CONTRIBUTORS TO VOLUME XII, PART A	v
PREFACE	ix
PREVIOUS VOLUMES	xviii
VOLUMES IN PREPARATION	xix

Section I. Nucleic Acid Components

<i>Previously Published Articles from Methods in Enzymology Related to Section I</i>	<i>2</i>
--	----------

A. Purines and Pyrimidines

1. Xanthine Oxidase from Bovine Small Intestine	G. G. ROUSSOS	5
2. Synthesis of Aminoacyl- N^{10} Adenines	A. H. SCHEIN AND J. BRINK	16
3. Isolation of Thymine Dimers	HELGE L. GÜNTHER AND WILLIAM H. PRUSOFF	19
4. The Reaction of Hydrazine with Pyrimidine Bases	D. M. BROWN	31
5. The Reaction of Hydroxylamine with Pyrimidine Bases	JOHN H. PHILLIPS	34
6. Reduction of Pyrimidines	ARNOLD H. SCHEIN AND FLORENCE T. SCHEIN	38
7. Photosensitized Oxidation of Purines and Pyrimidines	MELVIN SIMON	45
8. Thymine 7-Hydroxylase	MITCHEL T. ABBOTT	47
9. Uracil and Thymine Reductases	D. HUNNINGHAKE AND SANTIAGO GRISOLIA	50

B. Nucleosides and Nucleotides

10. Techniques for Total Synthesis of Nucleosides	IRIS WEMPEN AND JACK J. FOX	59
11. Synthesis of Nucleoside Derivatives by Conversion from Preformed Nucleosides	IRIS WEMPEN AND JACK J. FOX	76
12. The Use of the Borate Complex	J. X. KHYM	93

13. The Isolation and Characterization of Pseudouridine	WALDO E. COHN	101
14. The Thiobarbituric Acid Method for Deoxyribonucleosides	L. D. SASLAW AND V. S. WARAVDEKAR	108
15. Purine Nucleoside Phosphorylases	H. L. A. TARR	113
16. Pyrimidine Nucleoside and Deoxynucleoside Phosphorylases	W. E. RAZZELL	118
17. A Purified Nonspecific Adenosine Deaminase from Taka-Diastase	T. K. SHARPLESS AND RICHARD WOLFENDEN	126
18. Ribonucleoside Cyclic Phosphates	D. SHUGAR	131
19. Isolation and Characterization of Dihydropyrimidic Acid from RNA	JAMES T. MADISON	137
20. Chemical Methylation of Nucleic Acid Components	BEVERLY E. GRIFFIN	141
21. Mammalian Ribonucleoside Diphosphate Reductases	E. COLLEEN MOORE	155
22. Adenylate Deaminase from Calf Brain	BARBARA SETLOW AND J. M. LOWENSTEIN	164
23. Deoxycytidylate Deaminase	FRANK MALEY	170
24a. Chemical Syntheses of Specifically α -, β -, and γ - ^{32}P -Labeled Nucleoside 5'-Triphosphates	J. G. MOFFATT	182
24b. Biosynthetic Preparation of ^{32}P -Labeled Nucleoside 5'-Phosphates and Derivatives	ROBERT B. HURLBERT AND N. BURR FURLONG	193

Section II. Preparation and Separation of Oligonucleotides

<i>Previously Published Articles from Methods in Enzymology Related to Section II</i>	204
---	-----

A. Preparation of Oligonucleotides

25. The Preparation of Pyrimidine Oligonucleotides by Acid Hydrolysis of DNA	HERMAN S. SHAPIRO	205
26. The Preparation of Purine Oligonucleotides by Hydrazinolysis of DNA	HERMAN S. SHAPIRO	212
27. Controlled Partial Hydrolysis of RNA	ROBERT M. BOCK	218
28. Preparation of Apurinic Acid and of Oligodeoxyribonucleotides with Formic Acid and Diphenylamine	K. BURTON	222

29. Alkaline Hydrolysis of RNA	R. M. BOCK	224
30a. Ribonuclease T ₁ from Taka-Diastase	TSUNEKO UCHIDA AND FUJIO EGAMI	228
30b. Ribonuclease T ₂ from Taka-Diastase	TSUNEKO UCHIDA AND FUJIO EGAMI	239
31. An Endonuclease from <i>Neurospora crassa</i> Specific for Polynucleotides Lacking an Ordered Structure	STUART LINN	247
32. Preparation of Oligoribonucleotides with RNase I	W. E. RAZZELL	255
33. Micrococcal Nuclease	K. K. REDDI	257
34a. An Exonuclease Induced by Bacteriophage Lambda	JOHN W. LITTLE	263
34b. Preparation of <i>Mustelus canis</i> Liver Deoxy- ribonuclease	HILARY ASHE AND LAWRENCE LEVINE	270
B. Separation Techniques		
35. Radioactivity Detection—Continuous Count- ing	J. A. HUNT	273
36. Paper Chromatography and Characterization of Oligodeoxyribonucleotides	M. LASKOWSKI, SR.	281
37. Partition Chromatography of Nucleic Acid Components (Isolation of the Minor Nu- cleosides)	ROSS H. HALL	305
38a. Techniques for Elution of Nucleic Acid Com- ponents from Paper	LEON A. HEPPEL	316
38b. Ultraviolet Photography of Paper-Chromat- ographed Nucleic Acid Components	LEON A. HEPPEL	317
39. Chromatographic Characterization of Oligo- nucleotides on DEAE Paper	N. BURR FURLONG	318
40. Thin-Layer Separation Methods for Nucleic Acid Derivatives	KURT RANDEATH AND ERIKA RANDEATH	323
41. Ion-Exchange Paper Techniques for Assay of Nucleotide Pyrophosphorylase	JESSE F. SCOTT	348
42. Paper Electrophoresis of Nucleic Acid Com- ponents	J. D. SMITH	350
43. A Two-Dimensional Fractionation Method for Radioactive Nucleotides	F. SANGER AND G. G. BROWNEE	361

44. Chromatography of Nucleic Acid Components on Dowex 1 Columns by the Use of an Automatic Recording System	MASATAKE HORI	381
45. Dowex 1 Chromatography of Oligonucleotides	KIN-ICHIRO MIURA AND YUTSUKI HAYASHI	390
46. Mapping of Oligonucleotides	GEORGE W. RUSHIZKY	395
47. Ion-Exchange Chromatography in the Presence of Urea	G. M. TENER	398
48. Fractionation of Oligoribonucleotides According to Degree of Polymerization	WENDELL M. STANLEY, JR.	404
49. Desalting of Nucleotides by Gel Filtration	MAYO UZIEL	407

Section III. Preparation of Tissue Organelles

<i>Previously Published Articles from Methods in Enzymology Related to Section III</i>		416
--	--	-----

50. The Isolation and Purification of Mammalian Cell Nuclei	TUNG YUE WANG	417
51. Isolation and Purification of Nuclei	HARRIS BUSCH	421
52. Isolation and Purification of Nucleoli	HARRIS BUSCH	448
53. Preparation of Mitochondrial Fractions from <i>Neurospora crassa</i>	DAVID J. L. LUCK	465
54. The Isolation and Purification of Yeast Mitochondria	D. W. GREGORY, E. S. POLAKIS, AND W. BARTLEY	469
55. Isolation of Chloroplasts from <i>Euglena gracilis</i>	JEROME M. EISENSTADT AND GEORGE BRAWERMAN	476
56a. Purification of Mammalian Ribosomes	KIVIE MOLDAVE AND LAWRENCE SKOGERSON	478
56b. Preparation of Polysomes from Mammalian Reticulocytes, Lymph Nodes, and Cells Grown in Tissue Culture	ALEXANDER RICH	481
57. Preparation of Ribosomes and Their Subunits from <i>Escherichia coli</i> Cells	M. TAKANAMI	491
58. Purification of Ribosomes from <i>Euglena gracilis</i>	JEROME M. EISENSTADT AND GEORGE BRAWERMAN	494
59. Resolution and Isolation of Yeast Polysomes	LEON MARCUS AND HARLYN O. HALVORSON	498
60. A Technique of Rapid Lysis for the Preparation of <i>Escherichia coli</i> Polyribosomes	G. N. GODSON	503

61. Preparation of Polyribosomes from <i>Bacillus megaterium</i> KM	MOSELIO SCHAECHTER	516
62. Enzymatic Method for the Isolation of Polyribosomes from <i>Escherichia coli</i>	MARC H. DRESDEN	520
63. Chromatographic Purification of Ribosomes	WENDELL M. STANLEY, JR. AND ALBERT J. WAHBA	524
64. Preparation of the Soluble Fraction from Bacteria	M. LAMBORG	527

Section IV. Isolation and Fractionation of Nucleic Acids

<i>Previously Published Articles from Methods in Enzymology Related to Section IV</i>	532
---	-----

A. Deoxyribonucleic Acid

65. The Isolation of DNA from Mitochondria	GEORGE F. KALF AND MARY ANN GRÉCE	533
66. The Isolation of DNA from Yeast	D. SMITH AND H. O. HALVORSON	538
67. Isolation of DNA from Chloroplasts	JEROME M. EISENSTADT AND GEORGE BRAWERMAN	541
68. Preparation of Bacterial DNA by the Phenol-pH 9-RNases Method	KIN-ICHIRO MIURA	543
69. Isolation of High Molecular Weight DNA from Normal and Phage-Infected <i>Escherichia coli</i>	MERVYN G. SMITH	545
70. The Use of NaClO ₄ to Isolate Bacteriophage Nucleic Acids	DAVID FREIFELDER	550
71. Isolation from Crabs of Deoxyribonucleate with Alternating Deoxyadenylate and Thymidylate Residues	ROBERT P. KLETT AND MICHAEL SMITH	554
72. The Isolation and Characterization by Sucrose Gradients of DNA from Phage-Infected Bacterial Cells	HAMILTON O. SMITH AND MYRON LEVINE	557
73. Fractionation of DNA on Methylated Albumin Column	NOBORU SUEOKA AND TS'AI-YING CHENG	562
74. Fractionation of Nucleic Acids by Dextran-Polyethylene Glycol Two-Phase Systems	BRUCE M. ALBERTS	566

B. Ribonucleic Acid

75. Isolation of Ribonucleic Acids from Mammalian Cells and Animal Viruses	MARC GIRARD	581
76. Isolation of sRNA from Intact <i>Escherichia coli</i> Cells	GUNTER VON EHRENSTEIN	588
77. Isolation of sRNA from Intact Yeast Cells	ROBERT W. HOLLEY	596
78. Purification of Aminoacyl-sRNA by Molecular Sieve Chromatography on Sephadex	KIVIE MOLDAVE AND RICHARD P. SUTTER	598
79. Preparation of Highly Purified sRNA from Yeast	TOMAS LINDAHL AND JACQUES R. FRESCO	601
80. Preparation of RNA from Mammalian Ribosomes	KIVIE MOLDAVE	607
81. Preparation of RNA from Rabbit Reticulocytes and Liver	JACQUES KRUH	609
82. Isolation of RNA Phage M12 Replicative Form RNA	P. H. HOFSCHEIDER, J. AMMANN, AND B. FRANCKE	613
83. The Fractionation of RNA's by Sucrose Gradient Centrifugation	EDWIN H. MCCONKEY	620
84. Fractionation of RNA's on MAK Columns	W. T. MURAKAMI	634
85. Chromatography of sRNA on DEAE-Celulose and DEAE-Sephadex	ROBERT M. BOCK AND JOSEPH D. CHERAYIL	638
86. Fractionation of RNA's by Countercurrent Distribution	B. P. DOCTOR	644
87. Fractionation of Aminoacyl-sRNA on Methylated Albumin Column	NOBORU SUEOKA AND TETSUO YAMANE	658
88. The Hot DEAE-Column Method for Transfer RNA Fractionation	P. L. BERGQUIST, B. C. BAGULEY, AND R. K. RALPH	660
89. Partial Purification of Amino Acid Specific Soluble RNA's by Means of a Chemical Modification of the Terminal Ribose of sRNA	MARY L. STEPHENSON AND PAUL C. ZAMECNIK	670

C. Separation of RNA from DNA

90a. Chromatographic Separation of RNA from DNA on MAK Columns	S. OSAWA AND A. SIBATANI	678
90b. Chromatography of Nucleic Acids on Nitrocellulose Columns	J. A. BOEZI AND R. L. ARMSTRONG	684

91. Use of Filters to Separate Radioactivity in RNA, DNA, and Protein	DAVID KENNELL	686
D. Preparation of Labeled Nucleic Acids		
92. Preparation of Tritium-Labeled DNA from <i>Bacillus subtilis</i> and <i>Escherichia coli</i>	INGA MAHLER	693
93. The Preparation and Properties of ¹⁵ N- Deuterated DNA from Bacteria	C. L. SCHILDKRAUT	695
94. Preparation of Phosphorus-32 Labeled DNA	LAWRENCE GROSSMAN	700
95. Preparation of 5-Bromouracil-Labeled DNA	P. C. HANAWALT	702
