Preface	<i>page xi</i>
1. Basic characteristics of the algae	1
Structure of the algal cell	2
Nutrition	19
Range of structure in the algae	19
Reproductive cells	21
Life histories	22
Algae and the aquatic environment	22
Classification of the algae	27
Algae and the fossil record	30
References	31
2. Cyanophyceae	32
Morphology	32
Cell wall and sheath	33
Protoplasmic structure	34
Gas vacuoles	36
Pigments and photosynthesis	37
Akinetes	38
Heterocysts	39
Nitrogen fixation and metabolism	42
Asexual reproduction	43
Sexual reproduction and genetic recombination	44
Growth and metabolism	44
Gliding	47
Symbiosis	48
Ecology of blue-green algae	49
Utilization of blue-green algae as food	54
Calcium carbonate deposition and fossil	
Cyanophyceae	54
Morphology and classification	56
References	60
3. Glaucophyta	66
References	69

4. Euglenophyceae	70
Cell structure	70
Nucleus and nuclear division	73
Eyespot, paraflagellar swelling, and phototaxis	73
Muciferous bodies and extracellular structures	76
Chloroplasts and storage products	77
Cell division, growth, and nutrition	79
Classification	82
References	85
5. Dinophyceae	89
Cell structure	89
Resting spores or cysts or hypnospores and fossil Dinophyceae	102
Toxins	103
Bioluminescence	105
Rhythms	106
Symbiotic Dinophyceae	110
Classification	113
References	123
6. Cryptophyceae	126
Cell structure	126
Symbiotic associations	130
Classification	131
References	133
7. Chrysophyceae	135
Cell structure	135
Cytoplasmic processes	141
Statospores	142
Nutrition	142
Ecology	144
Classification	145
References	152
8. Prymnesiophyceae	155
Cell structure	155
Scales and coccoliths	160
Toxins	166
Growth	167
Classification	167
References	170

9.	Bacillariophyceae	173
	Cell structure	173
	Resting spores and resting cells	181
	Auxospores	182
	Motility	182
	Rhythmic phenomena in the Bacillariophyceae	183
	Physiology	183
	Ecology	185
	Fossil diatoms	189
	Classification	191
	References	197
10.	Rhaphidophyceae	201
	References	203
11.	Xanthophyceae	204
	Cell structure	204
	Asexual reproduction	207
	Sexual reproduction	208
	Classification	209
	References	219
12.	Eustigmatophyceae	221
	References	223
13.	Phaeophyceae	224
	Cell structure	224
	Life history	227
	Classification	228
	References	281
14.	Rhodophyceae	287
	Cell structure	287
	Calcification	292
	Reproductive structures	294
	Secretory cells	299
	Iridescence	300
	Epiphytes and parasites	300
	Commercial utilization of red algal mucilages	302
	Classification	305
	References	344

15. Chlorophyceae	351
Cell structure	351
Phototaxis and eyespots	353
Asexual reproduction	354
Sexual reproduction	354
Evolution and range of morphology in the Chlorophyceae	355
Chlorophycean line of evolution	358
Bryophytan line of evolution	400
References	431
16. Charophyta	441
References	444
Glossary	446
Index of genera and species	461
Subject index	467
