

Brief Contents

PART I Vertebrate Diversity, Function, and Evolution I

- 1 The Diversity, Classification, and Evolution of Vertebrates 2
- 2 Vertebrate Relationships and Basic Structure 16
- 3 Early Vertebrates: Jawless Vertebrates and the Origin of Jawed Vertebrates 43

PART II Non-Amniotic Vertebrates: Fishes and Amphibians 72

- 4 Living in Water 73
- 5 Radiation of the Chondrichthyes 101
- 6 Dominating Life in Water: The Major Radiation of Fishes 118
- 7 Geography and Ecology of the Paleozoic 157
- 8 Living on Land 167
- 9 Origin and Radiation of Tetrapods 196
- 10 Salamanders, Anurans, and Caecilians 220

PART III Sauropsida: Turtles, Lepidosaurs, and Birds 264

- 11 Synapsids and Sauropsids: Two Approaches to Terrestrial Life 265
- 12 Turtles 303
- 13 The Lepidosaurs: Tuatara, Lizards, and Snakes 327
- 14 Ectothermy: A Low-Cost Approach to Life 364
- 15 Geography and Ecology of the Mesozoic 381
- 16 Mesozoic Diapsids: Dinosaurs, Crocodilians, and Birds 388
- 17 Avian Specializations 435

PART IV Synapsida: The Mammals 486

- 18 The Synapsida and the Evolution of Mammals 487
- 19 Geography and Ecology of the Cenozoic 509
- 20 Mammalian Characteristics and Diversity 519
- 21 Mammalian Specializations 553
- 22 Endothermy: A High-Energy Approach to Life 578
- 23 Body Size, Ecology, and Sociality of Mammals 605
- 24 Primate Evolution and the Emergence of Humans 629
- 25 The Impact of Humans on Other Species of Vertebrates 660
