3	Controls for Cross-linking Experiments	79
2.5	Purposes	79
3	Solubilization of Membrane Proteins	83
3.1	Detergents	83
3.1.1	Clean Concepts	83
3.1.2	Handling Detergents	85
3.2	Solubilization	87
3.2.1	Solubilization Criteria	92
3.2.2	Physical Parameters of Solubilized Membrane Proteins	93
4	Protein Detection via Functional Measurements	95
4.1	Translocators	95
4.1.1	Liposomes	96
4.1.2	Proteoliposomes	97
4.2	Reconstitution	98
4.2.1	Reconstitution from a Solution	98
4.2.2	Reconstitution in Preformed Liposomes	100
4.3	Flux Assay	100
4.3.1	Influx Assay	102
4.3.2	Efflux Assay	104
4.4	Constructive Thoughts	105
5	Cleaning and Purifying	109
5.1	Pure Fun	109
5.2	Conventional Purification Methods	113
5.2.1	The Column Technique	113
5.2.2	Purification Based on Size Differences	114
5.2.3	Purification Based on Charge Differences	117
5.2.4	Hydrophobic Chromatography	124
5.2.5	The Blue Gel	125
5.3	Affinity Chromatography	125
5.3.1	Lectin Chromatography	125
5.3.2	Ligand Chromatography	127
5.4	The Purity Test	134
5.5	Profiting	134
6	Antibodies	137
6.1	Production of Polyclonal Antibodies	140
6.1.1	Antigen	140
6.1.2	Adjuvant	141
6.1.3	Injection and Serum Harvesting	142
6.1.4	Purification of Antibodies	143
6.2	Immunoprecipitation	145
6.2.1	Immunoprecipitation with Immobilized Protein A	145
6.2.2	Immunoprecipitation with Immobilized Antibody	146
6.3	Immunoaffinity Chromatography	148
6.4	Antibodies Against Unpurified Proteins	148
6.5	Immunological Detection Techniques	150
7	Proteomics	155
7.1	Introduction	155
7.2	Sample Taking	157

7.3	2D Gel Electrophoresis	161
7.4	Mass Spectroscopy of Peptides and Proteins	165
7.4.1	Mass Spectrometers	165
7.4.2	Sample Preparation for MALDI	170
7.4.3	The Possibilities of MALDI and ESI	172
7.5	Protein Chips	174
7.5.1	Protein Chips with SELDI	174
7.5.2	Fortune Cookies	176
7.5.3	Aptamers	177
7.6	Microsequencing	179
7.6.1	Preparing the Protein	179
7.6.2	Blocked N-Termini	180
7.6.3	Cleaving the Protein into Peptides	181
7.6.4	The Edman Degradation	183
7.6.5	Carboxyterminal Sequencing	183
7.6.6	Ladder Sequencing of Peptides	184
7.7	Strategy	189
8	Subunits	191
8.1	Number and Stoichiometry of Subunits	191
8.1.1	About the Difficulties with Stoichiometry Determinations	191
8.1.2	N&S with X-ray Structural Analysis	192
8.1.3	N&S with Hybridization Experiments	192
8.1.4	N&S with Cross-linking Experiments	194
8.1.5	N&S with Amino Acid Analyses or Antibodies	199
8.2	What Holds Our World Together?	200
9	Glycoproteins	205
9.1	How, Where, and for What Purpose Are Proteins Glycosylated?	205
9.2	Detecting Glycoproteins in Gels	206
9.3	Detection of Glycoproteins on Blots	206
9.3.1	Nonselective Glycoprotein Stain	206
9.3.2	Selective (Lectin) Stain	208
9.4	Deglycosylation	208
9.4.1	Glycosylation Inhibitor	208
9.4.2	Endoglycosidases	210
9.4.3	Chemical Deglycosylation	214
9.5	The Sugar Chains	216
9.5.1	Monosaccharide Composition	216
9.5.2	Structure and Sequence	216
10	Treasure Island: Writing Papers	225
10.1	Of the Paper	225
10.2	Of Writing a Paper	225
11	Desert Planet: Researching the Literature	227
	Last Things	228
Appendix A	Professional Resources	229
A.1	Suppliers	229
A.2	Suppliers by Product	229
Index		231
