

CONTENTS

PREFACE, xiii

INTRODUCTION, 1 *One Philosophy of Science or Many?* 1
 Theory Reduction, 2
 Reduction and the Biological Sciences, 5

I

THE REDUCTION
OF MENDELIAN
TO MOLECULAR
GENETICS, 8 *Reduction and Scientific Revolutions*, 8
 Historical vs. Rational Reconstruction in Science, 12
 Classical Mendelian Genetics, 13
 The Genotype-Phenotype Relation, 15
 Structure, Function, Position and the Gene Concept, 18
 Dominance and Recessiveness, 19
 Challenges to Mendelian Genetics, 20
 *The Division between Mendelian and Molecular
Genetics*, 22
 The Molecular Structure of the Genetic Material, 24
 Biosynthetic Pathways, 29
 Theory Reduction in Genetics, 30
 Reduction Functions—the Gene, 34
 Reduction Functions—Predicate Terms, 37
 *Mendelian Predicate Terms and Molecular
Mechanisms*, 39
 Reduction in Genetics—Reduction or Replacement? 42

2

THE STRUCTURE OF
EVOLUTIONARY
THEORY, 45

Scientific Theories, Laws, and Definitions, 45
Darwin's Argument and the Structure of Evolutionary Theory, 50 *Saltative Evolution and Essentialism*, 51
Pangensis and Blending Inheritance, 53
Single Variations and Individual Differences, 55
The Genetical Theory of Evolution, 57
The Statistical Nature of Evolutionary Theory and Its Sources, 58 *The Founder Principle*, 62
The Deductive Nature of Evolutionary Theory, 63
Natural Selection or the Survival of the Fittest, 66

3

BIOLOGICAL
THEORIES AND
BIOLOGICAL
LAWS, 70

Scientific Laws and Descriptive Generalizations, 70
Causal Laws, 72 *Developmental Laws in Ontogeny*, 74
Phylogeny and Cross-section Laws, 76
Developmental Laws in Phylogeny, 80
Historical Laws, 82
The Covering-law Model of Scientific Explanation and Prediction, 87
The Symmetry between Explanation and Prediction, 90
Objections to the Symmetry Thesis, 92
Uniqueness and Narrative Explanations, 97

4

TELEOLOGY, 101

The Problem of Teleology, 101
The Essence of Teleology, 103
Physical Models for Teleological Systems, 105
Preferred States and Negative Feedback, 107
Preferred States and Negative Feedback—Objections, 109
Programs and Selection Processes, 111
Teleology and Selection Theories, 113
Teleological Statements and the Covering-law Model of Explanation, 115
Teleological Explanations and the Covering-law Model of Explanation, 118 *Summary and Conclusion*, 122

5

**ORGANICISM AND
REDUCTIONISM, 125**

- The Nature of the Controversy, 125*
Life As a Vital Fluid, 127 *Life As a Vital Force, 128*
The Mechanistic View of Life, 129
Reductionism and Compositionism, 132
Reduction and Quantum Physics, 135
Complexity and Uniqueness, 137
The Role of Boundary Conditions in Science, 139

CONCLUSION, 142**FOR FURTHER
READING, 143****INDEX, 145**
