CONTRIBUTORS TO VOLUME XXX	xi
PREFACE	xvii
VOLUMES IN SERIES	xix

Section I. Initiation Factors in Protein Synthesis

1. Chain Initiation Factors from <i>Escherichia coli</i>	A. J. WAHBA AND M. J. MILLER	3
2. Electron Microscopic Studies of Chain Initiation Complexes and Polysomes	C. VASQUEZ, M. J. MILLER, AND A. J. WAHBA	19
3. Purification and Phosphorylation of Initiation Factor IF2	JOHN L. FAKUNDING, JOLINDA A. TRAUGH, ROBERT R. TRAUT, AND JOHN W. B. HERSHEY	24
4. Preparation and Properties of Crystalline Initiation Factor 1 (IF1) from <i>Escherichia coli</i>	SYLVIA LEE-HUANG AND SEVERO OCHOA	31
5. Preparation of Radioactive Initiation Factor 3	STEVEN SABOL AND SEVERO OCHOA	39
6. Purification of Two Messenger-Discriminating Species of Initiation Factor 3 (IF3) from <i>Escherichia coli</i>	SYLVIA LEE-HUANG AND SEVERO OCHOA	45
7. Selection of Ribosome Binding Sites on mRNA in <i>Escherichia coli</i> by Cistron-Specific IF3 Subfractions, and Interference Factors	MICHEL REVEL AND YORAM GRONER	54
8. Purification and Properties of Interference Factor i: a Cistron-Specific Translation Control Factor and a Subunit of Phage RNA Replicase	YORAM GRONER AND MICHEL REVEL	68
9. The Initial Steps in Protein Synthesis: Effects by Antibiotics	JUAN MODOLELL	79
10. Preparation and Assay of Ribosome Dissociation Factors from <i>Escherichia coli</i> and Rabbit Reticulocytes and the Assay for Free Ribosomes	MICHAEL GOTTLIEB, NICOLETTE H. LUBSEN, AND BERNARD D. DAVIS	87
11. Protein Chain Initiation in Wheat Embryo	ABRAHAM MARCUS, SAMARENDA N. SEAL, AND DONALD P. WEEKS	94

12. Initiation of Globin Synthesis: Assays	RONALD G. CRYSTAL, NORTON A. ELSON, AND W. FRENCH ANDERSON	101
13. Preparation of Protein Synthesis Initiation Factors IF-M ₁ , IF-M _{2a} , and IF-M _{2b} from Rabbit Reticulocytes	WILLIAM MERRICK, HERMANN GRAF, AND W. FRENCH ANDERSON	128
14. Preparation of Rabbit Reticulocyte Initiation Factor IF-M ₁	PHILIP M. PRICHARD AND W. FRENCH ANDERSON	136
15. Purification and Properties of the Peptide Chain Initiation Factors from Rabbit Reticulocytes	CHARLES L. WOODLEY, YANG C. CHEN, AND NABA K. GUPTA	141
16. Purification and Assays for the Presence and Biological Functions of Two Eukaryotic Initiation Factors from Rabbit Reticulocytes That Are Required for Initiation Complex Formation with Rabbit Reticulocyte Ribosomes	LINDA M. CASHION, GERALDINE L. DETTMAN, AND WENDELL M. STANLEY, JR.	153
17. Preparation of Protein Synthesis Initiation Factors from Rabbit Liver	DANTE PICCIANO AND W. FRENCH ANDERSON	171
18. Isolation, Purification, and Assay of an Initiation Factor from Rat Liver Cytosol That Promotes Binding of Aminoacyl-tRNA to 40 S Ribosomal Subunits	DAVID P. LEADER AND IRA G. WOOL	180
19. Assay of Reassociation of Eukaryotic Ribosomal Subunits Catalyzed by Initiation Factors	RICHARD E. H. WETTENHALL AND IRA G. WOOL	186
20. Purification of Eukaryotic Initiation Factor 1 (EIF1) from <i>Artemia salina</i> Embryos	MICHAEL ZASLOFF AND SEVERO OCHOA	197
21. Assay and Isolation of a 40 S Ribosomal Subunit-MET-tRNA ^{Met} Binding Factor from Rabbit Reticulocytes	J. M. CIMADEVILLA AND B. HARDESTY	206

Section II. Elongation Factors in Protein Synthesis

22. Elongation Factor Tu and the Aminoacyl-tRNA·EFTu·GTP Complex	DAVID LEE MILLER AND HERBERT WEISSBACH	219
23. Elongation Factor T-Dependent GTP Hydrolysis: Dissociation from Aminoacyl-tRNA Binding	J. P. G. BALLESTA	232
24. The Binding of <i>Escherichia coli</i> Elongation Factor G to the Ribosome	JAMES W. BODLEY, HERBERT WEISSBACH, AND NATHAN BROTH	235

25. Binding of the Elongation Factors EF 1 and EF 2 to 80 S Ribosomes in a Cell-Free System from Porcine Brain of the Hypothalamic Region	DIETMAR RICHTER	238
26. Separation of Cytoplasmic and Mitochondrial Elongation Factors from Yeast	DIETMAR RICHTER AND FRITZ LIPMANN	245
27. Soluble Protein Factors and Ribosomal Subunits from Yeast. Interaction with Aminoacyl-tRNA	A. TORAÑO, A. SANDOVAL, AND C. F. HEREDIA	254
28. The Use of Inhibitors in Studies of Protein Synthesis	SIDNEY PESTKA	261
29. The Elongation Steps in Protein Synthesis by Eukaryotic Ribosomes: Effects of Antibiotics	L. CARRASCO, E. BATTANER, AND D. VAZQUEZ	282

Section III. Termination Factors in Protein Synthesis

30. Mammalian Release Factor; <i>in Vitro</i> Assay and Purification	C. T. CASKEY, A. L. BEAUDET, AND W. P. TATE	293
31. An Assay for Protein Chain Termination Using Peptidyl-tRNA	JOHN R. MENNINGER AND CHARLINE WALKER	303

Section IV. Ribosome Structure and Function

32. Preparation and Characterization of Free and Membrane-Bound Polysomes	H. BLOEMENDAL, E. L. BENEDETTI, AND W. S. BONT	313
33. Pressure-Induced Dissociation of Ribosomes	R. BAIERLEIN AND A. A. INFANTE	328
34. The Dissociation of Rat Liver Ribosomes by Formamide: Extraction of a 5S RNA-Protein Complex	MARY L. PETERMANN	346
35. Preparation of Ribosomal Subunits by Large-Scale Zonal Centrifugation	PAUL S. SYPHERD AND JOHN W. WIREMAN	349
36. Separation of Large Quantities of Eukaryotic Ribosomal Subunits by Zonal Ultracentrifugation	CORINNE C. SHERTON, RALPH F. DI CAMELLI, AND IRA G. WOOL	354
37. A General Procedure for the Preparation of Highly Active Eukaryotic Ribosomes and Ribosomal Subunits	GLENN E. BROWN, ALFRED J. KOLB, AND WENDELL M. STANLEY, JR.	368
38. The Characterization of Ribosomal Subunits of Eukaryotes by Ultracentrifugal Techniques. Criteria of Purity	MARY G. HAMILTON	387

39. Hydrogen-Tritium Exchange Studies on Ribosomes	MELVIN V. SIMPSON	395
40. The Inactivation and Reactivation of <i>Escherichia coli</i> Ribosomes	ADA ZAMIR, RUTH MISKIN, ZVI VOGEL, AND DAVID ELSON	406
41. Preparation of [³ H]Anisomycin and [³ H]Goug- erotin: Binding to Eukaryotic Ribosomes	MARIANO BARBACID AND DAVID VAZQUEZ	426
42. Ribonuclease Sensitivity of Aminoacyl-tRNA: An Assay for Codon Recognition and Inter- action of Aminoacyl-tRNA with 50 S Sub- units	SIDNEY PESTKA	439
43. "Nonenzymatic" Translation	L. P. GAVRILOVA AND A. S. SPIRIN	452
44. Assay for Nonenzymatic and Enzymatic Translocation with <i>Escherichia coli</i> Ribo- somes	SIDNEY PESTKA	462
45. Peptidyl-Puromycin Synthesis on Polyribo- somes from <i>Escherichia coli</i>	SIDNEY PESTKA	470
46. Peptidyl-Puromycin Synthesis on Polyribo- somes from Rat Liver or Brain	SIDNEY PESTKA	479
47. Assay of Ester and Polyester Formation by the Ribosomal Peptidyltransferase	STEPHEN FAHNESTOCK, HELMUT NEUMANN, AND ALEXANDER RICH	489
48. Two-Dimensional Polyacrylamide Gel Elec- trophoresis for Separation of Ribosomal Proteins	H. G. WITTMANN	497
49. Two-Dimensional Polyacrylamide Gel Elec- trophoresis of Eukaryotic Ribosomal Pro- teins	CORINNE C. SHERTON AND IRA G. WOOL	506
50. A Modified Two-Dimensional Gel System for the Separation and Radioautography of Microgram Amounts of Ribosomal Proteins	G. A. HOWARD AND R. R. TRAUT	526
51. Estimation of the Number and Size of Ribo- somal Proteins by Two-Dimensional Gel Electrophoresis	MARY G. HAMILTON	540
52. Determination of Ribosomal Protein Molecu- lar Weight Distributions from Stained Dodecyl Sulfate Gels	T. A. BICKLE AND R. R. TRAUT	545
53. Reconstitution of 50 S Ribosomal Subunits from <i>Bacillus stearothermophilus</i>	S. FAHNESTOCK, V. ERDMANN, AND M. NOMURA	554

54. Isotopic Labeling and Analysis of Phospho- proteins from Mammalian Ribosomes	LAWRENCE BITTE AND DAVID KABAT	563
55. Phosphorylation of Ribosomal Proteins: Prep- aration of Rat Liver Ribosomal Protein Kinases. Assay of the Phosphorylation of Ribosomal Subunit Proteins. Assay of the Function of Phosphorylated Ribosomes	CHARLES EIL AND IRA G. WOOL	590

Section V. Messenger RNA and Protein Synthesizing Systems

56. The Isolation of Messenger RNA from Mam- malian Cells	GEORGE BRAWERMAN	605
57. Isolation of Rabbit Reticulocyte 9 S mRNA	BERNARD LEBLEU	613
58. Preparation of Globin Messenger RNA	ARTHUR W. NIENHUIS, AMY K. FALVEY, AND W. FRENCH ANDERSON	621
59. Immunoadsorption of Ovalbumin Synthesizing Polysomes and Partial Purification of Oval- bumin Messenger RNA	ROBERT T. SCHIMKE, RAFAEL PALACIOS, DREW SULLIVAN, MARY L. KIELY, CARMEN GONZALES, AND JOHN M. TAYLOR	631
60. The Purification of the Messenger RNA for Silk Fibroin	DONALD D. BROWN AND YOSHIAKI SUZUKI	648
61. DNA- and RNA-Directed Synthesis <i>in Vitro</i> of Phage Enzymes	PETER HERRLICH AND MANFRED SCHWEIGER	654
62. Cell-Free Synthesis of Myosin	STUART M. HEYWOOD AND ARTHUR W. ROURKE	669
63. Translation of mRNA from Vertebrate Eye Lenses	ANTON J. M. BERNIS AND HANS BLOEMENDAL	675
64. Assay of Ovalbumin mRNA in Reticulocyte Lysate	ROBERT T. SCHIMKE, ROBERT E. RHOADS, AND G. STANLEY MCKNIGHT	694
65. Isolation on Cellulose of Ovalbumin and Globin mRNA and Their Translation in an Ascites Cell-Free System	GUNTHER SCHUTZ, MIGUEL BEATO, AND PHILIP FEIGELSON	701
66. Translation of Reovirus mRNA, Poliovirus RNA, and Bacteriophage Q β RNA in Cell- Free Extracts of Mammalian Cells	LYDIA VILLA-KOMAROFF, MAXSON MCDOWELL, DAVID BALTIMORE, AND HARVEY F. LODISH	709
67a. Protein Synthesis with Rabbit Reticulocyte Preparations	WILLIAM R. WOODWARD, JOEL L. IVEY, AND EDWARD HERBERT	724

67b. Preparation and Characterization of an Inhibitor of Globin Synthesis from the Post-ribosomal Supernatant of Reticulocyte Lysates	WILLIAM R. WOODWARD AND EDWARD HERBERT	731
67c. Preparation of Reticulocyte Aminoacyl-tRNA and the Assay of Codon Recognition Properties of Isoacceptor tRNA's in a Reticulocyte Cell-Free System	WILLIAM R. WOODWARD, PRAPON WILAIRAT, AND EDWARD HERBERT	740
67d. Preparation and Analysis of Nascent Chains on Reticulocyte Membrane-Bound Ribosomes	WILLIAM R. WOODWARD AND EDWARD HERBERT	746
68. The Wheat Embryo Cell-Free System	ABRAHAM MARCUS, DOV EFRON, AND DONALD P. WEEKS	749
69. <i>In Vitro</i> Translation of STNV-RNA	JOHN M. CLARK, JR. AND WILLIAM H. KLEIN	754
