Foreword	ix
Preface	xi
1 Theodor Escherich (1857–1911): A Biographical Note <i>M. Sussman</i>	1
I Reviews	
2 <i>Escherichia coli</i> in Human and Animal Disease <i>M. Sussman</i>	7
3 <i>Escherichia coli</i> as a Pathogen in Animals <i>J. A. Morris and W. J. Sojka</i>	47
4 Adhesins and Colonization Factors of <i>Escherichia coli</i> <i>S. H. Parry and Diana M. Rooke</i>	79
5 Cell Surface Components and Virulence: <i>Escherichia coli</i> O and K Antigens in Relation to Virulence and Pathogenicity <i>K. Jann and Barbara Jann</i>	157
6 Toxins Affecting Intestinal Transport Processes <i>J. Holmgren</i>	177
7 Candidate Virulence Markers <i>E. Griffiths</i>	193
8 Genetics of <i>Escherichia coli</i> Virulence <i>H. R. Smith, Sylvia M. Scotland and B. Rowe</i>	227
9 The Immune Response to <i>Escherichia coli</i> <i>P. Porter, J. R. Powell, W. D. Allen and Margaret A. Linggood</i>	271

II Methods

- 10 Haemagglutination Methods in the Study of *Escherichia coli*
D. C. Old 287
- 11 Biotyping of *Escherichia coli*: Methods and Applications
Pamela B. Crichton and D. C. Old 315
- 12 *In Vitro* Techniques for the Attachment of *Escherichia coli* to
Epithelial Cells
C. J. Thorns and J. A. Morris 333
- 13 Method for Investigating Bacterial Adherence to Isolated
Uroepithelial Cells and Uromucoid
*M. J. Harber, Susan Chick, Ruth Mackenzie
and A. W. Asscher* 339
- 14 Serotyping of *Escherichia coli*
R. J. Gross and B. Rowe 345
- 15 Isolation and Characterization of Lipopolysaccharides (O and
R Antigens) from *Escherichia coli*
K. Jann 365
- 16 Isolation and Characterization of Capsular Polysaccharides (K
Antigens) from *Escherichia coli*
K. Jann 375
- 17 Isolation and Characterization of Fimbriae from *Escherichia
coli*
K. Jann 381
- 18 Polystyrene Tube Bioluminescence Assay for Bacterial
Adherence
M. J. Harber, Ruth Mackenzie and A. W. Asscher 389
- 19 Laboratory Tests for Enterotoxin Production, Enteroinvasion
and Adhesion in Diarrhoeagenic *Escherichia coli*
Sylvia M. Scotland, R. J. Gross and B. Rowe 395
- 20 Demonstration of Enterotoxigenic *Escherichia coli* in
Paraffin-embedded Tissue Sections by an Immunoperoxidase
Technique
J. Bailey, G. A. H. Wells and D. J. Sheehan 407

CONTENTS

xv

21	Growth of <i>Escherichia coli</i> under Iron-restricted Conditions <i>Pauline Stevenson and E. Griffiths</i>	413
22	Detection of Synthesis of the Hydroxamate Siderophore Aerobactin by Pathogenic Isolates of <i>Escherichia coli</i> <i>N. H. Carbonetti and P. H. Williams</i>	419
23	Detection of α -Haemolysin Production by Clinical Isolates of <i>Escherichia coli</i> <i>N. Mackman and P. H. Williams</i>	425
24	Testing for Carriage of Virulence Factors by Plasmids <i>C. R. Harwood and I. M. Feavers</i>	429
25	Measurement of the Bactericidal Activity of Serum <i>P. W. Taylor</i>	445
26	Detection of Antibodies and Antigens by Immunoblotting <i>Pauline Stevenson and E. Griffiths</i>	457
	Index	465
