

CONTENTS

Preface	xvii
---------------	------

Part I

Research Applications

1. The Many Faces of PNA	3
<i>Peter E. Nielsen</i>	
Introduction to PNA	3
PNA Chemistry	3
Cellular Uptake of PNA	4
Antisense Applications	5
Antigene Properties	5
Antimicrobial PNAs	9
Genetic Information Carrier	11
PNA in Diagnostics	12
Prospects	13
2. Modulation of Nucleic Acid Information Processing by PNAs: Potential Use in Anti-Viral Therapeutics	18
<i>Lionel Bastide, Bernard Lebleu and Ian Robbins</i>	
PNAs as Gene-Modulator Agents	21
Virus Specific Nucleic Acid Processing	25
PNA-Tuning	26
3. Targeted Gene Delivery: The Role of Peptide Nucleic Acid	30
<i>Kenneth W. Liang, Feng Liu and Leaf Huang</i>	
Targeted Gene Delivery through Polycation/DNA Complex	31
Targeted Delivery of Naked DNA	33
4. Imaging Gene Expression in the Brain with Peptide Nucleic Acid (PNA) Antisense Radiopharmaceuticals and Drug Targeting Technology	38
<i>Ruben J. Boado and William M. Pardridge</i>	
Mechanism of Action of Antisense Drugs	40
Medical Diagnostic and Therapeutic Applications	41
Functional Genomics	45
Overview of Antisense Molecules and Effective Delivery	45
Brain Drug Targeting Systems	47
Physiological Brain Efflux of IgG	52
Imaging of Brain Gene Expression	52

5. Receptor-Specific Targeting with Complementary Peptide Nucleic Acids Conjugated to Peptide Analogs and Radionuclides	61
<i>Eric Wickstrom, Mathew L. Thakur and Edward R. Sauter</i>	
Synthesis of Probes	68
Applications in Cells	71
Applications in Animals	76
Applications in Patients	80
6. Morpholinos and PNAs Compared	89
<i>James E. Summerton</i>	
Classification of Antisense Structural Types	90
Preparation of Morpholinos and PNAs	91
Properties of Morpholinos and PNAs	93
Applications	106
7. Chemistry of Locked Nucleic Acids (LNA): Design, Synthesis and Bio-Physical Properties	114
<i>Jesper Wengel, Michael Petersen, Miriam Frieden and Troels Koch</i>	
Synthesis of LNA Monomers	114
Solid Phase Synthesis of LNA Oligonucleotides	115
Hybridization Characteristics of LNA Oligonucleotides	118
Hybridization Kinetics of LNA Oligonucleotides	119
Structure of LNA Oligonucleotides	122
DNA and RNA Structure	122
LNA Structure	123
LNA:RNA Duplexes	123
LNA:DNA Duplexes	125
LNA:LNA Duplexes	126
α -L-LNA:RNA Duplexes	126
α -L-LNA:DNA Duplexes	126
Implications for RNase H Activity of LNA:RNA and α -L-LNA:RNA Duplexes	127
Stability of LNA and α -L-LNA Modified Nucleic Acids	127
LNA Triplexes	128
8. Recent Applications of RNA Interference (RNAi) in Mammalian Systems	133
<i>Lisa Scherer and John J. Rossi</i>	
siRNA Design	133
Recent Applications of RNAi	137
Functional Genomics	142
RNAi versus Ribozymes	143

Part II

Clinical Applications

9. Peptide Nucleic Acids as Epigenetic Inhibitors of HIV-1	151
<i>Shizuko Sei</i>	
HIV-1 Life Cycle and Potential Molecular Targets	152
Genetic Strategies to Inhibit HIV-1 Replication	153
Peptide Nucleic Acids as Epigenetic HIV-1 Inhibitors	154
Potential Use of PNA Against Other Infectious Pathogens	161
Bio-Delivery of PNA	161
Future Perspectives	163
10. Therapeutic Uses of Peptide Nucleic Acids (PNA) in Oncology	171
<i>Nadia Zaffaroni, Raffaella Villa and Marco Folini</i>	
Potential of PNAs as Tools for Anticancer	
Therapeutic Interventions	172
Perspectives	178
11. PNAs as Novel Cancer Therapeutics	181
<i>Luca Mologni and Carlo Gambacorti-Passerini</i>	
Biochemistry of Peptide Nucleic Acids	182
PNA as a Biomolecular Tool	183
Antisense and Anti-Gene Properties of PNA	184
Future Directions	189
12. Medicinal Chemistry of Plasmid DNA with Peptide Nucleic Acids: A New Strategy for Gene Therapy	195
<i>Olivier Zelphati, Jiin Felgner, Yan Wang, Xiaowu Liang, Xiaodong Wang and Philip Felgner</i>	
Principle of PNA Dependent Gene Chemistry Technology	197
Labeling of Plasmid DNA to Study Gene Delivery Mechanism	198
Transition	199
Overcoming the Barriers to Improve Gene Delivery and Expression	200
PNA-Conjugates for Targeting DNA to Cell Surface Receptors	201
PNA-Peptide Conjugates to Overcome Cell Membrane Barriers	202
Other Potential Applications of PNA Conjugate for Gene Delivery	206
