
Contents

INTRODUCTION

1. The Plant Cell—Structure and Function of its Parts, 3

Introduction, 3 / Cell Wall, 4 / Cell Membrane, 9 / Inclusions of the Cytoplasm, 11 / Cytoplasmic Ground Substance, 20 / References, 21

2. Properties of Solutions, Suspensions, and Colloidal Systems, 24

Introduction, 24 / The Nature of Solutions, 24 / Types of Solutions, 25 / Concentration of Solutions, 27 / Acids, Bases, and Salts, 29 / Colloidal Systems, 33

WATER RELATIONS

3. Diffusion, Osmosis, and Imbibition, 43

Introduction, 43 / Diffusion, 45 / Osmosis, 49 / Imbibition, 57 / References, 60

4. Transpiration, 62

Introduction, 62 / Transpiration, 62 / The Stomatal Mechanism, 67 / Factors Affecting the Rate of Transpiration, 75 / Significance of Transpiration, 82 / Guttation, 84 / References, 86

5. Absorption and Translocation of Water, 90

Introduction, 90 / Anatomy of the Xylem Tissue, 90 / Absorption

of Water, 93 / Mechanisms Involved in the Translocation of Water, 102 /
Path of Water, 107 / References, 108

CARBOHYDRATE METABOLISM AND TRANSLOCATION

6. Enzymes, 113

Introduction, 113 / Nature of Enzymes, 114 / Nomenclature and Specificity, 115 / Classification, 116 / Enzyme-Substrate Complex, 119 / Prosthetic Groups: Activators, Cofactors, and Coenzymes, 120 / Distribution of Enzymes in the Plant, 122 / Factors Affecting Enzyme Activity, 123 / Summary, 127 / References, 127

7. Carbohydrates, 128

Introduction, 128 / Classification, 128 / Transformation of Carbohydrates, 139 / Summary, 152 / References, 153

8. Respiration and Fermentation, 156

Introduction, 156 / Adenosine Triphosphate: An Energy Intermediate, 156 / Release of Energy, 158 / Measurement of Respiration, 172 / Factors Affecting the Rate of Respiration, 175 / Summary, 179 / References, 179

9. Translocation of Sugars, 181

Introduction, 181 / Anatomy of Phloem Tissues, 182 / Substances Translocated in the Phloem, 185 / General Aspects of Phloem Translocation, 187 / Mechanisms of Phloem Translocation, 204 / Summary, 209 / References, 209

PHOTOSYNTHESIS

10. The Pigments and Structure of the Photosynthetic Apparatus, 217

Introduction, 217 / History, 217 / The Nature of Light, 220 / Pigments Involved in Photosynthesis, 221 / The Chloroplast, 234 / The Bacterial Chromatophore, 242 / References, 243

11. The Light and Dark Reactions of Photosynthesis, 248

Introduction, 248 / Radiant Energy, 248 / Free Radicals, 249 / Transfer of Energy, 252 / Origin of Oxygen in Photosynthesis, 254 /

Emerson Effect, 255 / Two Pigment Systems, 256 / Photosynthetic Unit, 257 / Production of Assimilatory Power, 259 / The Carbon Compounds of Photosynthesis, 268 / Photosynthesis versus Respiration, 277 / Measurement of Photosynthesis, 278 / References, 280

12. Factors Affecting the Rate of Photosynthesis, 284

Introduction, 284 / Limiting Factors, 284 / References, 299

MINERAL NUTRITION

13. Detection, Occurrence, and Availability of the Essential Elements, 305

Introduction, 305 / Various Elements Found in Plants, 306 / Methods of Detection, 306 / Occurrence of the Various Elements, 310 / References, 322

14. Mineral Salt Absorption and Translocation, 325

Introduction, 325 / Passive Absorption, 326 / Active Transport, 329 / Factors Affecting Salt Absorption, 336 / Translocation, 340 / References, 349

15. Functions of the Essential Mineral Elements and Symptoms of Mineral Deficiency, 353

Introduction, 353 / Nitrogen, 353 / Phosphorus, 354 / Calcium, 355 / Magnesium, 357 / Potassium, 358 / Sulfur, 359 / Iron, 361 / Manganese, 363 / Copper, 364 / Zinc, 365 / Boron, 366 / Molybdenum, 367 / References, 367

16. Nitrogen Metabolism, 372

Introduction, 372 / Nitrogen Nutrition, 373 / Amino Acids and Amides, 387 / The Proteins, 393 / Nucleic Acids, 397 / References, 404

PLANT GROWTH HORMONES

17. The Natural Growth Hormones, 411

Introduction, 411 / Definitions, 414 / Distribution of Auxin in the Plant, 414 / Translocation of Auxin, 416 / Physiological Effects, 418 /

Bioassays, 439 / Biosynthesis of Auxin, 444 / Other Plant Hormones, 446 / References, 455

18. The Synthetic Growth Hormones, 464

Introduction, 464 / Molecular Structure and Auxin Activity, 464 / Antiauxins, 469 / Kinetics of Auxin Activity, 471 / Inactivation of Auxin, 473 / Mechanisms of Auxin Inactivation, 473 / References, 475

19. The Gibberellins, The Cytokinins, and Ethylene, 478

Gibberellins, 478 / Kinetin and the Cytokinins, 495 / Ethylene, 505 / References, 510

GROWTH AND DEVELOPMENT

20. Photoperiodism, 521

Introduction, 521 / The Flowering Response, 522 / Perception of the Photoperiodic Stimulus and Presence of a Floral Hormone, 528 / Summary, 534 / References, 535

21. Vernalization, 538

Introduction, 538 / Vernalization and Flowering, 539 / Summary, 548 / References, 549

22. Dormancy, 551

Introduction, 551 / Advantages of Dormancy, 552 / Seed Dormancy, 553 / Bud Dormancy, 564 / Growth-Inhibiting Substances, 567 / Summary, 571 / References, 571

Author Index, 575

Subject Index, 585
