Foreword	v
Acknowledgments	vii
Contributors	xiii
Participants in the 2003 Cary Conference	xix
1 Ecosystem Function in Heterogeneous Landscapes	1
<i>Gary M. Lovett, Clive G. Jones, Monica G. Turner, and Kathleen C. Weathers</i>	
Section I Challenges and Conceptual Approaches	5
Editors' Introduction to Section I	7
2 Causes and Consequences of Spatial Heterogeneity in Ecosystem Function	9
<i>Monica G. Turner and F. Stuart Chapin III</i>	
3 The Template: Patterns and Processes of Spatial Variation	31
<i>Ethan P. White and James H. Brown</i>	
4 Thoughts on the Generation and Importance of Spatial Heterogeneity in Ecosystems and Landscapes	49
<i>John Pastor</i>	
5 Reciprocal Cause and Effect Between Environmental Heterogeneity and Transport Processes	67
<i>William A. Reiners</i>	

Section II Perspectives from Different Disciplines	91
Editors' Introduction to Section II	93
6 Population Ecology in Spatially Heterogeneous Environments	95
<i>Lenore Fahrig and William K. Nuttle</i>	
7 Heterogeneity in Hydrologic Processes: A Terrestrial Hydrologic Modeling Perspective	119
<i>Christina Tague</i>	
8 Spatial Heterogeneity in Infectious Disease Epidemics	137
<i>David L. Smith</i>	
9 Spatial Heterogeneity and Its Relation to Processes in the Upper Ocean	165
<i>Amala Mahadevan</i>	
Section III Illustrations of Heterogeneity and Ecosystem Function	183
Editors' Introduction to Section III	185
10 Heterogeneity in Arid and Semiarid Lands	189
<i>David J. Tongway and John A. Ludwig</i>	
11 Formation of Soil-Vegetation Patterns	207
<i>Marcel Meinders and Nico van Breemen</i>	
12 Spatial Patterning of Soil Carbon Storage Across Boreal Landscapes	229
<i>Merritt R. Turetsky, Michelle C. Mack, Jennifer W. Harden, and Kristen L. Manies</i>	
13 Heterogeneity in Urban Ecosystems: Patterns and Process	257
<i>Larry E. Band, Mary L. Cadenasso, C. Susan Grimmond, J. Morgan Grove, and Steward T.A. Pickett</i>	
14 Origins, Patterns, and Importance of Heterogeneity in Riparian Systems	279
<i>Robert J. Naiman, J. Scott Bechtold, Deanne C. Drake, Joshua J. Latterell, Thomas C. O'Keefe, and Estelle V. Balian</i>	
15 Flowpaths as Integrators of Heterogeneity in Streams and Landscapes	311
<i>Stuart G. Fisher and Jill R. Welter</i>	

16	Causes and Consequences of Spatial Heterogeneity in Lakes	329
	<i>Timothy K. Kratz, Sally MacIntyre, and Katherine E. Webster</i>	
Section IV	Application of Frameworks and Concepts	349
	Editors' Introduction to Section IV	351
17	The Importance of Multiscale Spatial Heterogeneity in Wildland Fire Management and Research	353
	<i>William H. Romme</i>	
18	The Role of Spatial Heterogeneity in the Management of Freshwater Resources	367
	<i>Alan D. Steinman and Rodney Denning</i>	
19	The Roles of Spatial Heterogeneity and Ecological Processes in Conservation Planning	389
	<i>Hugh P. Possingham, Janet Franklin, Kerrie Wilson, and Tracey J. Regan</i>	
Section V	Synthesis	407
	Editors' Introduction to Section V	409
20	Challenges in Understanding the Functions of Ecological Heterogeneity	411
	<i>David L. Strayer</i>	
21	Spatial Pattern and Ecosystem Function: Reflections on Current Knowledge and Future Directions	427
	<i>Jerry F. Franklin</i>	
22	Spatial Heterogeneity: Past, Present, and Future	443
	<i>Gaius R. Shaver</i>	
23	Heterogeneity and Ecosystem Function: Enhancing Ecological Understanding and Applications	451
	<i>Judy L. Meyer</i>	
24	Conceptual Frameworks: Plan for a Half-Built House	463
	<i>Gary M. Lovett, Clive G. Jones, Monica G. Turner, and Kathleen C. Weathers</i>
