Introduction

The science of life	1
The great pollution debate	2
The great population debate	2
The great energy debate	3
New dilemmas	4
The importance of biology	5

2

Life: Its Nature and Origins

What is life?	7
The elements of life	9
Some major molecules of life	11
The earth is born	14
The earth primeval	16
The early atmosphere	16
The primeval seas	18
The genesis of macromolecules	20
Molecular evolution	24
The cell	24
The grand strategy	26
Spontaneous generation	27
Summary	28
Questions	29

3**The Unit of Life**

The cell	31
Cell structures	33
Energy	37
The energy scheme	38
Photosynthesis	39
Harvesting the sun's energy	42
The flow of cellular materials	45
Questions	49

4**The Cell Nucleus**

Chromosomes	51
Cell division	55
Reproduction	62
Asexual reproduction	62
Sexual reproduction	65
Questions	65

5**"Be Fruitful, and Multiply..."**

Human sexuality	67
The master controls	68
The male reproductive system	70
The testes	71
The female reproductive system	76
Sexual intercourse	78
The menstrual cycle	80
Fertilization	84
Pregnancy	86
Birth	93
Lactation	94
Summary	95
Questions	95

6**Birth Control**

The need for birth control	97
Methods of birth control	99
Questions	111

7

The Legacy—DNA	
The importance of the gene	113
The energy of chemical reactions	115
DNA	119
Replication of DNA	122
Ribonucleic acid	123
Protein synthesis	124
Sickle-cell anemia	126
Metabolic block disorders	126
Carrier identification	130
Questions	131

8

The Genetic Dice	
The rules of the game	133
The determination of sex	135
Simple gene combinations	137
Gene frequencies	141
Inheritance of blood groups	149
Sex-linked genes	152
Polygenic inheritance	154
Summary	156
Questions	156

9

A Problem of Choice	
Nondisjunction	159
Chromosome translocations	167
Chromosome deletions	169
Environmentally produced birth defects	170
Amniocentesis—a problem of choice	171
Questions	174

10

Human Nutrition	
The importance of food	177
Classes of nutrients	178
Digestion and absorption	182
More on the metabolic mill	186
Earth—the hungry planet	189
Nutrition and the brain	191
Nutrition and aging	192
Nutrition and the pill	193
Eating for two	193
Too much food	195
Summary	197
Questions	197

11**"... And Replenish the Earth"**

The problem	199
The arithmetic of population growth	201
Why explosive growth?	203
Consequences of population growth	208
What about the future?	210
Questions	211

12**Psychobiology**

Introduction	213
The neuron—the basic unit of behavior	214
The nerve impulse	216
The neuron synapse—the switch	217
The command post—the brain	219
The control of behavior	229
Drugs and the brain	232
Why drug use?	237
Questions	237

13**Noah's Ark**

Order out of chaos	239
Modern classification	241
Prokaryotes: the Monera	242
Eucaryotes	244
Summary	261
Questions	261

14**The Ecosystem**

The sun—the ultimate source	263
Ecology	265
The ecosystem	267
Energy flow in an ecosystem	270
Environmental factors in an ecosystem	273
The delicate web	274
Symbiosis	276
Circulation of materials	277
Ecosystem development	279
Summary	282
Questions	285
