<i>List of Contributors</i>	v
<i>Preface</i>	vii
<i>Contents of Volume II</i>	xiii
<i>Introduction</i>	xv

Chapter 1. Systematics of the Phylum Protozoa

JOHN O. CORLISS

I. Introductory Considerations	1
II. Principal Groups of Protozoa	3
III. The Flagellates	8
IV. The Sarcodinids	11
V. The Sporozoa and Cnidospora	13
VI. The Ciliates	15
References	18

Chapter 2. Chemical Aspects of Ecology

E. FAURÉ-FREMIET

I. The Environment and Its Physicochemical Characteristics	21
II. Preferential Nutrition	29
III. Population Kinetics	34
IV. Population Dynamics	40
V. Structure of the Microbiocoenoses	45
References	48

Chapter 3. Carbohydrates and Respiration

JOHN F. RYLEY

I. Introduction	55
II. Chemical Nature of Storage Polysaccharides	57
III. Synthesis and Utilization of Storage Polysaccharides	62
IV. Significance of Storage Polysaccharides	64
V. Carbohydrate Metabolism and Respiration	69

VI. Conclusions	87
References	88

Chapter 4. Nitrogen: Distribution, Nutrition, and Metabolism

GEORGE W. KIDDER

I. Introduction	93
II. Nutritional Requirements	94
III. Nitrogen Metabolism	107
IV. Nitrogen Excretion	137
V. Miscellaneous	144
References	152

Chapter 5. Lipid Composition, Nutrition, and Metabolism

VIRGINIA C. DEWEY

I. Introduction	162
II. Distribution in Protozoa	170
III. Nutritional Requirements	218
IV. Metabolism of Lipids	232
V. Antimetabolites, Analogs, and Inhibitors	250
VI. Summary and Conclusions	258
References	259

Chapter 6. Growth Factors in Protozoa

DANIEL M. LILLY

I. General Conditions Affecting Growth Factors	275
II. Chemically Identified Factors	286
III. Chemically Unidentified Factors	297
References	304

Chapter 7. Transport Phenomena in Protozoa

ROBERT L. CONNER

I. Introduction	309
II. Water Movement	312
III. Ion Transport	313
IV. Carbohydrates	331
V. Organic Acids	333
VI. Amino Acids	334
VII. Lipid Transport	334
VIII. Bulk Transport	336
References	345
Addenda	349

Chapter 8. Digestion

MIKLÓS MÜLLER

I. Introduction	351
II. Morphology	352
III. Hydrolases in Protozoa	354
IV. Secretion of Enzymes into the Medium	361
V. Intracellular Localization of Hydrolases	362
VI. Dynamics of Enzymic Activity	367
VII. Comments	372
References	376

Chapter 9. The Chemistry of Protozoan Cilia and Flagella

FRANK M. CHILD

I. Introduction	381
II. Chemistry of Algal Flagella	382
III. Chemistry of Cilia of <i>Tetrahymena</i>	383
IV. Chemistry of the Immobilization Antigen	386
V. Chemistry of Basal Bodies	386
VI. Addendum	387
References	391

Chapter 10. Protozoan Development

EARL D. HANSON

I. Introduction	395
II. The Patterns of Protozoan Development	397
III. Discussion and Conclusions	517
References	531

Chapter 11. Nucleic Acids of Protozoa

MANLEY MANDEL

I. Introduction	541
II. Gross Analysis of Protozoa for Nucleic Acid Content	542
III. Nucleotide Composition	545
IV. Growth and Nucleic Acid Synthesis	563
V. Conclusions	566
References	568

Chapter 12. Carbohydrate Accumulation in the Protist—A
Biochemical Model of Differentiation

RICHARD G. PANNBACHER AND BARBARA E. WRIGHT

I. Introduction	573
II. Accumulation of Carbohydrates in Protists	574

III. Mechanisms of Carbohydrate Accumulation	592
IV. Summary	611
References	612

Chapter 13. Chemical Genetics of Protozoa

SALLY LYMAN ALLEN

I. Introduction	617
II. Genetic Mechanisms in Protozoa	618
III. Chromosomal and Biochemical Genetics of <i>Chlamydomonas</i>	627
IV. Breeding Analysis in Ciliates	639
V. Extranuclear Genes	651
VI. Genes and Protein Subunits	665
VII. Summary	683
References	684

Chapter 14. Chemistry of Parasitism among Some Protozoa

B. M. HONICBERG

I. Introduction	695
II. Mutualistic Flagellates of Xylophagous Insects	698
III. Trichomonad Flagellates	708
IV. Trypanosomatid Flagellates	711
V. Malarial Parasites	759
References	802
