

BRIEF CONTENTS

Preface xxiii

- 1 Modern Biology and Its Unifying Themes 1
- Developing Your Abilities To Think and Study 11

I ORGANIZATION AND FUNCTION OF CELLS 15

- 2 The Origin and Chemistry of Life 16
- 3 The Structure of Cells 42
- 4 Cells and Energy: Photosynthesis and Respiration 64
- 5 Cell Division 85

II CELLS AND HEREDITY 105

- 6 Principles of Heredity 106
- 7 Genes and Chromosomes 120
- 8 Molecular Basis of Inheritance 138
- 9 Recombinant DNA and Genetic Engineering 155

III EVOLUTION OF LIVING SYSTEMS 173

- 10 Evolution: Natural Selection and Genetics 174
- 11 Evolutionary Processes: Above the Species Level 193
- 12 Viruses, Prokaryotes, and Protists 218
- 13 Diversity of Fungi and Plants 238
- 14 Animal Diversity 257
- 15 Human Evolution 282

IV CONTROL SYSTEMS IN PLANTS 301

- 16 Plant Structure and Function 302
- 17 Plant Nutrition, Transport, and Gas Exchange 319

V CONTROL SYSTEMS IN ANIMALS 333

- 18 Homeostasis 334
- 19 Muscular/Skeletal Systems 351
- 20 Respiration 371
- 21 Circulation 388
- 22 The Immune System 407
- 23 Digestion and Nutrition 425
- 24 Excretion and Transport 447
- 25 Nervous System and Sensory System 463
- 26 The Endocrine System 493

VI REPRODUCTION, DEVELOPMENT, AND BEHAVIOR 513

- 27 Plant Reproduction and Development 514
- 28 Animal Reproduction and Development 528
- 29 Animal Behavior 556

VII ECOLOGY AND THE ENVIRONMENT 571

- 30 Populations 572
- 31 Communities and Ecosystems 593
- 32 Biosphere and Human Impact 621

APPENDIXES

- A Classification of Organisms A-1
- B Periodic Table of Elements B-1
- C The Metric System C-1
- D Answers to Questions and Problems D-1

Glossary G-1

Index I-1
