

Contents of Volume 2

Preface.....	v
Contributors to Volume 2.....	vii
Contents of Volume 1.	xiii

Biological Membranes

Edward D. Korn

I. Introduction.	2
II. Myelin	4
III. Plasma Membrane.	11
IV. Erythrocyte Plasma Membrane.	15
V. Endoplasmic Reticulum.	21
VI. Mitochondrion	27
VII. Retinal Receptors	40
VIII. Chloroplast	43
IX. Gram-Positive Bacteria.	49
X. Gram-Negative Bacteria.	52
XI. Concluding Remarks.	56
References.	57

Chemical-Relaxation Methods

George H. Czerlinski

I. Introduction.	70
II. Fundamentals.	72
III. Perturbation Techniques	88
IV. Competitive Inhibition of Enzyme Reactions.	106
V. Allosteric Enzyme Reactions.	129
VI. Utilization of Chemical Relaxation in Biology.	139
References.	155

Chemiosmotic Coupling and Energy Transduction*Peter Mitchell*

I. Introduction.....	160
II. Basic Chemicomotive Systems: Primary Chemical Cells	166
III. Energetic Processes Related to Component-Specific and Phase-Specific Potentials	173
IV. Factors Determining the Signs and Magnitudes of the Contributions of $\Delta\psi$ and $-Z\Delta pH$ to the Total Proton-motive Force Δp	192
V. Electric and Chemical Profiles across the Coupling Membrane	206
VI. Postscript	211
References.....	215

Time-Lapse Microcinematography in Cell Biology*Andrew Bajer*

I. Introduction	217
II. Microscopes and Illumination	219
III. Camera and Time-Lapse Equipment	250
IV. Analysis of Results, and Artifacts.	262
V. Conclusions.	265
References.....	267

The Structure and Arrangement of Viral Nucleic Acids*Heather D. Mayor*

I. Introduction.	269
II. Terminology and Basic Units of Measurement	271
III. Techniques for Examining Viral Nucleic Acids in the Electron Microscope.	273
IV. Studies on Primary Structure of Nucleic Acids with the Electron Microscope	275
V. Studies on Secondary Structure of Viral Nucleic Acid Molecules with the Electron Microscope.	277

VI. Studies on Tertiary Structure of Nucleic Acids with the Electron Microscope.	314
VII. Future Horizons.	319
References.	321
Author Index	327
Subject Index	339
