CHAPTER 1

Phylogenetic Perspectives in Vertebrate Endocrinology

E. J. W. BARRINGTON

I	Introduction		1
II	Vertebrates and Invertebrates		3
	A. Protostomes and Deuterostomes		3
	B. Evolutionary Trends in the Deuterostomes		4
III	Agnathans and Gnathostomes		7
	A. Agnathan Relationships		7
	B. Gnathostome Relationships		11
IV	The Analysis of Evolutionary History		13
	A. The Concept of Homology		13
	B. Biochemical and Physiological Aspects of Homology		15
	C. Evolutionary Principles and Vertebrate Endocrinology		16
V	Steroid Hormones		19
	A. Patterns of Production		19
	B. Adaptive Diversification of Hormones and Targets		23
VI	The Iodination of Tyrosine		26
	A. Thyroidal Biosynthesis and the Endostyle		26
	B. Functional Significance of the Iodothyronines		29
	C. Phylogenetic Distribution of the Iodothyronines		32
	D. The Interpretation of Iodine Binding in Ascidians		36

VII	Concluding Reflections	38
	A. Steroid Hormones and Iodothyronines	38
	B. Catechol Hormones	39
	C. Insulin	40
	D. Aspects of Pituitary Organization	40
	E. Perspectives in the Forest	43
References		44

CHAPTER 2

Salt and Water Metabolism

J. MAETZ

I	Introduction	47
II	Basic Facts about Water and Salt Metabolism	48
	A. Physico-chemical Laws Governing Water Movement	48
	B. Physico-chemical Laws Governing Salt Metabolism	56
	C. Brief Survey of Biological Membranes Transporting Water and Salt in the Lower Vertebrates	63
III	Possible Modes of Endocrine Action	73
	A. Action on Water Permeability of the Isolated Amphibian Skin or Bladder	74
	B. Action on the Active Transport of Ions by Isolated Amphibian Skin and Bladder	80
	C. Action of Hormones on the Amphibian Kidney	87
	D. Discussion on the Physiological Significance of the Hydro-osmotic and Natriferic Effects on Amphibian Target-organs and Related Effectors	93
IV	Possible Integration of Hormonal Action in a Regulatory Servomechanism	105
	A. Neurosecretion and Osmoregulation	106
	B. Adrenocortical Hormones and Ionoregulation	117
	C. Other Pituitary Hormones involved in Water and Salt Metabolism	135
V	Conclusion	146
References		148

Patterns of Ovarian Activity

W. A. BARR

I	Ovarian Development and Oogenesis	..	..	..	164
	A. Ovarian Development	..	..	..	164
	B. Oogenesis	..	..	..	166
II	Structure of the Ovary	..	..	..	167
	A. Adult Structure	..	..	..	167
	B. Follicular Membranes	..	..	..	168
	C. Sexual Characteristics Associated with Ovarian Function	..	..	..	169
III	Ovarian Cycle and Ovulation	..	..	..	171
	A. Growth and Maturation of the Oocyte	..	..	..	171
	B. The Ovarian Cycle in Oviparous Species	..	..	..	171
	C. Viviparity	..	..	..	177
IV	Derivatives of the Follicular Tissue	..	..	..	179
	A. Origin and Structure of the Corpus Atreticum	..	..	..	180
	B. Origin and Structure of the Corpus Luteum	..	..	..	181
	C. Endocrine Function of Follicular Derivatives	..	..	..	182
V	Hypophyseal-Ovarian Relationships	..	..	..	184
	A. The Effect of Hypophysectomy on the Ovary	..	..	..	185
	B. The Effect of Hypophysectomy and Administration of Gonadotrophin on the Oviduct and Secondary Sexual Characters	..	..	..	188
	C. The Effect of Pituitary Preparations on the Ovary	..	..	..	189
	D. Gonadotrophin Content of the Pituitary	..	..	..	195
	E. Evidence for the Presence of FSH and LH in the Pituitary of Lower Vertebrates	..	..	..	198
	F. Specificity of Gonadotrophins	..	..	..	198
VI	Endocrinology of the Ovary	..	..	..	203
	A. Steroid Production	..	..	..	203
	B. Endocrine Function of the Ovary	..	..	..	215
	C. Endocrine Control of the Sexual Cycle in Oviparous Species	..	..	..	225
	D. Hormonal Regulation of Gestation	..	..	..	228
VII	Conclusion	..	..	..	231
	References	..	..	..	232

Patterns of Testicular Activity

B. LOFTS

I	Introduction	239
II	Patterns of Spermatogenic Activity	240
	A. Cystic and Non-cystic Spermatogenesis	240
	B. The Seminiferous Epithelium	244
	C. Seasonal Cycles	249
	D. Continuous and Potentially Continuous Cycles	254
III	Patterns of Interstitial Cell Activity	255
	A. Interstitial Cells and Boundary Cells	257
	B. Seasonal Cycles	259
IV	Pituitary Control of Testis Function	269
V	Spermatogenesis and Intra-testicular Regulators	274
	A. Androgens and Spermatogenesis	274
	B. Cyclical Activity in Sertoli Cells	282
	C. Sertoli Cells and Steroid Synthesis	295
	D. Gonadotropins and Sertoli Cell Activity	298
	References	299

CHAPTER 5

Migration

HENRI J. A. KOCH

I	Introduction	305
II	The Cyclostomata	306
III	The Sticklebacks	309
IV	Salmonids	312
	A. <i>Salmo Salar</i>	312
	B. The Pacific Salmon of the Genus <i>Oncorhynchus</i>	325
	C. Other Salmonids	330
V	The Eels	333
VI	Amphibia	340
VII	Conclusion	342
	References	343

CHAPTER 6

Hormonal Control of Reproductive and Parental Behaviour in Fishes

BERTHA BAGGERMAN

I	Introduction	351
II	Endocrine and Behavioural Aspects of Investigations on Hormones and Behaviour	352
	A. Endocrine Aspects	353
	B. Behavioural Aspects	356
III	The Influence of Hormones on Reproductive and Parental Behaviour Patterns	360
	A. Aggressive Behaviour	361
	B. Nest-building Behaviour	372
	C. Courtship (Sexual) Behaviour	375
	D. Parental (Brooding) Behaviour	387
	E. Conclusions and Discussion	391
IV	The Localization and Mechanism of Hormone Action ..	397
	A. The Localization of Hormone Action	397
	B. Mechanism of Hormone Action in the Adults ..	399
	C. The Influence of Hormones During Ontogenetical Development	402
References		403

CHAPTER 7

The Analysis and Identification of the Hormone-producing Cells of the Adenohypophysis

P. G. W. J. VAN OORDT

I	Introduction	405
II	Amphibia	412
	A. Morphological Cell Types in the Pars Distalis ..	412
	B. Morphological Cell Types in the Pars Tuberalis and the Pars Intermedia	420
	C. Functional Cell Types	422
	D. Summary	427
III	Dipnoi	428

IV	Actinopterygii	431
	A. Polypterini	433
	B. Sturgeons and Holostei	435
	C. Teleostei	436
V	Elasmobranchii and Holocephali	451
VI	Cyclostomata	455
References		460

CHAPTER 8

Central Nervous Control of Adenohypophysial Functions

C. BARKER JØRGENSEN

I	Introduction	469
II	Function of the Adenohypophysis Deprived of Hypothalamic Contact	472
	A. Pars Distalis	472
	B. Pars Intermedia	486
III	Localization of Hypophysis-Controlling Central Nervous Regions in Amphibians	488
	A. Pars Distalis Controlling Structures	489
	B. Pars Intermedia Controlling Structures	494
IV	Nature of Central Nervous Control of Adenohypophysial Functions	496
	A. Control of Amphibian Pars Distalis	496
	B. Control of Amphibian Pars Intermedia	506
	C. Control Mechanisms in Fishes and Cyclostomes	513
V	Neuroendocrine Interactions	523
	A. The Ovarian Cycle and Its Regulation in the Toad	524
	B. Amphibian Metamorphosis	528
	C. Colour Control in Amphibians	530
VI	Summary and Conclusions	532
Acknowledgements		534
References		535
Author Index		543
Subject Index		561
