

PART ONE AN INTRODUCTION TO MICROBIOLOGY 1

1 Biology and Microbiology 3

The development of natural science 4 The development of a conceptual
scheme: biogenesis 6 On the nature of biological science 17
Summary 22 For review 22 For thought and discussion 23
Suggested reading 24

2 The Kinds of Microorganisms 25

Biological classification 25 The higher protists 28 The lower
protists 36 Summary 48 For review 49 For thought and
discussion 50 Suggested reading 50

3 Microbiological Materials and Methods 51

Systems of magnification 51 The microscopic study of micro-
organisms 56 Cultural methods 60 Characterization of microor-
ganisms 67 Maintenance of cultures 71 Summary 73 For
review 73 For thought and discussion 74 Suggested reading 75

PART TWO MOLECULAR BIOLOGY OF MICROORGANISMS 77

4 Microorganisms and Molecules 79

The nature of matter and energy 79 Basic types of organic mole-
cules 89 Movement of materials into cells 100 A nutritional
classification of microorganisms 101 Summary 103 For
review 103 For thought and discussion 104 Suggested
reading 105

5 Microbial Metabolism 107

Enzymes, energy, and metabolism 107 The synthetic phase of
metabolism 115 The degradative phase of metabolism 119
Summary 128 For review 129 For thought and discussion 130
Suggested reading 131

6 Microbial Growth 133

Methods for measuring growth 134 Types and phases of growth 144
Environmental factors that affect growth 148 Methods of control 152
Summary 163 For review 164 For thought and discussion 165
Suggested reading 166

7 Microbial Adaptation 167

Modifications 167 The nature and function of the genetic material 171
Bacterial genetics 186 Microbial adaptation 194 Summary 196
For review 197 For thought and discussion 198 Suggested
reading 199

PART THREE MICROBIOLOGY IN HUMAN AFFAIRS 201

8 Microorganisms and Disease 203

The nature of disease 203 Resistance and immunity 222 Common
infectious diseases of the human body 229 Allergic responses 254
Viruses and cancer 260 Summary 263 For review 264 For
thought and discussion 267 Suggested reading 267

9 Microorganisms, Food, and Industry 269

The microbiology of foods 269 Industrial microbiology 279
Summary 294 For review 295 For thought and discussion 296
Suggested reading 296

10 Microbial Ecology 297

Some basic principles of ecology 297 The microbiology of water 303
Soil microbiology 316 Microbial ecology 325 Summary 326
For review 327 For thought and discussion 328 Suggested
reading 329

Common Greek and Latin Roots 331

Glossary 333
