
Table of Contents

Chapter 1

Mammalian Glycosylation: An Overview of Carbohydrate Biosynthesis.....1

Hao Chen, Zhiyun Wang, Zhonghui Sun, Eun Jeong Kim, and Kevin J. Yarema

Chapter 2

Patterning of Lectins of Vero and MDCK Cells and Influenza Viruses:

The Search for Additional Virus/Cell Interactions.....49

E. M. Rapoport, L.V. Mochalova, H.-J. Gabius, J. Romanova, and N.V. Bovin

Chapter 3

O-Acetyl Sialic Acids in Parasitic Diseases71

Anil Kumar Chava, Mitali Chatterjee, and Chitra Mandal

Chapter 4

Congenital Disorders of Glycosylation.....99

Jerzy Kościelak

Chapter 5

Role of Milk Carbohydrates in Preventing Bacterial Adhesion141

Pablo Hueso, Samuel Martín-Sosa, and María-Jesús Martín

Chapter 6

Structural Characterization of Glycosaminoglycans.....177

Kevin Pojasek, Rahul Raman, and Ram Sasisekharan

Chapter 7

Carrageenans: Structural and Conformational Studies211

Carlos A. Stortz

Chapter 8

Computational Modeling in Glycosylation.....247

Michael P. Murrell, Kevin J. Yarema, and Andre Levchenko

Chapter 9

Biosynthetic Pathways for Differential Expression of Functional

Chondroitin Sulfate and Heparan Sulfate289

*Shuji Mizumoto, Toru Uyama, Tadahisa Mikami, Hiroshi Kitagawa,
and Kazuyuki Sugahara*

Chapter 10

Large-Scale Production of Oligosaccharides Using Engineered Bacteria.....325

Satoshi Koizumi

Chapter 11	
Fructan Biosynthesis in Genetically Modified Plants.....	339
<i>Andrew J. Cairns and Sophie J. Perret</i>	
Chapter 12	
Chinese Hamster Ovary (CHO) Glycosylation Mutants for Glycan Engineering.....	371
<i>Pamela Stanley and Santosh K. Patnaik</i>	
Chapter 13	
Biochemical Engineering of Sialic Acids	387
<i>Stephan Hinderlich, Cornelia Oetke, and Michael Pawlita</i>	
Chapter 14	
Glycosylation in Native and Engineered Insect Cells	407
<i>Karthik Viswanathan and Michael J. Betenbaugh</i>	
Chapter 15	
N-Glycan Engineering in Yeasts and Fungi: Progress toward Human-Like Glycosylation	431
<i>Nico Callewaert, Wouter Vervecken, Steven Geysens, and Roland Contreras</i>	
Chapter 16	
Bacterial Capsules: A Route for Polysaccharide Engineering.....	479
<i>Clare M. Taylor and Ian S. Roberts</i>	
Chapter 17	
Chemo-Biological Approach to Modification of the Bacterial Cell Wall	495
<i>Reiko Sadamoto and Shin-Ichiro Nishimura</i>	
Chapter 18	
Engineering Bacterial Biopolymers for the Biosorption of Heavy Metals	507
<i>Horacio Bach and David L. Gutnick</i>	
Chapter 19	
Treatment of Wastewaters with the Biopolymer Chitosan	535
<i>Hong Kyoon No, Witoon Prinyawiwatkul, and Samuel P. Meyers</i>	
Chapter 20	
The Role of Glycosylation in Engineered Antibodies	563
<i>Sherie L. Morrison</i>	

Chapter 21	
Recent Developments in the Synthesis of Oligosaccharides by Hyperthermophilic Glycosidases	587
<i>Marco Moracci, Beatrice Cobucci-Ponzano, Giuseppe Perugino, Assunta Giordano, Antonio Trincone, and Mosé Rossi</i>	
Chapter 22	
Modification of Plant Cell Wall Polysaccharides Using Enzymes from <i>Aspergillus</i>	613
<i>Ronald P. de Vries, Maureen C. McCann, and Jaap Visser</i>	
Chapter 23	
β -Glucosidases from Filamentous Fungi: Properties, Structure, and Applications	645
<i>Jaime Eyzaguirre, Mauricio Hidalgo, and Andrés Leschot</i>	
Chapter 24	
Sialic Acids and Sialylmimetics: Useful Chemical Probes of Sialic Acid-Recognizing Proteins	687
<i>Jennifer C. Wilson, Milton J. Kiefel, and Mark von Itzstein</i>	
Chapter 25	
Engineering Carbohydrate Scaffolds into the Side Chains of Amino Acids and Use in Combinatorial Synthesis.....	749
<i>Frank Schweizer</i>	
Chapter 26	
Effects of Short- and Long-Chain Fructans on Large Intestinal Physiology and Development of Preneoplastic Lesions in Rats.....	781
<i>Morten Poulsen</i>	
Chapter 27	
Alginate as a Drug Delivery Carrier	799
<i>Rajesh Pandey and G.K. Khuller</i>	
Chapter 28	
Chitosan-Based Nonviral Vectors for Gene Delivery	817
<i>Wen Guang Liu, William W. Lu, and Kang De Yao</i>	
Chapter 29	
Polysaccharides in Tissue Engineering Applications.....	837
<i>Dietmar W. Hutmacher, David T.W. Leong, and Fulin Chen</i>	
Index	895
