

Contents

Contributors ix

1. The Future of Flow Cytometry in Biotechnology 3

Larry A. Sklar

Part I Tools for Flow Cytometry

2. Fluorescent Probes 15

Howard M. Shapiro

3. Automation and High-Throughput Flow Cytometry 40

Bruce S. Edwards and Larry A. Sklar

4. Multispectral Imaging in Flow: A Technique for Advanced Cellular Studies 57

David Basiji

5. Elastomeric Microfabricated Fluorescence-Activated Cell Sorters 68

Anne Y. Fu, Yohie Yokobayashi, Frances H. Arnold, and
Stephen R. Quake

6. Flow Cytometry, Beads, and Microchannels 105

Tione Buranda, Larry A. Sklar, and Gabriel P. Lopez

7. DNA Fragment Sizing by High-Sensitivity Flow Cytometry: Applications in Bacterial Identification 123

Babetta L. Marrone, Robert C. Habbersett, James H. Jett,
Richard A. Keller, Xiaomei Yan, and Thomas M. Yoshida

- 8. A Guide to Informatics and Flow Cytometry 139**
Adam Treister
- 9. Molecular Assemblies, Probes, and Proteomics in Flow Cytometry 153**
Steven W. Graves, John P. Nolan, and Larry A. Sklar

Part II Biological Applications

- 10. Multiparameter Analysis: Application to Vaccine Analysis 181**
Mario Roederer and Stephen C. De Rosa
- 11. FACS-Based High-Throughput Functional Screening of Genetic Libraries for Drug Target Discovery 193**
Erlina Pali, Mark Powell, Esteban Masuda, Yasumichi Hitoshi, Sacha Holland, Mark K. Bennett, Susan M. Molineaux, Donald G. Payan, and James B. Lorens
- 12. Applications of Flow Cytometry in Protein Engineering 212**
George Georgiou, Barrett R. Harvey, Karl E. Griswold, and Brent L. Iverson
- 13. Applications of Flow Cytometry in Animal Reproduction 230**
Duane L. Garner and George E. Seidel, Jr.
- 14. Genetic Analysis Using Microsphere Arrays 259**
John P. Nolan, Alina Desphande, and Feng Zhou
- 15. Uses of Flow Cytometry in Preclinical Safety Pharmacology and Toxicology 275**
Scott W. Burchiel and James L. Weaver
- 16. Flow Cytometry and Cell Sorting in Plant Biotechnology 291**
David W. Galbraith, Jan Bartoš, and Jaroslav Doležal
- 17. Analysis of GTP-Binding Protein–Coupled Receptor Assemblies by Flow Cytometry 323**
Peter Simons, Charlotte M. Vines, T. Alexander Key, Ross M. Potter, Mei Shi, Larry A. Sklar, and Eric R. Prossnitz
- 18. Applications of Flow Cytometry to Cell Adhesion Biology: From Aggregates to Drug Discovery 347**
Richard S. Larson, Alexandre Chigaev, Bruce S. Edwards, Sergio A. Ramirez, Stuart S. Winter, Gordon Zwartz, and Larry A. Sklar
