
Brief Contents

PART I	What Are Amphibians and Reptiles?	1
1	Herpetology As a Field of Study	3
2	The Place of Amphibians and Reptiles in Vertebrate Evolution	21
3	Systematics and Diversity of Extant Amphibians	41
4	Systematics and Diversity of Extant Reptiles	97
5	The Biogeography of Amphibians and Reptiles	174
PART II	How Do They Work?	229
6	Temperature and Water Relations	231
7	Energetics and Performance	269
8	Reproduction and Life Histories of Amphibians	301
9	Reproduction and Life Histories of Reptiles	331
10	Body Support and Locomotion	353
11	Feeding	385
PART III	What Do They Do?	429
12	Movements and Orientation	431
13	Communication	461
14	Mating Systems and Sexual Selection	495
15	Diets, Foraging, and Interactions with Parasites and Predators	530
16	Species Assemblages	567
PART IV	What Are Their Prospects for Survival?	595
17	Conservation and the Future of Amphibians and Reptiles	595
