

Contents

Foreword by Ry Young	v	
Contributors	xi	
PART I. General Background of Phage Biology		
1. Phage and the Early Development of Molecular Biology	3	William C. Summers
2. Classification of Bacteriophages	8	Hans-W. Ackermann
3. Prophage Genomics	17	Harald Brüssow
4. Evolution of Tailed Phages: Insights from Comparative Phage Genomics	26	Harald Brüssow and Frank Desiere
5. Phage Ecology	37	Stephen T. Abedon
PART II. Life of Phages		
6. DNA Packaging in Double-Stranded DNA Phages	49	Paul J. Jardine and Dwight L. Anderson
7. General Aspects of Lysogeny	66	Allan Campbell
8. Gene Regulatory Circuitry of Phage λ	74	John W. Little
9. Regulation of λ Gene Expression by Transcription Termination and Antitermination	83	David I. Friedman and Donald L. Court
10. Phage Lysis	104	Ry Young and Ing-Nang Wang
PART III. Cubic and Filamentous Phages		
11. ϕ X174 et al., the <i>Microviridae</i>	129	Bentley A. Fane, Karie L. Brentlinger, April D. Burch, Min Chen, Susan Hafenstein, Erica Moore, Christopher R. Novak, and Asako Uchiyama
12. Filamentous Phage	146	Marjorie Russel and Peter Model
13. PRD1: Dissecting the Genome, Structure, and Entry	161	A. Marika Grahn, Sarah J. Butcher, Jaana K. H. Bamford, and Dennis H. Bamford
14. Lipid-Containing Bacteriophage PM2, the Type Organism of <i>Corticoviridae</i>	171	Dennis H. Bamford and Jaana K. H. Bamford
15. Single-Stranded RNA Phages	175	Jan van Duin and Nina Tsareva
16. Phages with Segmented Double-Stranded RNA Genomes	197	Leonard Mindich
PART IV. Individual Tailed Phages		
17. The T1-Like Bacteriophages	211	Gregory J. German, Rajeev Misra, and Andrew M. Kropinski
18. T4 and Related Phages: Structure and Development	225	Gisela Mosig and Fred Eiserling
19. Bacteriophage T5	268	Jon R. Sayers
20. The T7 Group	277	Ian J. Molineux
21. Bacteriophage N4	302	Krystyna M. Kazmierczak and Lucia B. Rothman-Denes
22. Phage ϕ 29 and its Relatives	315	Margarita Salas
23. Bacteriophage SPP1	331	Juan C. Alonso, Paulo Tavares, Rudi Lurz, and Thomas A. Trautner
24. Bacteriophage P1	350	Hansjörg Lehnher
25. The P2-Like Bacteriophages	365	Anders S. Nilsson and Elisabeth Haggård Ljungquist
26. The Satellite Phage P4	391	Gianni Dehò and Daniela Ghisotti
27. Bacteriophage λ and its Genetic Neighborhood	409	Roger W. Hendrix and Sherwood Casjens
28. N15: The Linear Plasmid Prophage	448	Nikolai V. Ravin

X CONTENTS

29. Bacteriophage P22
Peter E. Prevelige, Jr.
30. The Bacteriophage Mu
Luciano Paolozzi and Patrizia Ghelardini

PART V. Phages by Host or Habitat

31. Viruses of Archaea
Kenneth M. Stedman, David Prangishvili,
and Wolfram Zillig
32. Phages of Cyanobacteria
Nicholas H. Mann
33. Marine Phages
Robert V. Miller
34. *Yersinia* Phages
Stefan Hertwig, Mikael Skurnik, and
Bernd Appel
35. Temperate Bacteriophages of
Bacillus subtilis
Pamela S. Fink and Stanley A. Zahler
36. Phages of *Lactococcus lactis*
Lone Brøndsted and Karin Hammer
37. The *Listeria* Bacteriophages
Martin J. Loessner and Richard Calendar
38. Mycobacteriophages
Graham F. Hatfull

- 457 39. Molecular Genetics of *Streptomyces* Phages
Margaret C. M. Smith 621
- 469 40. Mycoplasma Phages
Jack Maniloff and Kevin Dybvig 636
41. *Lactobacillus* Phages
Harald Brüssow and Juan E. Suárez 653

499

PART VI. Applications

- 517 42. Control of Bacteriophage in Commercial
Microbiology and Fermentation Facilities 667
Gregg Bogosian
- 534 43. Phage-Based Expression Systems 674
Noreen E. Murray
- 545 44. Phage in Display 686
Bjorn H. Lindqvist
- 557 45. Bacteriophage as Pollution Indicators 695
Charles P. Gerba
- 572 46. The Use of Phage as Diagnostic Systems 702
Cath Rees
- 593 47. Bacteriophages in Bacterial Pathogenesis 710
Patrick L. Wagner and Matthew K. Waldor
- 602 48. Phage Therapy 725
Carl R. Merrill, Dean Scholl, and Sankar Adhya
