Preface	xi
Acknowledgements	xiii
1 Plant Virology: An Introduction	
1.1 A Definition	1
1.2 The Development of Plant Virology as a Science	3
1.3 The Economic Importance of Plant Viruses	6
1.4 The Composition of Plant Viruses	11
1.5 References	18
1.6 Further Selected Reading	22
2 Plant Virus Classification	
2.1 Introduction	24
2.2 The Plant Virus Groups Infecting Angiosperms	32
2.3 Virus Strains	52
2.4 Viruses Infecting other Plant Classes	54
2.5 Virus-like Diseases	58
2.6 References	62
2.7 Further Selected Reading	70
3 Virus Symptoms	
3.1 Introduction	71
3.2 Principal External Symptoms	72
3.3 Principal Internal Symptoms	89
3.4 Latent Infection	95
3.5 Factors Influencing Symptom Expression	96
3.6 References	99
3.7 Further Selected Reading	102

4	Mechanical Transmission and Virus Isolation	
4.1	Introduction	103
4.2	The Transmission Process	103
4.3	Factors Affecting Mechanical Transmission	108
4.4	Infectivity Assay	112
4.5	Storage of Virus Isolates	117
4.6	References	118
4.7	Further Selected Reading	120
5	Virus Purification	
5.1	Introduction	121
5.2	Propagation of Virus for Purification	122
5.3	Partial Purification Procedure	123
5.4	Methods for Final Purification	128
5.5	References	130
5.6	Further Selected Reading	132
6	Virus Identification	
6.1	Introduction	133
6.2	Mode of Transmission, Host Range and Symptoms	134
6.3	<i>In vitro</i> Properties in Crude Sap	135
6.4	Cross-protection Tests	136
6.5	Electron Microscopy	137
6.6	Serology	142
6.7	Cytopathology	154
6.8	Sedimentation Properties	155
6.9	Electrophoretic Mobility	158
6.10	Chemical Composition	159
6.11	Molecular Hybridization Analysis	162
6.12	References	163
6.13	Further Selected Reading	167
7	Virus Transmission by Biological Means	
7.1	Introduction	168
7.2	Mechanical Transmission in the Field	168
7.3	Transmission by Grafting	170
7.4	Insect Transmission	171
7.5	Nematode Transmission	186
7.6	Fungal Transmission	192
7.7	Transmission through Seed and Pollen	196

7.8	Transmission by Vegetative Propagation	202
7.9	Transmission by Dodder	203
7.10	References	203
7.11	Further Selected Reading	208
8	Ecology and Epidemiology of Plant Viruses	
8.1	Introduction	210
8.2	Examples of Ecological Factors that Control Virus Epidemiology	210
8.3	References	221
8.4	Further Selected Reading	224
9	Basic Control Measures	
9.1	Introduction	226
9.2	Elimination of Source of Infection	226
9.3	Avoidance of Source of Infection	227
9.4	Avoidance of the Vector	231
9.5	Chemical Control of Vectors	232
9.6	Non-chemical Control of Vectors	235
9.7	Controls by Cross-protection	237
9.8	Control of Disease Symptoms by Chemicals	238
9.9	References	238
9.10	Further Selected Reading	243
10	Control through Resistant Cultivars	
10.1	Introduction	244
10.2	Definitions and Examples of Host Resistance to Viruses	246
10.3	Procedures Used in Breeding for Virus Resistance	252
10.4	Durability of Virus Resistance	261
10.5	Host Resistance to the Vector	262
10.6	Production of Resistant Plants by Cell Manipulation	263
10.7	References	264
10.8	Further Selected Reading	269
11	Production of Virus-free Plants	
11.1	Introduction	270
11.2	Thermotherapy	273
11.3	Virus Eradication by Tissue Culture	280
11.4	Chemotherapy	285

4	Mechanical Transmission and Virus Isolation	
4.1	Introduction	103
4.2	The Transmission Process	103
4.3	Factors Affecting Mechanical Transmission	108
4.4	Infectivity Assay	112
4.5	Storage of Virus Isolates	117
4.6	References	118
4.7	Further Selected Reading	120
5	Virus Purification	
5.1	Introduction	121
5.2	Propagation of Virus for Purification	122
5.3	Partial Purification Procedure	123
5.4	Methods for Final Purification	128
5.5	References	130
5.6	Further Selected Reading	132
6	Virus Identification	
6.1	Introduction	133
6.2	Mode of Transmission, Host Range and Symptoms	134
6.3	<i>In vitro</i> Properties in Crude Sap	135
6.4	Cross-protection Tests	136
6.5	Electron Microscopy	137
6.6	Serology	142
6.7	Cytopathology	154
6.8	Sedimentation Properties	155
6.9	Electrophoretic Mobility	158
6.10	Chemical Composition	159
6.11	Molecular Hybridization Analysis	162
6.12	References	163
6.13	Further Selected Reading	167
7	Virus Transmission by Biological Means	
7.1	Introduction	168
7.2	Mechanical Transmission in the Field	168
7.3	Transmission by Grafting	170
7.4	Insect Transmission	171
7.5	Nematode Transmission	186
7.6	Fungal Transmission	192
7.7	Transmission through Seed and Pollen	196

11.5	Indexing, Clone Selection and Stock Maintenance	286
11.6	Future Developments in the Use of Virus-free Plants	288
11.7	References	288
11.8	Further Selected Reading	292
12	Practical Information and Introductory Exercises	
12.1	Introduction	293
12.2	Virus Isolation and Transmission	293
12.3	<i>In vitro</i> Properties in Crude Sap	298
12.4	Virus Purification	300
12.5	Serology Tests	303
12.6	Electron Microscopy	311
12.7	Meristem-tip Culture for Virus Eradication	313
12.8	Other Relevant Information	317
12.9	Reference	321
	Glossary	322
	Index	333
