

Contents

Preface	ix
Part I Microarrays	
1. A Homogenous Microarray for Enzymatic Functional Assays	3
Haiching Ma, Yuan Wang, Amy S. Pomaybo, and Connie Tsai	
2. Improvement of Microarray Technologies for Detecting Single Nucleotide Mismatch	19
Hong Wang, Zuhong Lu, Jiong Li, Heping Liu, and Quanjun Liu	
3. Miniaturized Multiplexed Protein Binding Assays	61
Markus F. Templin, Oliver Poetz, Jochen M. Schwenk, Dieter Stoll, and Thomas O. Joos	
4. MEA-Based Spike Recording in Cultured Neuronal Networks	88
Yasuhiko Jimbo, Nahoko Kasai, Keiichi Torimitsu, and Takashi Tateno	
5. Cell-Transistor Hybrid Systems	99
Sven Ingebrandt and Andreas Offenhausser	
Part II Microfluidics and Lab-on-a-Chip	
6. Microfabricated Chip Electrophoresis Technology for DNA Analysis	117
Feng Xu, Lihua Zhang, Mohammad Jabasini, and Yoshinobu Baba	
7. Microfabrication and Application of Recessed Gold Electrodes in Microchip Electrophoresis System	132
Chonggang Fu	
8. Fast Screening of Single-Nucleotide Polymorphisms Using Chip-Based Temperature Gradient Capillary Electrophoresis	138
Peng Liu, Wan-Li Xing, Dong Liang, Guo-Liang Huang, and Jing Cheng	

9. Electro-Osmotic Flow Micro Pumps for Cell Positioning in Biochips	144
Rafael Taboryski, Jonatan Kutchinsky, Ras Kaas Vestergaard, Simon Pedersen, Claus B. Sørensen, Søren Friis, Karen-Margrethe Krzywkowski, Nicholas Oswald, Rasmus Bjørn Jacobsen, Corey L. Tracy, Margit Asmild, and Niels Willumsen	
Part III Surface Chemistry	
10. The Application of Novel Multi-Functional Microarray Slides for Immobilization Biomolecules	157
Yaping Zong, Youxiang Wang, Jennifer Shi, and Shannon Zhang	
11. Novel Surface Technologies for Genomics, Proteomics, and Drug Discovery	167
Ye Fang, Anthony G. Frutos, Joydeep Lahiri, Dana Bookbinder, Darrick Chow, Allison Tanner, Qin Zong, Ann M. Ferrie, Yijia P. Bao, Fang Lai, Xinying Xie, Brian Webb, Margaret Faber, Santona Pal, Ollie Lachance, Paul Gagnon, Megan Wang, Marie Bryhan, Lyn Greenspan-Gallo, Greg Martin, Larry Vaughan, Camilo Canel, Kim Titus, Debra S. Hoover, John Ryan, Uwe R. Muller, James B. Stamatoff, Laurent Picard, Anis H. Khimani, and Jeffrey L. Mooney	
12. Photoactivatable Silanes: Synthesis and Uses in Biopolymer Array Fabrication on Glass Substrates	176
Handong Li and Glenn McGall	
Part IV Bioinformatics and Drug Discovery	
13. An Integrated Biochemoinformatics System for Drug Discovery	191
Leming Shi, Zhenqiang Su, Aihua Xie, Chenzong Liao, Wei Qiao, Dajie Zhang, Song Shan, Desi Pan, Zibin Li, Zhigiang Ning, Weiming Hu, and Xianping Lu	
Part V New Technologies	
14. Development of the MGX 4D Array System Utilizing Flow-Thru Chip Technology	209
Helen Schiltz, Adam Steel, Brady Cheek, Zivana Tezak, David Cossaboon, Kate Simon, Gang Dong, Matt Chorley, Phil Becker, Jingyi Lo, Harry Yang, and Andrew O'Beirne	

15.	Sequencing by Aligning Mutated DNA Fragments (SAM)	231
	Duncan Cochran, Gita Lala, Jonathan Keith, Peter Adams, Darryn Bryant, and Keith Mitchelson	
16.	Fabrication of Double-Stranded DNA Microarray on Solid Surface for Studying DNA-Protein Interactions	246
	Jinke Wang and Zuhong Lu	
17.	Electronic Biosensors Based on DNA Self-Assembled Monolayer on Gold Electrodes	274
	Chen-Zhong Li, Yi-Tao Long, Todd Sutherland, Jeremy S. Lee, and Heinz-Bernhard Kraatz	
Part VI Applications		
18.	Multi-Parameter Read-Out in Miniaturized Format ...	295
	Thomas Hesterkamp and Andreas Scheel	
19.	Evaluation of the Reliability of cDNA Microarray Technique	311
	Yao Li, Yao Luo, Chengzhi Zhang, Minyan Qiu, Zhiyong Han, Qin Wei, Sanzhen Liu, Yi Xie, and Yumin Mao	
20.	High-Throughput Tissue Microarray Technology for the Rapid Clinical Translation of Genomic Discoveries	324
	Zhuobin Tang and Youyong Lu	
Index		345
