PART ONE MICROBIOLOGICAL METHODS

SECTION ONE

CULTURING AND HANDLING OF MICROORGANISMS

EXERCISE 1 PREPARATION OF CULTURE MEDIA, 4

A Preparation of a Complex Medium, 6

B Preparation of a Defined Medium, 7

EXERCISE 2 ASEPTIC TECHNIQUE: TRANSFERRING A CULTURE, 11

A Transferring a Culture from one Broth Tube to Another Broth Tube, 12

B Transferring a Culture from one Agar Slant to Another Agar Slant, 13

C Transferring a Culture from an Agar Plate to an Agar Slant, 14

EXERCISE 3 ESTABLISHING PURE CULTURES: THE STREAK PLATE, 17

A T Streak, 19

B Quadrant Streak, 19

C Radiant Streak, 20

D Continuous Streak, 20

EXERCISE 4 PRESERVATION OF CULTURES: ESTABLISHMENT OF A STOCK CULTURE, 25

EXERCISE 5 GROWTH OF MICROORGANISMS, 29

A Nutritional Requirements for Growth, 34

B Selective and Differential Media, 35

C Anaerobic Culture Techniques, 35

SECTION TWO

OBSERVING MICROORGANISMS AND THEIR STRUCTURES

EXERCISE 6 MICROSCOPY: OBSERVING MICROORGANISMS, 44

A Viewing Microorganisms with the Bright-field Microscope, 48

B Examination of Living Microorganisms with the Bright-field Microscope—the Wet Mount, 49

C Measurement of Microbial Cells—the Use of the Micrometer, 50

D Observing Microorganisms with the Dark-field Microscope, 51

EXERCISE 7 STAINING MICROORGANISMS, 59

A Simple Staining and Smear Preparation, 61

B Gram Stain, 62

C Acid-fast Stain, 65

D Bacterial Endospore Stain, 67

E Negative Staining—the Capsule Stain, 68

SECTION THREE

MICROBIAL METABOLISM

EXERCISE 8 ENZYMES: ASSAYS FOR SOME SPECIFIC MICROBIAL ENZYMES, 78

A Catalase, 78

B Cytochrome Oxidase, 79

C Decarboxylase, 80

D Deaminase, 81

E Tryptophanase (Indole Production from Tryptophan Hydrolysis), 81

F Cysteine Desulfurase (Hydrogen Sulfide Production), 82

G Gelatinase, 82

H Urease, 83

I Amylase, 83

- J Nitratase (Nitrate Reduction), 84
- K Coagulase, 85
- L DNase, 85

EXERCISE 9 ASSAYS FOR SPECIFIC METABOLIC ACTIVITIES, 97

- A Acid and Gas Production from Carbohydrate Fermentation, 98
- B Voges-Proskauer Test, 99
- C Methyl Red Test, 99
- D Citrate Utilization, 100

SECTION FOUR

ENUMERATION OF MICROORGANISMS

EXERCISE 10 DETERMINING NUMBERS OF MICROORGANISMS IN A SAMPLE, 108

- A Viable Plate Count, 108
- B The Most Probable Number (MPN) Method, 113
- C Direct Counts using a Counting Chamber, 115

SECTION FIVE

MICROBIAL GENETICS

EXERCISE 11 ISOLATION OF A SPONTANEOUS MUTANT, 125

EXERCISE 12 THE AMES TEST FOR DETECTING MUTAGENS AND CARCINOGENS, 129

SECTION SIX

VIROLOGY

EXERCISE 13 LYTIC PHAGE: PLAQUE ASSAY AND REPLICATION CYCLE, 135

EXERCISE 14 PHAGE TYPING, 141

SECTION SEVEN

MICROBIAL IDENTIFICATION

EXERCISE 15 BACTERIAL IDENTIFICATION USING COMMERCIAL SYSTEMS, 146

- A Identifying an Unknown Enteric Bacterium with the Enterotube II System, 146
- B Identifying an Unknown Enteric Bacterium with the API 20E System, 150

EXERCISE 16 SEROLOGICAL IDENTIFICATION OF CLINICALLY IMPORTANT BACTERIA, 161

SECTION EIGHT

IMMUNOLOGY AND HOST DEFENSES AGAINST DISEASE

EXERCISE 17 NONSPECIFIC HOST DEFENSES: PHAGOCYTOSIS AND LYSOZYME, 167

- A Differential White Blood Count, 168
- B Model System of Phagocytosis, 170
- C Lysozyme, 171

EXERCISE 18 AGGLUTINATION AND BLOOD TYPING, 179

EXERCISE 19 PASSIVE AGGLUTINATION, 183

- A Passive Hemagglutination, 184
- B Passive Agglutination with Latex Beads, 184

EXERCISE 20 ENZYME-LINKED IMMUNOSORBENT ASSAY (ELISA), 189

EXERCISE 21 INDIRECT IMMUNOFLUORESCENCE, 193

PART TWO MICROBIOLOGICAL INVESTIGATIONS

SECTION NINE

MICROBIAL GROWTH

EXERCISE 22 MEASUREMENT OF MICROBIAL GROWTH RATE, 199

EXERCISE 23 ENVIRONMENTAL INFLUENCES ON MICROBIAL GROWTH RATES, 205

- A Effect of Temperature on Microbial Growth, 207
- B Effect of Osmotic Pressure on Growth of Cells, 208
- C Effect of pH on Microbial Growth, 209
- D The Influence of Oxygen on Bacterial Growth, 210

SECTION TEN

MICROBIAL DEATH

EXERCISE 24 *DEATH OF MICROORGANISMS*, 220

- A Heat Killing: Thermal Methods of Lethality, 220
- B Effects of Disinfectants on Microorganisms, 221
- C Effects of Handwashing on the Numbers of Microorganisms on the Skin, 224
- D The Lethal Effects of Ultraviolet Light, 224

EXERCISE 25 *USE OF HEAT TO EXTEND THE SHELF LIFE OF MILK*, 235

EXERCISE 26 *THE KIRBY-BAUER DISK METHOD*, 241

EXERCISE 27 *THE MINIMUM INHIBITORY CONCENTRATION (MIC) METHOD*, 247

EXERCISE 28 *OLIGODYNAMIC ACTION*, 253

EXERCISE 29 *EVALUATION OF DISINFECTANTS: USE-DILUTION METHOD*, 257

SECTION ELEVEN

MICROBIAL SYSTEMATICS

EXERCISE 30 *IDENTIFICATION OF UNKNOWN MICROORGANISMS*, 266

- A Identification of Unknown Bacterial Culture, 267
- B Identification of Filamentous Fungi, 268

SECTION TWELVE

MEDICAL MICROBIOLOGY

EXERCISE 31 *KOCH'S POSTULATES*, 284

- A Animal Model, 285
- B Plant Model, 286

EXERCISE 32 *DISEASE TRANSMISSION*, 291

- A Portals of Entry, 292
- B Spread of Infectious Agents, 292

EXERCISE 33 *ISOLATION AND IDENTIFICATION OF MICROORGANISMS FROM BODY TISSUES AND FLUIDS*, 299

- A Throat Cultures, 299
- B Urine Cultures, 300
- C Storage of Clinical Specimens, 301
- D Microorganisms Found on the Human Skin, 302

EXERCISE 34 *SYNDER CRIES SUSCEPTIBILITY TEST*, 311

SECTION THIRTEEN

WATER AND FOOD MICROBIOLOGY

EXERCISE 35 *THE ASSESSMENT OF WATER QUALITY*, 316

EXERCISE 36 *MICROORGANISMS ASSOCIATED WITH FOOD*, 323

- A Isolation of Psychrophilic-Psychrotrophic Microorganisms from Hamburger, 324
- B Isolation of Salt-tolerant Microorganisms from Cured Meats, 324

APPENDICES

APPENDIX A *Media*, 331

APPENDIX B *Stains*, 343

APPENDIX C *Solutions*, 349

APPENDIX D *Buffers and pH Indicators*, 355

APPENDIX E *Conversion Tables*, 361

APPENDIX F *Glassware and Equipment*, 367

APPENDIX G *Culture Morphology*, 373

Credits, 377

Index, 379
