

Contents

1. *The Importance of Ants* 1

2. *Classification and Origins* 4

- The Taxonomy of Ants 4
- Origin of the Ants 23
- Beginnings of Social Behavior 27
- The Causes of Success 29
- Taxonomic Keys 33
- Illustrations of Ant Genera 83

3. *The Colony Life Cycle* 143

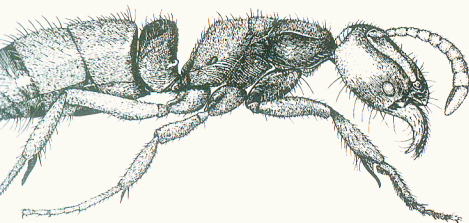

- Stages of Colony Growth 143
- Nuptial Flights and Mating 145
- Colony Founding and Growth 157
- Brood Care and Larval Reciprocation 164
- Demography of Colony Members 168
- Colony Movements 171
- Alternative Strategies in Colony Life Cycles 174

4. *Altruism and the Origin of the Worker Caste* 179

- Altruism 179
- Kin Selection 180
- Parental Manipulation 182
- Offspring Consent 183
- Testing the Kin Selection Theory 184
- Eusociality and Chromosome Numbers 195
- Overview 195

5. *Colony Odor and Kin Recognition* 197

- Kin Recognition: General Principles 197
- Discriminatory Ability 200

Brood Discrimination	201
Source of the Colony Odor	203
The Ontogeny of Recognition	207
Prospect	208

6. *Queen Numbers and Domination*

209

The Origins of Polygyny and Monogyny	209
Gyny and Species Diversity	216
Pleometrosis	217
Demographic Consequences of Gyny and of Dominance Orders	220
Who Is in Charge, Queens or Workers?	223

7. *Communication*

227

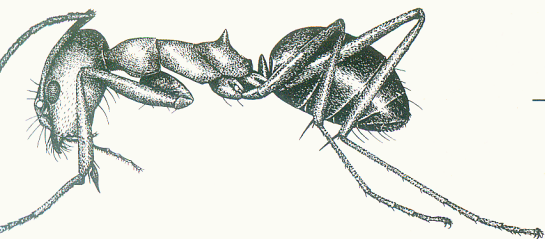

Chemical Communication	227
Ritualization	249
Signal Economy and "Syntax"	252
Modulatory Communication	253
Synergism	254
Caste and Colony Differences in Communication	255
Acoustical Communication	255
Tactile Communication	258
Visual Communication	259
Alarm Communication	260
Propaganda	265
Recruitment	265
Adult Transport	279
Trunk Trails and "Highways"	285
Interspecific Trail Following	286
Marking of Home Ranges, Territories, and Nest Entrances	286
Attraction of Surface Pheromones	289
Trophallaxis	291
Facilitation and Group Effects	294
Autostimulation	295
Mediation of Larval Diapause	295
Necrophoresis or Corpse Removal	296

8. *Caste and Division of Labor*

298

Caste, Task, Role	298
Adaptive Demography	307
The Evolution of Physical Castes	310
Temporal Castes	312
Case Histories	317

Specialization by Majors: Defense	330
Specialization by Majors: Milling and Food Storage	333
Caste Optimization	334
The Allometric Space	340
Elites	341
Patrollers and Reserves	342
Cliques and Teams	343
Pulsatile Activity	345
Males and Larvae as Castes	346
Caste Determination	348

9. *Social Homeostasis and Flexibility*

355

Series-Parallel Operations	356
Multiplier Effects	358
Rules of Thumb	358
The Superorganism	358
Regulation of Homeostasis	360
Adaptive Shifts in Behavior	361
Variation among Colonies	362
Positive Feedback and Runaway Reactions	362
Caste and Behavioral Flexibility	363
Tempo	365
Learning	365
Ants Do Not Play	370
Thermoregulation	370
Humidity Regulation	374

10. *Foraging Strategies, Territory, and Population Regulation*

378

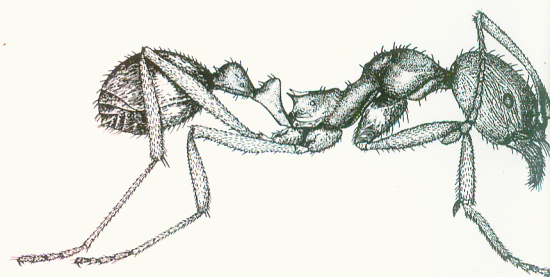

Foraging Theory	378
The Temperature-Humidity Envelope	379
Daily Cycles of Activity	382
Foraging Strategies	383
Solitary Foragers	384
<i>Ortstreue</i> and Majoring	385
Central-Place Foraging	387
Energy Maximizers versus Time Minimizers	388
Special Stratagems That Improve Harvesting	388
Population Regulation	391
Offense and Defense by Foragers	392
Territorial Strategies	400
Territory, Predation, and True Slavery	414
Other Techniques of Competition and Exploitation	415

11. *The Organization of Species Communities* 419

- Interspecific Competition 419
- Changing and Removing Dominants 421
- The Dominance-Impoverishment Rule 423
- The Conditions for Coexistence of Species 423
- Trophallactic Appeasement 429
- Enemy Specification 429
- Character Displacement 431
- Ecological Expansion and Contraction 433
- Species Packing and Equilibrium 433
- The Influence of Parasites and Predators 434
- The Future of Community Studies 435

12. *Symbioses among Ant Species* 436

- The Ultimate Social Parasite 436
- The Kinds of Social Parasitism in Ants 437
- Compound Nests 445
- Mixed Colonies 446
- The Occurrence of Social Parasitism throughout the Ants 446
- The Evolution of Social Parasitism in Ants 448
- The Temporary Parasitism Route 450
- The Dulosis Route 452
- Xenobiosis and Trophic Parasitism 464
- Parabiosis 467
- The Degrees of Inquilinism 467

13. *Symbioses with Other Arthropods* 471

- History of Myrmecophile Studies 471
- Diversity of Myrmecophiles 472
- The Guests of Army Ants: An Extremely Rich Community 472
- The Ant Colony as an Ecosystem 488
- Wasmannian Mimicry 511
- Symbioses between Ants and Lycaenid Butterflies 515
- The Trophobionts 522
- Herders and Nomads 527

14. *Symbioses between Ants and Plants* 530

- The Varieties of Ant-Plant Symbioses 530
- Protectionism and the *Acacia* Case 531
- The Balance of Mutualism 534
- Ants Protect Plants 534
- Plants Shelter Ants: Myrmecophily 534

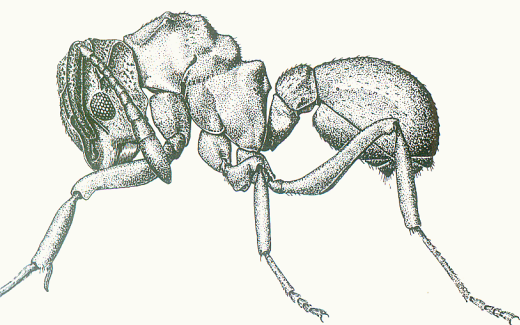

Ant Gardens	546
Plants Feed Ants: Food Bodies	547
Plants Feed Ants: Extrafloral Nectaries	548
Ants Feed Plants: Myrmecotrophy	549
Ants Disperse Plants: Myrmecochory	549
Ants Pollinate Flowers (Sparingly)	551
Ants Prune and Weed	551
Trade-off and Compromise	553
Parasites of Ants: Microorganisms and Fungi	554
Possible Microorganismic Symbionts in Ants	556

15. *The Specialized Predators* 557

The Evolution of Prey Specialization	558
The Evolution of the Dacetine Ants	562
Egg Predators	565
The Ant-Termite Arms Race	566
Prey Paralysis and Prey Storage	569
Masters of Camouflage	571

16. *The Army Ants* 573

The Swarm Raiders	573
Phylogeny of the Doryline and Ecitonine Army Ants	584
What Is an Army Ant?	585
The Driver Ants	588
Army Ants outside the Dorylinae and Ecitoninae	590
The Origin of Legionary Behavior	594

17. *The Fungus Growers* 596

Fungus Culturing	597
The Life Cycle of Leafcutter Ants	600
Host Selection	603
The Origin of the Attini	604
Ant-Fungus Symbioses outside the Attini	607

18. *The Harvesting Ants* 609

History of the Study of Harvesting Ants	609
The Distribution of Harvesting	610
An Extreme Granivore	610
Seed Selection	614
Foraging Patterns	614
Effects of Harvesters on Vegetation	615

19. *Weaver Ants* 618

- Communal Nest Weaving 620
- The Highest Grade of Cooperation 620
- Intermediate Steps 623
- The Simplest Type of Weaving 625
- Anatomical Changes 626
- The Uncertain Climb toward Cooperation 628

20. *Collecting, Culturing, Observing* 630

- How to Collect Ants 630
- Preparation for Museum Work 631
- Culturing Ants 631
- Transporting Colonies 632
- Breeding New Colonies 633

Glossary 635
