

Tsetse: The future for biological methods in integrated control

Preface	7
Contributors	10
Systematics	13
Divisions of the genus <i>Glossina</i>	13
The species and subspecies of <i>Glossina</i>	18
The phylogeny of <i>Glossina</i>	21
Control Methods	23
Status and Future of Control	35
<i>Glossina</i> control today	36
The search for and evaluation of insecticides	38
The aerial application of insecticides for <i>Glossina</i> control	38
Insecticide applications and integrated control approaches	43
Predators	45
The predators of tsetse	45
Predator-tsetse relationships	49
Estimation of the importance of predation	53
Role of predators in biological control	53
Parasitoids	57
<i>Syntomosphyrum</i> spp.	58
<i>Mutilla</i> spp.	63
Bombyliidae	66
Other parasitoids	70
Possibilities of using introduced parasitoids	72
Pathology and Nematode Parasitism	75
Symbiotes	76
Bacteria and spirochaetes	78
Fungi	79
Protozoa	80
Viruses and Rickettsiae	82
Nematodes	82
Experiments with organisms from hosts other than <i>Glossina</i>	88
Physiology	93
Larva and puparium	93
Adult	95
Distribution and Bionomics	99
Activity	101
Dispersal	102
Resting sites	103
Food preferences	104
Sampling	105
Trapping Technology	109
Screens	109

Falling cages and artificial refuges	109
Traps proper	111
Behaviour of glossinids and attraction to traps	113
Trap efficiency	115
Quality of sampling	121
The use of traps	122
Mass Rearing Using Animals for Feeding	125
Colonies in Africa	125
European colonies	128
Other colonies	132
Basic conditions for tsetse colonizations	132
Comparison of different techniques	133
Productivity of laboratory-reared tsetse	138
Mass Production Using <i>In Vitro</i> Feeding	141
<i>In vitro</i> feeding techniques	141
Requirements for <i>in vitro</i> feeding	141
History of <i>in vitro</i> feeding	142
Present status of <i>in vitro</i> feeding	143
Bacterial infection in the <i>in vitro</i> feeding technique	145
Treatment against bacterial infection	146
Mass Production of Parasitoids, Parasites, and Pathogens	149
Insect parasitoids	149
Microbial pathogens	152
Specific pathogens	154
Mermithid nematodes	154
Public Health and Environmental Safety	157
Predators and parasitoids of pest and vector arthropods	158
Pathogens	159
Major requirements for testing biological control agents	159
Identification and characterization of biological control agents	164
Human safety	165
Prediction and prevention of possible hazards	166
Environmental safety	168
Training in Biological and Integrated Control	171
Biocontrol Prospects in Future Integrated Tsetse Control Programs	177
Bibliography	187
Index	211
