

# Contents

## PART I INTRODUCTION

### **1 Plant Pathology—Art and Science 3**

The Hierarchy of the Sciences. Diversity and Complexity. The Significance of Plant Disease. The Structure of Plant Pathology. The Public Image of Plant Pathology. The Literature of Plant Pathology. Plant Pathology in Practice. What Is Agriculture? Man and His Crops.

## PART II ELEMENTS OF DISEASE

### **2 The Host 31**

Introduction. The Biology of the Host Plant. Variations on the Basic Theme. The Target Population. A Look Ahead.

### **3 Causal Factors: Nonparasitic 49**

General Considerations. Weather. Soil Environment. Injuries. Post-Harvest Pathology. Control of Nonparasitic Diseases.

### **4 Causal Factors: Pathogenic Organisms 84**

The Biology of Infectious Disease. The Viruses. Mycoplasma-like Pathogens. Bacteria. The Fungi. Flowering Plants. Nematodes.

## PART III HOST-PATHOGEN INTERACTIONS

### **5 Entry of Pathogen 139**

Avenues and Mechanisms of Entry. Stimuli to Entry. Host Resistance.

- 6 Symptom Expression** 157  
Establishment and Spread. Morphological Consequences of Invasion. Structural Resistance. Hypersensitivity.
- 7 Physiology of Host-Pathogen Interaction** 171  
Physiology of Parasitism. Pathology of Processes. Biochemical Resistance.
- 8 Extrinsic Factors** 194  
Moisture. Temperature. Light. Other Environmental Factors.

#### PART IV EPIDEMICS

- 9 Inoculum** 215  
Introduction. Sources of Inoculum. Production of Inoculum. Movement of Inoculum. Effectiveness of Inoculum. The Problem of Survival. The Soil Environment.
- 10 Epidemic Development** 238  
Epidemic Spread—The Phenomenon. The Host and Epidemics. Pathogens and Epidemics. Host-Pathogen Interaction and Epidemics. Forecasting.
- 11 Environment** 252  
Climate and Geographic Limits. Weather and Epidemics—Some Examples. Weather and Forecasting. Weather and Insects. The Microclimate Modifier. Soils and Epidemics.

#### PART V DISEASE CONTROL

- 12 Economic Considerations** 275  
Who Is Hurt and Who Should Pay? What, in Fact, Is the Matter? How Serious Is the Situation? What Can Be Done with the Information? Market Pathology, Again a Special Case.
