

Contents

Preface	v
Contributors	ix
1. The Future of Biodiversity in a Changing World	1
F. Stuart Chapin III, Osvaldo E. Sala, Elisabeth Huber-Sannwald, and Rik Leemans	
2. Modeling the Response of Vegetation Distribution and Biodiversity to Climate Change	5
Martin T. Sykes and Alex Haxeltine	
3. The Use of Global-Change Scenarios to Determine Changes in Species and Habitats	23
Rik Leemans	
4. Soil Biodiversity	47
Diana H. Wall, Gina Adams, and Andrew N. Parsons	
5. Scenarios of Biodiversity Changes in Arctic and Alpine Tundra	83
Marilyn D. Walker, William A. Gould, and F. Stuart Chapin III	

6. Boreal Forest	101
F. Stuart Chapin III and Kjell Danell	
7. Temperate Grasslands	121
Osvaldo E. Sala	
8. Tropical Savanna	139
Brian Walker	
9. Mediterranean-Climate Ecosystems	157
Harold A. Mooney, Mary T. Kalin Arroyo, William J. Bond, Josep Canadell, Richard J. Hobbs, Sandra Lavorel, and Ronald P. Neilson	
10. Deserts	201
Laura Foster Huenneke	
11. Temperate Forests of North and South America	223
Juan J. Armesto, R. Rozzi, and J. Caspersen	
12. Tropical Forests	251
Rodolfo Dirzo	
13. Lakes	277
David M. Lodge	
14. Fish Diversity in Streams and Rivers	315
N. LeRoy Poff, Paul L. Angermeier, Scott D. Cooper, P.S. Lake, Kurt D. Fausch, Kirk O. Winemiller, Leal A.K. Mertes, Mark W. Oswood, James Reynolds, and Frank J. Rahel	
15. Potential Biodiversity Change: Global Patterns and Biome Comparisons	351
Osvaldo E. Sala, F. Stuart Chapin III, and Elisabeth Huber-Sannwald	
Index	369
